DISTRICT COURT, WATER DIVISION 1, COLORADO

OCTOBER 2026 WATER RESUME PUBLICATION

TO: ALL PERSONS INTERESTED IN WATER APPLICATIONS IN WATER DIVISION 1
Pursuant to C.R.S. 37-92-302, you are notified that the following is a resume of all water right applications, and certain amendments filed in the Office of the Water Clerk and/or ordered published during the month of **OCTOBER 2026** for each County affected. (This publication can be viewed in its entirety on the state court website at: www.coloradojudicial.gov)

CASE NUMBER 2026CW3161 LOOKOUT MOUNTAIN WATER DISTRICT, c/o Coaty and Woods, PC, 1202 Bergen Pkway, Ste 110, Evergreen, CO 80439. David S Hayes, John D Buchanan, Hayes Poznanovic Korver LLC, 700 17th Street, Suite 1800, Denver, CO 80202. **APPLICATION FOR FINDING OF REASONABLE DILIGENCE IN CLEAR CREEK COUNTY**. Description of water right: Name of structure: Upper Beaver Brook Reservoir (a/k/a Beaver Brook Reservoir 3A) First Enlargement and Refill. Prior decrees: The original water right for Upper Beaver Brook Reservoir was decreed by the District Court of the City and County of Denver in Case No. 60052 as entered on May 13, 1936, with an appropriation date of August 27, 1924, for 257.22 acre-feet for domestic and municipal purposes. The conditional First Enlargement and Refill water rights for Upper Beaver Brook Reservoir were decreed by the District Court, Water Division 1, in Case No. 11CW287 entered on December 9, 2013. A Finding of reasonable diligence was subsequently made in Case No. 19CW3245 (decree entered October 26, 2020). Location of dam centerpoint: SW1/4 of the SE1/4 of Section 15, T4S, R72W, 6th P.M., Clear Creek County, Colorado, at a point approximately 130 feet from the South section line and approximately 2170 feet from the East section line of said Section 15, as shown on the map attached hereto as Exhibit A. Source: South Fork of Beaver Brook (a/k/a Beaver Brook) and natural inflow, including precipitation, into the Upper Beaver Brook Reservoir First Enlargement. Beaver Brook is a tributary to Clear Creek, a tributary of the South Platte River. Date of appropriation: December 29, 2011. Amounts: Upper Beaver Brook Reservoir First Enlargement: 102 acre-feet conditional, minus carryover from previous years. Upper Beaver Brook Reservoir Refill: 38.3 acre-feet to replace gross evaporation loss, conditional, minus carryover from previous years. Use: Upper Beaver Brook Reservoir First Enlargement: Domestic and municipal uses, including irrigation and commercial. Upper Beaver Brook Reservoir Refill: Replacement of gross evaporation loss. Surface area of high-water line: The enlarged Upper Beaver Brook Reservoir has a surface area of approximately 15.5 acres when full. Vertical height of dam: The existing Upper Beaver Brook Reservoir has a dam approximately 85 feet in height. The enlargement of storage capacity was accomplished, in whole or in part, by raising the height of the deep spillway channel adjacent to the reservoir by approximately 10 feet. Length of dam in feet: Approximately 690 feet. Total capacity of reservoir: The enlarged Upper Beaver Brook Reservoir has a total capacity of approximately 397.4 acre-feet, of which approximately 0.1 acre-foot is dead storage. Detailed outline of work done to complete project and apply water to beneficial use: The District owns and operates a water system that provides water service to tap-owners within its boundaries as they currently exist or may exist in the future. The application contains a summary of specific projects and work undertaken during the diligence period in furtherance of the foregoing water rights, and is available for inspection at the office of the Div. 1 Water Clerk or CCE. The list is not intended to be all inclusive and may be supplemented by additional evidence at any hearing in this matter. Names(s) and address(es) of the owner(s) of the land upon which any new diversion or storage structure or modification to any existing diversion or storage structure or existing storage pool is or

will be constructed or upon which water is or will be stored: Applicant. WHEREFORE, Applicant requests that the Court enter a decree finding that the Applicant has exercised reasonable diligence in the development of the conditional water rights for Upper Beaver Brook Reservoir (a/k/a Beaver Brook Reservoir 3A) First Enlargement and Refill; and continuing in full force and effect the conditional water rights described in Paragraph 2 above. 5 Pages.

CASE NUMBER 2026CW3162 THE CITY AND COUNTY OF DENVER, ACTING BY AND THROUGH ITS BOARD OF WATER COMMISSIONERS ("Denver Water" or "Applicant"), 1600 West 12th Avenue, Denver, Colorado 80204. Jessica R. Brody, General Counsel, Daniel J. Arnold, James M. Wittler, Crystal J. Easom. **APPLICATION FOR FINDING OF REASONABLE DILIGENCE, CONCERNING THE APPLICATION FOR WATER RIGHTS OF THE CITY AND COUNTY OF DENVER ACTING BY AND THROUGH ITS BOARD OF WATER COMMISSIONERS IN THE SOUTH PLATTE RIVER AND ITS TRIBUTARIES IN JEFFERSON COUNTY**. Number of pages of Application 7. **DESCRIPTION OF CONDITIONAL WATER RIGHTS** 2. Name of Structures: A. Long Lake Reservoir No. 1 (aka Campbell Reservoir No. 1) Decreed Capacity: 1,447 acre-feet Planned Capacity: 2,021.8 acre-feet B. Long Lake Reservoir No. 2 (aka Campbell Reservoir No. 2) Decreed Capacity: 292 acre-feet Planned Capacity: 1,008.3 acre-feet 3. Description of Conditional Water Right and Information From Previous Decree: A. Date of Original Decree: May 13, 1936, Civil Action 60052, Court: Water District No. 23, Irrigation District No. 7 in Division No. 1. B. Subsequent Decrees Awarding Findings of Diligence: (1) Date of Decree: April 28, 1975, Case No. W-3076-72 & W-3076-74, Court: Water Division No.1 (2) Date of Decree: March 20, 1980, Case No. W-3076-78, Court: Water Division No.1 (3) Date of Decree: May 22, 1986, Case No. 82CW178, Court: Water Division No.1 (4) Date of Decree: November 4, 1988, Case No. 86CW141, Court: Water Division No.1 (5) Date of Decree: October 30, 1991, Case No. 90CW105, Court: Water Division No.1 (6) Date of Decree: June 23, 2000, Case No. 97CW277, Court: Water Division No.1 (7) Date of Decree: January 3, 2007, Case No. 06CW140, Court: Water Division No.1 (8) Date of Decree: July 26, 2013, Case No. 13CW008, Court: Water Division No.1 (9) Date of Decree: October 29, 2020, Case No. 2019CW3137, Court: Water Division No. 1. C. Legal Description: (1) Long Lake Reservoirs Nos. 1 and 2 are supplied through the Long Lake Feeder Ditch, the decreed headgate of which is located on the west bank of Ralston Creek at a point in Section 31, Township 2 South, Range 70 West, whence the southeast (SE) corner of Section 6, Township 3 South, Range 70 West, bears south 15°0': East 5,525 feet, in Jefferson County. See attached **Exhibit A**. (2) Long Lake Reservoir No. 1 (Upper) is located in the southwest quarter of the southwest quarter (SW1/4 SW1/4) Section 33, Township 2 South, Range 70 West and in the northwest quarter (NW1/4) and the north half of the southwest quarter (N1/2 SW1/4) Section 4, Township 3 South, Range 70 West, Jefferson County, State of Colorado. (3) Long Lake Reservoir No. 2 (Lower) is located on the east half of the northwest quarter (E1/2 NW1/4) and the northeast quarter of the southwest quarter (NE1/4 SW1/4) and the southwest quarter of the northeast quarter (SW1/4 NE1/4) and the northwest quarter of the southeast quarter (NW1/4 SE1/4) Section 4, Township 3 South, Range 70 West, Jefferson County, State of Colorado. D. Source of Water: Ralston Creek and tributary drainage thereto lying above the decreed point of diversion of Long Lake Feeder Ditch. E. Appropriation Date: June 6, 1909. F. Amount: (1) Long Lake Reservoir No. 1: 557 acre-feet ABSOLUTE, 574.8 acre-feet CONDITIONAL, 1,131.8 acre-feet TOTAL. (2) Long Lake Reservoir No. 2: 292 acre-feet ABSOLUTE, 716.3 acre-feet CONDITIONAL, 1,008.3 acre-feet TOTAL. G. Use: Long Lake Reservoirs Nos. 1 and 2 are used for storing water for irrigation purposes. H. Remarks: In C.A. 60052, Long Lake Reservoir No. 1 was awarded Ralston Creek Reservoir Priority No. 4 with a priority date of May 29, 1873 for 890 acre-feet. Also adjudicated in C.A. 60052 was the enlargement of Lake Reservoir No. 1 under Ralston Creek Reservoir Priority No. 9 and 9-a with a priority date of June 6, 1909 for an additional 1,131.8 acre-feet of which 557 acre-feet has been made absolute and 574.8 acre-feet remain conditional. In the same proceeding, Long Lake Reservoir No. 2 was awarded Ralston Creek Priority No. 10 with a priority date of June 6, 1909 for storage of 292 acre-feet absolute. The enlargement right for Long Lake Reservoir No. 2 was awarded Ralston Creek Reservoir Priority 10-a with a priority date of June 6, 1909 for an additional 716.3 acre-feet conditional. The additional quantity of water so conditionally decreed shall be diverted from

Ralston Creek through the Long Lake Ditch at not in excess of the rate of 40 cubic feet of water per second of time; provided that Denver Water may increase the rate of diversion to a total of not in excess of the rate of 70 cubic feet of water per second of time. This application is for the conditional portions of Long Lake Reservoir Nos. 1 and 2 enlargement rights (Reservoir Priorities 9-a and 10-a). Water diverted under Reservoir Priority Nos. 4, 9, and 10 is used for irrigation pursuant to contracts with the City of Arvada dated December 10, 1997 and the Agricultural Ditch dated April 2, 1936. A map depicting Upper and lower Long Lake and the Long Lake Feeder Ditch is attached hereto as **Exhibit A**. **CLAIM FOR FINDING OF REASONABLE DILIGENCE** 4. Diligence Activities. Long Lake Reservoir Nos. 1 and 2 are existing facilities owned and operated by Denver Water. These facilities are integral parts of the Denver Municipal Water System. The following activities describe Denver Water's steady application of effort to complete the appropriation in a reasonably expedient and efficient manner under all the facts and circumstances. A. The following activities describe work completed in furtherance of maintaining and fully developing Long Lake Reservoir Nos. 1 and 2 ("Long Lakes"): i. In June 2020, Denver Water entered into an agreement with AECOM Technical Services Inc. to perform a semi-quantitative risk assessment of Upper and Lower Long Lake Dams. To date, Denver Water has spent approximately $63,000 on this agreement. ii. In August 2020, Denver Water entered into an agreement with Custom Environmental Services Inc. to clean the interior of the Long Lakes Feeder Ditch Siphon. To date, Denver Water has spent approximately $34,000 on this agreement. iii. In August 2020, Denver Water entered into an agreement with Miller Pipeline LLC for joint repairs on Long Lakes Feeder Ditch Siphon 1. To date, Denver Water has spent approximately $230,000 on this agreement. iv. In July 2022, Denver Water entered into an agreement with RJH Consultants Inc. to perform a geotechnical investigation related to Ralston Reservoir, Upper Long Lake, and Lower Long Lake. To date, Denver Water has spent approximately $119,000 on this agreement. v. Denver Water retained Geosyntec Consultants, Inc. to provide technical water quality and mine reclamation expertise to assist in monitoring, reviewing, and advocating for the proper reclamation of the Schwartzwalder Mine, located upstream of the Long Lake Feeder Ditch. Denver Water also collected and processed water quality samples, and dedicated staff time to monitoring discharges and permitting activities at the mine site, and actively participated as a stakeholder in regulatory processes affecting the mine site. Since 2020, Denver Water has spent approximately $384,000 on this agreement with Geosyntec Consultants, Inc. vi. Denver Water completed regular operations and maintenance on Upper Long Lake and Lower Long Lake, including dam safety inspections, survey of the dams for movement, feeder tunnel safety inspections, debris removal, weed control, and more. vii. In total, Denver Water has spent at least $830,000 on these activities during the most recent diligence period. 5. Names and Addresses of Owners of Land on which Structures are Located. The following are names(s) and address(es) of owner(s) or reputed owners of the land upon which any new diversion or storage structure, or modification to any existing diversion or storage structure is or will be constructed or upon which water is or will be stored, including any modification to the existing storage pool: Keller Family Limited Partnership LLLP, PO Box 620279, Littleton, CO 80162. WHEREFORE, Denver Water respectfully requests that the Water Court enter a decree finding that Denver Water has been reasonably diligent in the development of the conditional portions of the Long Lake Reservoir Nos. 1 and 2 storage rights and continue the conditional portions for a subsequent diligence period.

CASE NUMBER 2026CW3163 ROXANNE VAN HOVE, 1619 Outter Marker Road, Castle Rock, CO 80108; Please direct all correspondence concerning this application to: David M. Shohet, Monson, Cummins, Shohet & Farr, LLC, 13511 Northgate Estates Drive, Suite 250, Colorado Springs, CO 80921; Telephone Number: (719) 471-1212; Email: dms@cowaterlaw.com. **APPLICATION FOR ADJUDICATION OF DENVER BASIN GROUNDWATER AND PLAN FOR AUGMENTATION IN DOUGLAS COUNTY.** Applicant owns approximately 35.095 acre parcel of land and seeks to quantify the groundwater in the Dawson and Denver aquifers underlying the property. The Arapahoe and Laramie-Fox Hills aquifers were previously quantified by Applicant's predecessor in Case No. 98CW472, District Court, Water Division 1. Applicant also seeks approval of a plan for augmentation for the use of up to two not-nontributary Dawson aquifer wells for provision of water to Applicant's property. Property Description. Applicant's property lies in portions of the NE¼ and NW ¼ of Section 14, and the SW ¼ of Section 11, all

in Township 17 South, Range 67 West of the 6th P.M., El Paso County, Colorado ("Applicant's Property"), as approximately shown on the attached **Exhibit A** map, and as more specifically described Lot 3, Block 1 of Happy Canyon Ranches. The street address for the Applicant's Property 1619 Outter Marker Rd, Castle Rock, Co 80108. Existing Well. There is one existing well on the Applicant's Property, registered with the Division of Water Resources as Permit No. 129065 ("Van Hove Well No. 1"). The Van Hove Well No. 1 is drilled to a depth of approximately 380 feet to the Dawson aquifer. Upon approval of the requested augmentation plan, Van Hove Well No. 1 will be re-permitted accordingly. Proposed Wells. Applicant will construct additional or replacement wells on Applicant's Property as necessary to produce its decreed entitlements. Not-Nontributary. The groundwater to be withdrawn from the Dawson and Denver aquifers underlying Applicant's Property is not-nontributary. Pursuant to C.R.S. § 37-90-137(9)(c.5), the augmentation requirements for wells in the Dawson aquifer require the replacement of actual stream depletions, and the augmentation requirements for wells in the Denver require replacement of a total amount of water equal to 4% (four percent) of the amount of water withdrawn on an annual basis. Estimated Rates of Withdrawal. Pumping from the wells on Applicant's Property will not exceed 100 gpm. The actual pumping rate for the wells will vary according to aquifer conditions and well production capabilities. Applicant requests the right to withdraw groundwater at rates of flow necessary to withdraw the entire decreed amounts. Estimated Average Annual Amounts of Groundwater Available. Applicant requests a vested right for the withdrawal of all legally available groundwater in the Denver Basin aquifers underlying the Applicant's Property. Said amounts may be withdrawn over the 100-year life of the aquifers as required under the State of Colorado's 100-year life requirement pursuant to C.R.S. § 37-90-137(4). Applicant estimates that the following values and average annual amounts are representative of the Denver Basin aquifers underlying the Applicant's Property:

AQUIFER	NET SAND (Feet)	Total Appropriation (Acre feet)	Annual Avg. Withdrawal 100 Years (Acre feet)
Upper Dawson (NNT – actual)	200	1400	14
Denver (NNT – 4%)	272	1622	16.22

Decreed amounts may vary based upon the State's Determination of Facts. Pursuant to C.R.S. § 37-92-305(11), the Applicant further requests that the Court retain jurisdiction to finally determine the amount of water available for appropriation and withdrawal from each aquifer. Requested Uses. The Applicant requests the right to use the groundwater for beneficial uses upon the Applicant's Property consisting of domestic, commercial, agricultural, irrigation, watering and boarding of stock, poultry, and domestic animals, recreation, dust suppression, use of water in hot tubs, pools, and/or water features, use of water for tiny houses or recreational vehicle uses, use of water in kitchen, sanitary and living facilities for animal boarding operations, and for storage and augmentation purposes associated with such uses. Applicant may use such water by immediate application or by storage and subsequent application to the beneficial uses and purposes stated herein. Provided, however, Applicant shall only be entitled to use water from the not-nontributary Dawson and Denver aquifers pursuant to a decreed augmentation plan entered by this Court, covering the out-of-priority stream depletions caused by the use of such not-nontributary aquifer in accordance with C.R.S. § 37-90-137(9)(c.5). Well Fields. Applicant requests that she be permitted to produce the full legal entitlement from the Denver Basin aquifers underlying the Applicant's Property through any combination of wells. Applicant requests that these wells be treated as a well field. Averaging of Withdrawals. Applicant requests that she be entitled to withdraw an amount of groundwater in excess of the average annual amount decreed to the aquifers beneath the Applicant's Property, so long as the sum total withdrawals from all the wells in the aquifers do not exceed the product of the number of years since the date of issuance of the original well permit or the date of entry of a decree herein, whichever comes first, multiplied by the average annual volume of water which the Applicant is entitled to withdraw from the aquifers underlying Applicant's Property. Owner of Land Upon Which Wells are to Be Located. The

land and underlying groundwater upon which the wells will be located is owned by the Applicant. Structures to be Augmented. The structures to be augmented are the Van Hove Well No. 1 and a possible second well on Applicant's Property, along with any replacement or additional wells associated therewith, which are completed to the Dawson aquifer on the Applicant's Property. Water Rights to be Used for Augmentation. The water rights to be used for augmentation during pumping are the return flows resulting from the pumping of the not-nontributary Dawson aquifer, along with any additional or replacement wells associated therewith, on Applicant's Property, together with water rights from the nontributary Arapahoe and/or Laramie-Fox Hills aquifers for any injurious post-pumping depletions. Statement of Plan for Augmentation. Applicant seeks to provide for the augmentation of stream depletions caused by pumping of the not-nontributary Dawson aquifer on Applicant's Property. Water use criteria and their consumptive use component for replacement of actual depletions for the Applicant's Property are estimated as follows: Uses and Amount. Pumping from the Dawson aquifer will be a maximum of 4 acre feet of water per year total from the Dawson aquifer. Such uses shall be for domestic, commercial, agricultural, irrigation, watering and boarding of stock, poultry, and domestic animals, recreation, dust suppression, use of water in hot tubs, pools, and/or water features, use of water for tiny houses or recreational vehicle uses, use of water in kitchen, sanitary and living facilities for animal boarding operations, and for storage and augmentation purposes associated with such uses. An example breakdown of this combination of use is in-house use of 0.27 acre feet of water per year for the primary residence on Applicant's Property, with the remaining 3.73 acre feet per year available for any other additional uses. Depletions. Withdrawals from the Dawson aquifer by the Dawson aquifer pumping require replacement of actual stream depletions, pursuant to C.R.S. § 37-90-137(9)(c.5)(I)(B). The plan may be for 100 or 300 years. It is estimated that maximum stream depletions over the 300-year pumping period for the Dawson aquifer amount to approximately 3% of pumping. Maximum annual depletions for total pumping from Dawson aquifer pumping are therefore 0.12 acre feet (i.e. 3% of pumping). Should Applicant's pumping be less than the 4 acre feet total per year described herein, resulting depletions and required replacements will be correspondingly reduced. Augmentation of Depletions During Pumping. Pursuant to C.R.S. § 37-90-137(9)(c.5)(I)(B), Applicant is required to replace actual stream depletions caused by withdrawals of the Dawson aquifer on an annual basis. Depletions during pumping will be effectively replaced by residential return flows from a non-evaporative septic system. The annual consumptive use for non-evaporative septic systems is 10%. At a household rate of 0.27 acre feet per residence per year, 0.24 acre feet is replaced to the stream per year from the primary residence, assuming the use of a non-evaporative septic system. Thus, during pumping, stream depletions (0.12 acre feet per year) will be adequately augmented. Augmentation for Post-Pumping Depletions. For the replacement of any injurious post-pumping depletions that may be associated under the plan for augmentation, Applicant will reserve up to 1200 acre feet of water from the underlying Laramie-Fox Hills and/or Arapahoe aquifers, accounting for actual stream depletions replaced during the pumping period, as necessary to replace any injurious post-pumping depletions. Applicant also reserves the right to substitute other legally available augmentation sources for such post-pumping depletions upon further approval of the Court under its retained jurisdiction. Even with this reservation, under the Court's retained jurisdiction, Applicant reserves the right to prove in the future that post-pumping depletions will be noninjurious. The reserved nontributary groundwater will be used to replace any injurious post-pumping depletions. Upon entry of a decree in this case, Applicant will be entitled to apply for and receive new well permits for Dawson aquifer pumping from the Applicant's Property, and any replacement or additional wells, for the uses in accordance with this Application and otherwise in compliance with C.R.S. § 37-90-137. Applicant requests a finding that she has complied with C.R.S. § 37-90-137(4), and that the groundwater requested herein is legally available for withdrawal by the not-nontributary well upon the entry of a decree approving a plan for augmentation pursuant to C.R.S. § 37-90-137(9)(c.5). The term of this augmentation plan is for 100 years; however, the length of the plan may be extended beyond such time provided the total plan pumping allocated to the well is not exceeded. Any post-pumping stream depletions accrue to a particular well only to the extent related to that well's actual pumping. The Court will retain jurisdiction over this matter to provide for the adjustment of the annual amount of groundwater withdrawals to be allowed to conform to actual local aquifer characteristics from adequate information

obtained from well drilling or test holes. Applicant requests a finding that vested water rights of others will not be materially injured by the withdrawals of groundwater and the proposed plan for augmentation. Wells shall be installed and metered as reasonably required by the State Engineer. The Applicant waives the 600-feet well spacing requirement, pursuant to C.R.S. § 37-90-137(2)(b), for any wells to be located on Applicant's Property in relation to one another. This waiver does not apply to wells not located on Applicant's Property and/or not owned by the Applicant. Applicant will comply with any lienholder notice provisions set forth in C.R.S. §§ 37-92-302(2)(b) and 37-90-137(4)(b.5)(I), and such notice will be sent within 14 days of the filing of this application. 7 Pages.

CASE NUMBER 2026CW3164 LOVELAND READY-MIX CONCRETE, INC., PO Box 299, Loveland, CO 80539. Matthew S Poznanovic, John D Buchanan, Hayes Poznanovic Korver LLC, 700 17th Street, Suite 1800, Denver, CO 80202. **APPLICATION TO MAKE ABSOLUTE AND FOR FINDING OF REASONABLE DILIGENCE IN LARIMER COUNTY**. Prior Decree Information: The conditional water rights for the Loveland Ready-Mix Ponds Nos. 1 and 2 were originally decreed in Case No. 98CW431, District Court for Water Division 1 on March 12, 2001. A finding of reasonable diligence was made in the decree entered in Case No. 07CW38 on November 14, 2007. A portion of the conditional water rights was made absolute and diligence was found in the decree entered in Case No. 13CW3137 on December 3, 2014. **DESCRIPTION OF CONDITIONAL WATER RIGHTS** Name of Structures: Loveland Ready-Mix Pond No. 1 ("LRM Pond 1") and Loveland Ready-Mix Pond No. 2 ("LRM Pond 2") (collectively, the "LRM Ponds"). Legal Description of Structures: The reservoirs are located in the portion of the Northwest Quarter of Section 16 that lies North of the Big Thompson River and South of the Barnes Ditch and the portion of the West Half of the Northeast Quarter of Section 16 that lies West of Namaqua Road, North of the Big Thompson River and South of the Barnes Ditch, all in Township 5 North, Range 69 West of the 6th P.M., Larimer County, Colorado. The location of the outlet structure for LRM Pond 1 as identified in the Case No. 98CW431 decree is located approximately 1,200 feet South and 200 feet West of the NW corner of the NE 1/4 of Section 16. The as-built location of the outlet structure for LRM Pond 1 is 1,390 feet South and 305 feet West of the NW corner of the NE 1/4 of Section 16. The location of the outlet structure for LRM Pond 2 as identified in the Case No. 98CW431 decree is located approximately 2,100 feet South and 400 feet East of the NW corner of the NE 1/4 of Section 16. The as-built location of the outlet structure for LRM Pond 2 is 1,610 feet South and 25 feet East of the NW corner of the NE 1/4 of Section 16. The locations of the LRM Ponds are shown in the map attached as Exhibit A. Legal description of Points of Diversion: Diversions will be directly from the Big Thompson River at a point or points located in the SW1/4 of the NW1/4 of Section 16, Township 5 North, Range 69 West of the 6th P.M., at a point which bears South 43º 17' 03" West a distance of approximately 3,114.24 feet from the North Quarter Corner of Section 16 as shown on Exhibit A. Means of Diversion: Diversions will be accomplished by use of up to three 10 inch pumps, with a total capacity of 8,078 gallons per minute, or by a combination of pumps and siphons. The total maximum rate of diversion will be approximately 18 cubic feet per second of time. Source: Big Thompson River. Appropriation Date: November 13, 1998. Amounts: 550 acre-feet combined for the LRM Ponds, of which 182.77 acre-feet combined for the LRM Ponds has been made absolute for all decreed uses and 367.23 acre-feet combined for the LRM Ponds is conditional for all decreed uses. Each reservoir is decreed one annual refill. It is anticipated LRM Pond 1 will be approximately 320 acre-feet in size and LRM Pond 2 will be approximately 230 acre-feet in size. Pursuant to the Case No. 98CW431 decree, the precise capacity of each reservoir will be determined and included in any application to make the decree absolute, and in no event will the combined capacities exceed 550 acre-feet. Uses: Augmentation, exchange, and substitute supply, recreation, fish propagation and wildlife habitat. The recreation, fish propagation and wildlife habitat uses shall all be within or upon the reservoirs, and no water shall be removed from the reservoirs for these uses. **CLAIM TO MAKE ABSOLUTE** During the last diligence period, in priority diversions were made into storage in LRM Pond 1. As of May 17, 2015, 276.96 acre-feet was diverted in priority and delivered into storage in LRM Pond 1 pursuant to the conditional water rights. Subsequently, 50 acre-feet of the water stored in LRM Pond 1 was delivered into LRM Pond 2 through an overflow pipe. Water continued to be diverted in priority in 2018, 2022 and

2023. The absolute claim is limited to the 2015 in priority diversions into storage in excess of the previously decreed 182.77 acre-feet absolute amount. All in priority diversions into storage were made for the purpose of augmentation, exchange, and substitute supply, recreation, fish propagation and wildlife habitat uses. The total combined capacity of the LRM Ponds is currently 499 acre-feet. The current storage capacity for LRM Pond 1 is 276.96 acre-feet (219 acre-feet if the overflow pipe is opened), and for LRM Pond 2 is 222.04 acre-feet. Applicant requests the Court find that an additional 94.19 acre-feet combined for the LRM Ponds conditional water right had vested and made absolute as of May 17, 2015, for augmentation, exchange, and substitute supply, recreation, fish propagation and wildlife habitat uses, pursuant to C.R.S. § 37-92-301(4)(d) and (e). In the alternative and if this amount is not made absolute, Applicant requests that a diligence finding also be made to continue this amount pursuant to the activity described in this application. **CLAIM FOR FINDING OF REASONABLE DILIGENCE** Since entry of the Case No. 13CW3137 Decree, in continuing the development of the conditional water rights, Applicant has been diligent in the continued use and development of the water rights involved and has been engaged in the legal defense and protection of said water rights. These activities include, but are not limited to, the following: Installed meter pit risers and covers on the meters associated with the LRM Ponds. Cleaned and repaired a weir and set pump associated with the LRM Pond 1. Repaired the spillways and inlets associated with the LRM Ponds. Upgraded two measurement stations associated with the LRM Ponds to use cellular telemetry. Repaired and relocated the LRM Pond 1 flow monitoring station and repaired, tested and calibrated the LRM Pond 2 flow monitoring station. Maintained and removed trees and vegetation in and around the LRM Ponds. Conducted aerial mapping of LRM Pond 1 and reviewed new pond survey data. Repaired the LRM Pond 1 pump. Repaired the pit lining for LRM Pond 1, tested the repaired lining and provided the test results to the Colorado Division of Water Resources ("DWR"), and received DWR liner approval. Provided the repaired liner test results for LRM Pond 2 to DWR and received DWR liner approval. Purchased Loggernet software to be used for remote monitoring and operation of pumps. Applicant prepared daily augmentation accounting, and monthly reports submitted to the Office of the Division Engineer. Annual reporting is also submitted to the DRMS as required by reclamation permit M1974-069. Applicant diverted and beneficially used water under the conditional water rights described above. During the diligence period, legal counsel for Applicant has reviewed the resume of applications as published by the Water Clerk for Water Division 1 and advised Applicant whether Statements of Opposition need to be filed to protect the water rights. Expenditures for the diligence activities relating to the LRM Ponds during this diligence period was $59,979.85. The work and expenditures listed above are illustrative and not exhaustive. Additional work and additional or revised expenditures may be claimed in support of this application. The owners of the land upon which any new diversion or storage structure or modification to any existing diversion or storage structure or existing storage pool is or will be constructed or upon which water is or will be stored: Applicant. An additional 94.19 acre-feet of the water rights for the LRM Ponds vested and became absolute based on in priority diversions into storage as of May 17, 2015, and findings of reasonable diligence for the remaining conditional water rights that are the subject of this application have not been decreed since entry of the Case No. 13CW3137 decree. The remaining conditional water rights have not been and should not be cancelled because Applicant did not receive a pre-cancellation notice from the Court. The return receipt for the pre-cancellation notice filed by the Court in Case No. 13CW3137, which shows the notice was returned to sender, is attached as Exhibit B. WHEREFORE, Applicant requests that this Court enter a decree finding that an additional 94.19 acre-feet combined for the LRM Ponds conditional water right had vested and made absolute as of May 17, 2015, for all decreed uses, that Applicant has exercised reasonable diligence in the development of the remaining conditional water rights, continuing the remaining conditional water rights, and for such other and further relief as this Court deems just and proper in the premises. 6 pages.

CASE NUMBER 2026CW3165 GREATER COLORADO COUNCIL, SCOUTING AMERICA, 10455 West 6th Avenue, Suite 100, Denver, Colorado 80215, Peter D. Jaacks, #56585, Jewell Jimmerson Natural Resources Law LLC, 333 Perry Street, Suite 310, Castle Rock, CO 80104 pjaacks@jjnrlaw.com. **APPLICATION FOR FINDING OF REASONABLE DILIGENCE AND TO MAKE**

CONDITIONAL WATER RIGHTS ABSOLUTE IN ELBERT COUNTY, COLORADO. (91CW024, 13CW3077, 20CW3059). Original decrees: Case No. 91CW024, entered October 29, 1991, and Case No. 98CW460, entered September 20, 1999, District Court, Water Division 1, Colorado. Prior diligence decrees: Case No. 13CW3077, entered April 2, 2014, continued the conditional rights for Abrahamson Reservoir, Cris Dobbins Lake, Family Enrichment Camp Lake, and Family Enrichment Camp Lake – First Enlargement. **Conditional Water Rights: 1. Abrahamson Reservoir** a. Location: NW1/4 NW1/4 of Section 11 and NE1/4 NE1/4 of Section 10, Township 10 South, Range 64 West, 6th P.M., Elbert County. The outlet is at a point approximately 200 feet South and 200 feet East of the NW corner of Section 11. Approximate location is detailed on the map filed with the Application. b. Source: Springs and runoff tributary to Kiowa Creek. c. Appropriation date: December 31, 1973. d. Amount: 10 a.f. absolute (with right to fill and refill when water is legally available) e. Uses: Irrigation, recreation, fish and wildlife, stock water, fire protection, and augmentation **2. Cris Dobbins Lake** a. Location: SE1/4 NW1/4 and NE1/4 SW1/4, Section 14, Township 10 South, Range 64 West, 6th P.M., Elbert County, Colorado. The outlet is at a point approximately 2300 feet South and 1550 feet East of the NW corner of Section 14. Approximate location is detailed on the map filed with the Application. b. Source: Springs and runoff tributary to Kiowa Creek. c. Appropriation date: December 31, 1984. d. Amount and uses: 75 acre feet total; 27 acre-feet absolute with the right to fill and refill when water is legally available; 48 acre-feet conditional. e. Uses: Recreation, fish and wildlife, stock water, fire protection, aggregate camping, commercial, domestic, municipal, irrigation, dust suppression, and augmentation. **3. Family Enrichment Camp Lake (a.k.a. Magness Lake):** a. Location: NW1/4 of Section 15, Township 10 South, Range 64 West, 6th P.M., Elbert County, Colorado. The outlet is at a point approximately 1500 feet South and 1500 feet East of the NW corner of Section 15. Approximate location is detailed on the map filed with the Application. b. Source: Springs and runoff tributary to Kiowa Creek. c. Appropriation date: March 31, 1991. d. Amount: 40.3 acre-feet total, with the right to fill and refill when water is legally available. 15.05 acre-feet absolute; 25.25 acre-feet conditional. e. Uses: Recreation, fish and wildlife, aggregate camping, commercial, domestic, municipal, stock water, dust suppression, fire protection, and augmentation. **4. Family Enrichment Camp Lake First Enlargement** a. Location: NW1/4 of Section 15, Township 10 South, Range 64 West, 6th P.M., Elbert County, Colorado. The outlet is at a point approximately 1500 feet South and 1500 feet East of the NW corner of Section 15. b. Source: Springs and runoff tributary to Kiowa Creek. c. Appropriation date: April 4, 1993. d. Amount: 22.5 acre-fee conditionalt, in addition to the 40.3 acre-feet described in Paragraph C.3, with the right to fill and refill when water is legally available. e. Uses: Recreation, fish and wildlife, domestic, stock water, commercial, dust suppression, fire protection, aggregate camping uses, and augmentation. **D. Reasonable Diligence in Development of Conditional Water Rights:** In support of this Application for Finding of Reasonable Diligence, Applicant has, during the October 2020 to October 2026 diligence period, continued developing the conditional storage rights detailed above. Applicant has used, maintained, and improved the facilities involved in this Application and has expended in excess of $120,000 on those activities. In addition, Applicant has continued planning and designing water facilities supporting its camps, including water treatment facilities and water quality improvements. Work performed during the diligence period toward completion of the conditional rights and application of water to a beneficial use as decreed includes the following activities: **1.** All three lakes have been filled and used each year. Each lake is actively used each year for the Applicant's camp programs. The lakes have also been used by Elbert County for firefighting purposes annually. **2.** Applicant has undertaken substantial efforts to mitigate excessive aquatic vegetation in Magness Lake by varying water storage levels and taking physical control measures. **3.** Applicant has inspected the three dams annually, has assisted the Colorado Division of Water Resources (DWR) with its inspections of the dams for Cris Dobbins Lake and Magness Lake, and has been implementing the resulting recommendations including but not limited to: brush removal, weed control, rodent eradication and clearing of trees and debris. **4.** Applicant has completed substantial improvements to the domestic water supply system for a portion of the camp, including a 100,000-gallon storage tank for domestic water storage and fire suppression purposes. These improvements are in excess of $1,000,000. **5.** Applicant has conducted forestry improvements on its camp properties consistent with Natural Resource Conservation Service Guidelines, which improve water quality and sustainability of the land. **6.** Applicant

has been making improvements to the road system on the property, installing Infiltration Basins and Dry Detention Basins to hold storm surges and slowly release groundwater, reducing erosion and improving water quality. **7.** Applicant has also retained water lawyers and engineers to develop and protect their rights for integrated use of underground water and surface water, including water stored in the reservoirs. It is not yet clear whether a plan for augmentation or replacement plan will be needed for any of the planned water uses at Peaceful Valley. Applicant would prefer to avoid the need for such a plan if possible. However, Applicant intends to use one or more of the reservoirs for augmentation or replacement use in the event such a plan is ever required. **E. Claim to Make Absolute.** During the diligence period, the following amounts of surface water were stored under each structure's decreed priority at times when there were no senior downstream calls. As shown by Applicant's accounting, the water was captured, possessed, and controlled at the decreed storage structure for its decreed purposes. Applicant's accounting is attached to the Application as Exhibit B. Applicant requests an absolute decree for the portions identified below pursuant to C.R.S. § 37-92-301(4)(e): 1. Abrahamson Reservoir a. Date Water Applied to Beneficial Use: Abrahamson Reservoir's outflow pipe is at 6,773.07 feet of elevation. The Reservoir has filled to its decreed capacity numerous times during the diligence period, first in June 2023. b. Amount: 10 acre-feet. c. Use: Storage for decreed purposes. 2. Cris Dobbins Lake. a. Date Water Applied to Beneficial Use: Cris Dobbins Lake has filled to its maximum decreed capacity of 75 acre-feet numerous times during the diligence period, first in November 2022. Several large storm events during the diligence period also filled the lake to its capacity, most recently in September 2026. b. Amount: 75 acre-feet. c. Use: Storage for decreed purposes. 3. Family Enrichment Camp Lake (a/k/a Magness Lake). a. Date Water Applied to Beneficial Use: Magness Lake has filled to its maximum decreed capacity of 40.3 acre-feet numerous times during the diligence period, first in November 2022. Several large storm events during the diligence period also filled the lake to its capacity, as shown in the accounting provided in Exhibit B. b. Amount: 40.3 acre-feet. c. Use: Storage for decreed purposes. 4. Family Enrichment Camp Lake – First Enlargement (a/k/a Magness Lake). a. Date Water Applied to Beneficial Use: A large storm event in June 2023 filled Magness Lake to 59.2 acre-feet. Magness Lake was at its full decreed capacity at the time, so approximately 40.3 acre-feet of the 59.2 acre-feet was the original storage volume and 18.9 acre-feet was the First Enlargement volume. b. Amount: 18.9 acre-feet. c. Use: Storage for decreed purposes. F. Remaining conditional portions: Applicant requests a finding of reasonable diligence for the 3.6 acre-feet of the Magness Lake First Enlargement that remains conditional. G. Names and addresses of owners of the land upon which any new diversion or storage structure or modification to any existing diversion or storage structure is or will be constructed, or upon which water will be stored: The structures described above are all located on land owned by Applicant. (7 pages.)

CASE NUMBER 2026CW3166 (89CW234, 99CW62, 06CW83, 13CW3112, 20CW3066). **COORS BREWING COMPANY ("Coors"),** PO Box 4030, 5th Floor BOC, Golden, Colorado 80401-0030, (303) 277-3342. April D. Hendricks and Peter D. Jaacks, Jewell Jimmerson Natural Resources Law LLC, 333 Perry Street, Suite 310, Castle Rock, CO 80104. **APPLICATION FOR FINDING OF REASONABLE DILIGENCE IN <u>JEFFERSON COUNTY</u>**. 2. <u>Description of Conditional Appropriative Right of Exchange</u>: 2.1 <u>Date of Original Decree</u>: April 30, 1993 in Case No. 89CW234, District Court, Water Division No. 1. Since that time, the Court has found Coors to have been diligent in the development of the subject conditional appropriative right of exchange and accordingly has entered decrees making certain amounts absolute and continuing the remaining conditional portion of such water right in full force and effect in Case Nos. 99CW062 (entered March 10, 2000); 06CW83 (entered September 11, 2007); 13CW3112 (entered May 16, 2014); and 20CW3066 (entered October 29, 2020). 2.2 <u>Location</u>: Coors's exchange reach is on Clear Creek, lying between the headgate of the Farmers High Line Canal and Coors's easternmost reservoir of the Jefferson Storage System used in this exchange, being Prospect Park Lake, located in the West 1/2 of Section 21, Township 3 South, Range 69 West of the 6th P.M. 2.3 <u>Description of Appropriative Right of Exchange</u>: Coors established a conditional appropriative right of exchange as part of its augmentation plan decreed in Case No. 89CW234. Coors's decreed augmentation plan, including this exchange, uses the replacement water sources decreed in Case No. 89CW234 (and generally described

in Paragraph 2.5 below) to replace out-of-priority depletions from Coors's decreed Underground Springs, storage in the Jefferson Storage System, diversions through the Coors Industries Ditch, and other out-of-priority depletions described in Case No. 89CW234. The exchange water is delivered from the Farmers High Line Canal, the Wannamaker Ditch, and the Agricultural Ditch, and is returned to Clear Creek via augmentation stations. The exchange water may also be rediverted from Clear Creek into, and subsequently released from, Coors's reservoirs in the Jefferson Storage System, or returned to Clear Creek at discharge points from the industrial complex. Such water is exchanged from these points of diversion or delivery to the points of depletion to Clear Creek from Coors's augmented out-of-priority diversions. 2.4 Names and locations of structures involved in the exchange: 2.4.1. Farmers High Line Canal: 2.4.1.1. The point of diversion is located on the north bank of Clear Creek in the SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., a short distance below the Ford Street Bridge across Clear Creek in the City of Golden, Jefferson County, Colorado. 2.4.1.2. Augmentation Station No. 8: through which water from the Farmers High Line is delivered to Clear Creek at a point on the North bank of Clear Creek in the NW 1/4 SW 1/4 NE 1/4 SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., Jefferson County, Colorado. 2.4.2. The Wannamaker Ditch: 2.4.2.1. The point of diversion is located on the north bank of Clear Creek in the NE 1/4 of Section 27, Township 3 South, Range 70 West, whence the NE corner of Section 27, Township 3 South, Range 70 West of the 6th P.M. bears North 38°17.5' East, 2099.64 feet in Jefferson County, Colorado. 2.4.2.2. Augmentation Station No. 7: through which water from the Wannamaker Ditch is delivered to Clear Creek at a point on the North bank of Clear Creek in the NE 1/4 NE 1/4 NE 1/4 NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., Jefferson County, Colorado. 2.4.3. The Agricultural Ditch: 2.4.3.1. The point of diversion is located on the south bank of Clear Creek in the SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. in the City of Golden, Jefferson County, Colorado. 2.4.3.2. Augmentation Station No. 3: through which water from the Agricultural Ditch is delivered to Clear Creek at a point on the South bank of Clear Creek in the NE 1/4 SW 1/4 SE 1/4 SE 1/4 of Section 23, Township 3 South, Range 70 West of the 6th P.M., Jefferson County, Colorado. 2.4.3.3. Augmentation Station No. 9: through which water from the Agricultural Ditch is delivered to Clear Creek at a point on the South bank of Clear Creek in the SW 1/4 SE 1/4 NW 1/4 SW1/4 of Section 27, Township 3 South, Range 70 West, of the 6th P.M., Jefferson County, Colorado. 2.4.3.4. Augmentation Station No. 13: through which water from the Agricultural Ditch is delivered to Clear Creek at a point on the South bank of Clear Creek in the NW 1/4 NE 1/4 SW 1/4 SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., Jefferson County, Colorado. 2.4.4. Coors Underground Springs: 2.4.4.1. Underground Springs in Case No. W-7809(74) were decreed on April 9, 1975, with a priority date of October 31, 1974. The springs described below are decreed for domestic and lawn and garden irrigation for eight single family homes, and commercial and industrial, primarily for beer brewing purposes, to be withdrawn through the structures at a maximum combined rate of flow of 14.0 c.f.s. even though the sum of the flows of all the structures individually is greater. All the below described springs are located in Jefferson County, Colorado. 2.4.4.1.1. Underground Spring No. 11-3271: Located in the NE 1/4 of NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 1043 feet South and 3631 feet West of the NE corner of said Section 26. 2.4.4.1.2. Underground Spring No. 12-2822: Located in the NE 1/4 of NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 828 feet South and 3950 feet West of the NE corner of said Section 26. 2.4.4.1.3. Underground Spring No. 14-3952: Located in the NW 1/4 of NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 1090 feet South and 940 feet East of the NW corner of said Section 26. 2.4.4.1.4. Underground Spring No. 15-2823: Located in the NE 1/4 of NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 800 feet South and 3881 feet West of the NE corner of said Section 26. 2.4.4.1.5. Underground Spring No. 18-3269: Located in the NE 1/4 of NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 616 feet South and 3911 feet West of the NE corner of said Section 26. 2.4.4.1.6. Underground Spring No. 19-3953: Located in the NW 1/4 of NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 1100 feet South and 300 feet East of the NW Corner of said Section 26. 2.4.4.1.7. Underground Spring No. 20-3302: Located in the NE 1/4 of NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 896 feet South and 2858 feet

West of the NE corner of said Section 26. 2.4.4.1.8. Underground Spring No. 21-3954: Located in the NW 1/4 of NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 680 feet South and 280 feet East of the NW corner of said Section 26. 2.4.4.1.9. Underground Spring No. 22-3955: Located in the NE 1/4 of NE 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., at a point 870 feet South and 50 feet West of the NE corner of said Section 27. 2.4.4.1.10. Underground Spring No. 23-3956: Located in the NE 1/4 of NE 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., at a point 1175 feet South and 172 feet West of the NE corner of said Section 27. 2.4.4.1.11. Underground Spring No. 28-3414: Located in the NE 1/4 of NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 826 feet South and 2708 feet West of the NE corner of said Section 26. 2.4.4.1.12. Underground Spring No. 32-3270: Located in the NE 1/4 of NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 636 feet South and 3028 feet West of the NE corner of said Section 26. 2.4.4.1.13. Underground Spring No. 35-3303: Located in the NW 1/4 of NE 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 656 feet South and 2428 feet West of the NE corner of said Section 26. 2.4.4.1.14. Underground Spring No. 49-3475: Located in the NW 1/4 of NE 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 70 feet South and 2553 feet West of the NE corner of said Section 26. 2.4.4.1.15. Underground Spring No. 55-3889: Located in the NW 1/4 of NE 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 370 feet South and 1878 feet West of the NE corner of said Section 26. 2.4.4.1.16. Underground Spring No. 56-3888: Located in the NW 1/4 of NE 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 267 feet South and 1400 feet West of the NE corner of said Section 26. 2.4.4.1.17. Underground Spring No. 57-3890: Located in the SW 1/4 of SE 1/4 of Section 23, Township 3 South, Range 70 West of the 6th P.M., at a point 118 feet North and 1408 feet West of the SE corner of said Section 23. 2.4.4.1.18. Underground Spring No. 59-4816: Located in the SE 1/4 of SE 1/4 of Section 23, Township 3 South, Range 70 West of the 6th P.M., at a point 592 feet North and 558 feet West of the SE corner of said Section 23. 2.4.4.1.19. Underground Spring No. 68-4364: Located in the NE 1/4 of NE 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 140 feet South and 840 feet West of the NE corner of said Section 26. 2.4.4.1.20. Underground Spring No. 69-4889: Located in the SE 1/4 of SE 1/4 of Section 23, Township 3 South, Range 70 West of the 6th P.M., at a point 210 feet North and 445 feet West of the SE corner of said Section 23. 2.4.4.1.21. Underground Spring No. 70-6156: Located in the NE 1/4 of NE 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 175 feet South and 450 feet West of the NE corner of said Section 26. 2.4.4.1.22. Underground Spring No. 71-4891: Located in the SE 1/4 of SE 1/4 of Section 23, Township 3 South, Range 70 West of the 6th P.M., at a point 352 feet North and 50 feet West of the SE corner of said Section 23. 2.4.4.1.23. Underground Spring No. 72-6157: Located in the NE 1/4 of NE 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point 40 feet South and 48 feet West of the NE corner of said Section 26. 2.4.4.1.24 Underground Spring No. 73-5925: Located in the NW 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., at a point 630 feet South and 830 feet East of the NW corner of said Section 25. 2.4.4.1.25. Underground Spring No. 74-5926: Located in the NE 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., at a point 605 feet South and 3820 feet West of the NE corner of said Section 25. 2.4.4.1.26. Underground Spring No. 75-6367: Located in the NW 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., at a point 510 feet South and 220 feet East of the NW corner of said Section 25. 2.4.4.1.27. Underground Spring No. 76-6368: Located in the SE 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., at a point 1370 feet South and 3655 feet West of the NE corner of said Section 25. 2.4.4.1.28. Underground Spring No. 77-13721: Located in the NE 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., at a point 800 feet South and 3335 feet West of the NE corner of said Section 25. 2.4.4.1.29. Underground Spring No. 78-11908: Located in the NE 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., at a point 630 feet South and 2727 feet West of the NE corner of said Section 25. 2.4.4.1.30. Underground Spring No. 79-9358: Located in the NE 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., at a point 1230 feet South and 2732 feet West of the NE corner of said Section 25. 2.4.4.1.31. Underground Spring No. 80-5123: Located in the SW 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M.,

at a point 720 feet North and 1060 feet East of the SW corner of said Section 27. 2.4.4.1.32. Underground Spring No. 81-5124: Located in the SW 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., at a point 748 feet North and 982 feet East of the SW corner of said Section 27. 2.4.4.1.33. Underground Spring No. 82-5125: Located in the SW1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., at a point 1055 feet North and 820 feet East of the SW corner of said Section 27. 2.4.4.1.34. Underground Spring No. 83-5126: Located in the SW 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., at a point 1285 feet North and 795 feet East of the SW corner of said Section 27. 2.4.4.1.35. Underground Spring No. 88-11910: Located in the SE 1/4 of SW 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 1092 feet North and 3190 feet West of the SE corner of said Section 19. 2.4.4.1.36. Underground Spring No. 89-11905: Located in the SW 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 1091 feet North and 2623 feet West of the SE corner of said Section 19. 2.4.4.1.37. Underground Spring No. 90-13722: Located in the SW 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 1100 feet North and 2095 feet West of the SE corner of said Section 19. 2.4.4.1.38. Underground Spring No. 91-13723: Located in the SW 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 1050 feet North and 1555 feet West of the SE corner of said Section 19. 2.4.4.1.39. Underground Spring No. 92-11907: Located in the SE 1/4 of SW 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 485 feet North and 3780 feet West of the SE corner of said Section 19. 2.4.4.1.40. Underground Spring No. 93-11906: Located in the SE 1/4 of SW 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 475 feet North and 3180 feet West of the SE corner of said Section 19. 2.4.4.1.41. Underground Spring No. 94-11909: Located in the SW 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 480 feet North and 2579 feet West of the SE corner of said Section 19. 2.4.4.1.42. Underground Spring No. 95-11904: Located in the SW 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 300 feet North and 1978 feet West of the SE corner of said Section 19. 2.4.4.1.43. Underground Spring No. 96-13725: Located in the SW 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 300 feet North and 1373 feet West of the SE corner of said Section 19. 2.4.4.1.44. Underground Spring No. 97-13727: Located in the SE 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 950 feet North and 795 feet West of the SE corner of said Section 19. 2.4.4.1.45. Underground Spring No. 98-13728: Located in the SE 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 975 feet North and 232 feet West of the SE corner of said Section 19. 2.4.4.1.46. Underground Spring No. 99-13729: Located in the SW 1/4 of SW 1/4 of Section 20, Township 3 South, Range 69 West of the 6th P.M., at a point 950 feet North and 370 feet East of the SW corner of said Section 20. 2.4.4.1.47. Underground Spring No. 100-13724: Located in the SW 1/4 of SW 1/4 of Section 20, Township 3 South, Range 69 West of the 6th P.M., at a point 710 feet North and 950 feet East of the SW corner of said Section 20. 2.4.4.2. Underground Springs in Consolidated Case Nos. W-8036(75) and W-8256(76) were decreed on April 15, 1977 with a priority date of May 30, 1976. The underground springs described below are decreed for domestic, commercial, industrial, municipal and fire protection purposes. All the below described springs are located in Jefferson County, Colorado. 2.4.4.2.1 Underground Spring No. 101: Located in the NE 1/4 of NW 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M. at a point 3270 feet west of the east line and 30 feet south of the north line of said Section 30. 2.4.4.2.2 Underground Spring No. 102: Located in the SW 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 2620 feet West of the East line and 30 feet North of the South line of said Section 19. 2.4.4.2.3 Underground Spring No. 103: Located in the NE 1/4 of NW 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., at a point 3770 feet West of the East line and 20 feet South of the North line of said Section 30. 2.4.4.2.4 Underground Spring No. 115: Located in the SE 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 720 feet west of the east line and 460 feet north of the south line of said Section 19. 2.4.4.2.5 Underground Spring No. 116: Located in the SE 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M. at a point 250 feet west of the east line and 60 feet north of the south line of said Section 19. 2.4.4.2.6 Underground Spring No. 117: Located in the NW 1/4 of NW 1/4 of Section 29, Township 3 South, Range 69 West of the 6th

P.M. at a point 200 feet east of the west line and 410 feet south of the north line of said Section 29. 2.4.4.2.7 Underground Spring No. 118: Located in the NW 1/4 of NW 1/4 of Section 29, Township 3 South, Range 69 West of the 6th P.M. at a point 550 feet east of the west line and 780 feet south of the north line of said Section 29. 2.4.4.2.8 Underground Spring No. 120: Located in the SW 1/4 of SW 1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M. at a point 600 feet east of the west line and 500 feet north of the south line of said Section 24. 2.4.4.2.9 Underground Spring No. 121: Located in the SW 1/4 of SW 1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M. at a point 1200 feet east of the west line and 530 feet north of the south line of said Section 24. 2.4.4.2.10 Underground Spring No. 122: Located in the SE 1/4 of SW 1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M. at a point 1810 feet east of the west line and 580 feet north of the south line of said Section 24. 2.4.4.2.11 Underground Spring No. 123: Located in the SE 1/4 of SW 1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M. at a point 2480 feet east of the west line and 620 feet north of the south line of said Section 24. 2.4.4.2.12 Underground Spring No. 124: Located in the NW 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M. at a point 650 feet east of the west line and 110 feet south of the north line of said Section 25. 2.4.4.2.13 Underground Spring No. 125: Located in the NW 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M. at a point 1280 feet east of the west line and 90 feet south of the north line of said Section 25. 2.4.4.2.14 Underground Spring No. 126: Located in the NE 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M. at a point 1890 feet east of the west line and 110 feet south of the north line of said Section 25. 2.4.4.2.15 Underground Spring No. 127: Located in the SE 1/4 of SW 1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M. at a point 2500 feet east of the west line and 20 feet north of the south line of said Section 24. 2.4.4.2.16 Underground Spring No. 133: Located in the NE 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3100 feet west of the east line and 2830 feet south of the north line of said Section 27. 2.4.4.2.17 Underground Spring No. 134: Located in the NE 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3300 feet west of the east line and 3070 feet south of the north line of said Section 27. 2.4.4.2.18 Underground Spring No. 135: Located in the NE 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3350 feet west of the east line and 2860 feet south of the north line of said Section 27. 2.4.4.2.19 Underground Spring No. 136: Located in the SE 1/4 of NW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3270 feet west of the east line and 2620 feet south of the north line of said Section 27. 2.4.4.2.20 Underground Spring No. 1: Located in the NE 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3300 feet west of the east line and 3090 feet south of the north line of said Section 27. 2.4.4.2.21 Underground Spring No. 2: Located in the NE 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3320 feet west of the east line and 3120 feet south of the north line of said Section 27. 2.4.4.2.22 Underground Spring No. 9: Located in the SE 1/4 of NW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3050 feet west of the east line and 2380 feet south of the north line of said Section 27. 2.4.4.3. The following underground springs were decreed in Case No. 90CW064, which was entered as a Decree of the Court on September 30, 1999, and made alternate points of diversion for certain of the underground springs described above, as decreed in Case Nos. W-7809, W-8036(75) and W-8256(76). 2.4.4.3.1 Underground Spring No. 148: Located in the NW 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., at a point 380 feet South of the North section line and 460 feet East of the West section line of said Section 25. 2.4.4.3.2 Underground Spring No. 149: Located in the NW 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., at a point 380 feet South of the North section line and 1015 feet East of the West section line of said Section 25. 2.4.4.3.3 Underground Spring No. 150: Located in the NW 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., at a point 500 feet South of the North section line and 1315 feet East of the West section line of said Section 25. 2.4.4.3.4 Underground Spring No. 151: Located in the NE 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., at a point 380 feet South of the North section line and 1695 feet East of the West section line of said Section 25. 2.4.4.3.5 Underground Spring No. 152: Located in the SE 1/4 of SW 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 880 feet North of the South section line and

1605 feet East of the West section line of said Section 19. 2.4.4.3.6 Underground Spring No. 153: Located in the SE 1/4 of SW 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 1060 feet North of the South section line and 2460 feet East of the West section line of said Section 19. 2.4.4.3.7 Underground Spring No. 154: Located in the SW 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 1060 feet North of the South section line and 2280 feet West of the East section line of said Section 19. 2.4.4.3.8 Underground Spring No. 155: Located in the SW 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 1060 feet North of the South section line and 1780 feet West of the East section line of said Section 19. 2.4.4.3.9 Underground Spring No. 156: Located in the SW 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 850 feet North of the South section line and 1380 feet West of the East section line of said Section 19. 2.4.4.3.10 Underground Spring No. 157: Located in the SE 1/4 of SW 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 180 feet North of the South section line and 1455 feet East of the West section line of said Section 19. 2.4.4.3.11 Underground Spring No. 158: Located in the SE 1/4 of SW 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 470 feet North of the South section line and 1855 feet East of the West section line of said Section 19. 2.4.4.3.12 Underground Spring No. 159: Located in the SE 1/4 of SW 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 470 feet North of the South section line and 2460 feet East of the West section line of said Section 19. 2.4.4.3.13 Underground Spring No. 160: Located in the SW 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 450 feet North of the South section line and 1380 feet West of the East section line of said Section 19. 2.4.4.3.14 Underground Spring No. 162: Located in the NE 1/4 of NW 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., at a point 172 feet South of the North section line and 2493 feet East of the West section line of said Section 30. 2.4.4.3.15 Underground Spring No. 165: Located in the NW 1/4 of NE 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., at a point 485 feet South of the North section line and 2590 feet West of the East section line of said Section 30. 2.4.4.3.16 Underground Spring No. 166: Located in the NW 1/4 of NE 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., at a point 485 feet South of the North section line and 2183 feet West of the East section line of said Section 30. 2.4.4.3.17 Underground Spring No. 167: Located in the NW 1/4 of NE 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., at a point 485 feet South of the North section line and 1789 feet West of the East section line of said Section 30. 2.4.4.3.18 Underground Spring No. 168: Located in the NW 1/4 of NE 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., at a point 485 feet South of the North section line and 1400 feet West of the East section line of said Section 30. 2.4.4.3.19 Underground Spring No. 169: Located in the NE 1/4 of NE 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., at a point 190 feet South of the North section line and 1260 feet West of the East section line of said Section 30. 2.4.4.3.20 Underground Spring No. 110: Located in the NE 1/4 of the NW 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., at a point 210 feet South of the North section line and 1997 feet East of the West section line of said Section 30. 2.4.5. Jefferson Storage System: The Jefferson Storage System, decreed in Case No. W-152 on July 23, 1971, as modified by Case No. 88CW206 on December 30, 1993 and Case No. 18CW3225 on February 25, 2021, is a series of reservoirs located near Coors's industrial facility in the Clear Creek Basin near Golden, Colorado. Frost and Waldorf Reservoirs and the West Gravel Lakes (as alternate places of storage for Frost and Waldorf Reservoirs) are part of the Jefferson Storage System as described in this subparagraph, yet are located outside of the exchange reach, and are not part of this appropriative right of exchange. The decreed uses are for: irrigation, domestic, mechanical, manufacturing, generation of power, power generally, fire protection, sewage treatment, street sprinkling, watering of parks, trees, lawns and grounds, recreation, golf club, storage reserves, replacement, adjustments and regulation of the Jefferson Storage System with other uses, and ground water storage and recharge, and water exchange. Below are the names of structures and the decreed locations of reservoirs. 2.4.5.1. Clinton Reservoir: Located in the SE 1/4 of the SW 1/4 of Section 24 and in the NE 1/4 of the NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SW Corner of Section 24, Township 3 South, Range 70 West of the 6th P.M. bears South 0° East, 700 feet. 2.4.5.2.

Crawford Reservoir: Located in the SW 1/4 of the SW 1/4 of Section 24 and in the NW 1/4 of the NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SW corner of said Section 24, Township 3 South, Range 70 West of the 6th P.M. bears South 0° West, 700 feet. 2.4.5.3. Wanemaker (Wannamaker) Reservoir: Located in the SE 1/4 of the SE 1/4 of Section 23 and in the NE 1/4 of the NE 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SE corner of said Section 23, Township 3 South, Range 70 West of the 6th P.M. bears North 90° East, 1,300 feet. 2.4.5.4. Hawley Reservoir: Located in the E 1/2 of the NW 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SW corner of said Section 19, Township 3 South, Range 69 West of the 6th P.M. bears South 0° West, 1,100 feet; or through the Rocky Mountain Ditch, described in paragraph 2.4.6.3, below. 2.4.5.5. Lee Reservoir: Located in the W 1/2 of the NE 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SW corner of said Section 19, Township 3 South, Range 69 West of the 6th P.M. bears South 0° West, 1,100 feet; or through the Rocky Mountain Ditch, described in paragraph 2.4.6.3, below. 2.4.5.6. Summers Reservoir: Located in the SE 1/4 of the SW 1/4 of Section 19, and in the NE 1/4 of the NW 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SW corner of said Section 19, Township 3 South, Range 69 West of the 6th P.M. bears South 0° West, 1,100 feet; or through the Rocky Mountain Ditch, described in paragraph 2.4.6.3, below. 2.4.5.7. Eskins Reservoir: Located in the SW 1/4 of the SE 1/4 of Section 19, and in the NW 1/4 of the NE 1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the S 1/4 corner of said Section 19, Township 3 South, Range 69 West of the 6th P.M. bears S 0° East, 1,300 feet; or through the Rocky Mountain Ditch, described in paragraph 2.4.6.3, below. 2.4.5.8. Pearson Reservoir No. 1: Located NE 1/4 of the NE 1/4 of Section 30 and in the SE 1/4 of the SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the Pearson Ditch at a point whence the corner common to Sections 19, 20, 29 and 30, Township 3 South, Range 69 West of the 6th P.M. bears N 77° East, 1,310 feet. 2.4.5.9. Pearson Reservoir No. 1 Enlargement: Located in the SE 1/4 of the SE 1/4 of Section 19, and in the NE 1/4 of the NE 1/4 of Section 30, and in the NW 1/4 of the NW 1/4 of Section 29, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SW corner of said Section 19, Township 3 South, Range 69 West of the 6th P.M. bears South 64° West, 2,800 feet. 2.4.5.10. B-2 Lake: Located on a parcel of land in the SW 1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M., Jefferson County, Colorado. Point of diversion of the structure used to fill the Reservoir is the Wannamaker Ditch, as described in paragraph 2.4.2.1, above. 2.4.5.11. B-3 Lake: Located on a parcel of land in the NW 1/4 of Section 30 and in the SW 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., Jefferson County, Colorado. Points of diversions of the structure used to fill the Reservoir: 2.4.5.11.1. On the right bank of Clear Creek at a point whence the South 1/4 corner of Section 24, Township 3 South, Range 70 West of the 6th P.M., Jefferson County, Colorado, bears S 0° E., 900 feet. 2.4.5.11.2. On the right bank of Clear Creek at a point whence the SE corner of Section 24, Township 3 South, Range 70 West of the 6th P.M., Jefferson County, Colorado, bears S 60° E., 1900 feet. 2.4.5.11.3. On the South side of Clear Creek which is on the South side of the diversion dam common to the Croke Canal and the Rocky Mountain Ditch in the NE 1/4 NE 1/4 NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., Jefferson County, Colorado, and which bears South 18°12' 25" West a distance of 401.11 feet from the North 1/4 corner of said Section 26. 2.4.5.11.4. On the Miles & Eskins Drainage, Seepage and Waste Water Ditch at a point whence the NW corner of Section 30, Township 3 South, Range 69 West of the 6th P.M., Jefferson County, Colorado, bears N 18° 46' West 1,621 feet. 2.4.5.12. B-4 Lake: Located on a parcel of land in the NE 1/4 of Section 25, and in the SE 1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M.,

in Jefferson County, Colorado, and more particularly described as follows: Commencing at the NE corner of said Section 25 which point is also the Point of Beginning; thence S 00° 09’ 02” W along the East line of said Section 25 for a distance of 2294.00 feet; thence N 87° 57’ 37” W for a distance of 2618.35 feet to the Easterly right-of-way of McIntyre Street; thence N 00° 01’ 20” E along said right-of-way for a distance of 2,065.10 feet; thence S 89° 43’ 46” E for a distance of 920.81 feet; thence N 56° 12’ 36” E for a distance of 1379.95 feet; thence N 79° 51’ 11” E for a distance of 563.94 feet to the East line of the SE 1/4 of said Section 24; thence S 00° 04’ 01” W along said line for a distance of 726.75 feet to the Point of Beginning, containing 147.26 acres more or less. Points of diversion: Are the same as those described in paragraphs 2.4.5.11.1 – 2.4.5.11.4, above. 2.4.5.13. B-5 East Lake: Located on a parcel of land in the SW 1/4 of Section 20, and in the NW 1/4 of Section 29, and in the NE 1/4 of Section 30, and in the SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado, and more particularly described as follows: Beginning at the NE corner of said parcel from whence the SW corner of said Section bears S 44°54’15” W for a distance of 1411.34 feet; thence S 00°29'44" E along the Westerly right-of-way of Colorado Interstate 70 for a distance of 1587.97 feet; thence S 41°42’18” W to a point on the Northeasterly right-of-way of the Denver Water Board for a distance of 354.31 feet; thence N 48°17'42" W along the Northeasterly right-of-way for a distance of 2671.15 feet; thence S 89°53'13" E for a distance of 333.32 feet; thence N 65°11'47" E for a distance of 177.70 feet; thence S 89°26'41" E to the East line of the SE 1/4 of the SE 1/4 of said Section 19 for a distance of 731.27 feet; thence N 89°31'56" E for a distance of 990.00 feet to the Point of Beginning, containing 52.28 acres more or less. Points of diversions of the structure used to fill the Reservoir: 2.4.5.13.1. On the right bank of Clear Creek at a point whence the SW corner of Section 19, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado, bears S 64° W, 2800 feet. 2.4.5.13.2. On the Pearson Ditch at a point whence the corner common to Sections 19, 20, 29, and 30, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado, bears N 77°E, 1310 feet. 2.4.5.13.3. The Rocky Mountain Ditch, described in paragraph 2.4.6.3, below. 2.4.5.14. B-6 Lake: Located on a parcel of land in the NE 1/4 and the SE 1/4 of Section 23, Township 3 South, Range 70 West of the 6th P.M., Jefferson County, Colorado, and more particularly described as follows: Beginning at a point on the Southeasterly corner of said parcel and the Northerly right-of-way of the Burlington Northern Railroad from whence the East 1/4 corner of said Section 23 bears N 08°03’04” E for a distance of 947.43 feet; thence S 59°44’42” W along said Northerly railroad right-of-way for a distance of 1044.52 feet to a point of intersection of the Northerly right-of-way of West 44th Avenue; thence S 73°54’56” W along said right-of-way for a distance of 177.45 feet to the intersection on the Easterly right-of-way of Salvia Street; thence N 01°51’49” E for a distance of 243.86 feet to a point of intersection on the Southeasterly right-of-way of the Farmers High Line Canal; thence N 42°32’36” E along said Canal-for a distance of 69.81 feet to a point of curve; thence on a curve to the left which curve has a central angle of 81°56’00” a radius of 408.20 and an arc length of 134.86 feet to a point of tangent; thence N 23°36’37” E along said Canal right-of-way for a distance of 347.63 feet to a point of curve to the left which curve has a central angle of 19°30’40” a radius of 360.66 feet and an arc length of 122.79 feet to a point of tangent; thence N 04°05’57” E along said Canal right-of-way for a distance of 344.40 feet to a point of curve to the right which curve has a central angle of 05°02’00” a radius of 1067.53 feet and an arc length of 93.75 feet to a point of tangent; thence N 09°07’56” E along said Canal right-of-way for a distance of 231.32 feet to a point of curve which curve has a central angle of 24°11'37" a radius of 316.61 feet and an arc length of 133.67 feet to a point of tangent; thence N 33°19’34” E along said Canal right-of-way for a distance of 164.26 feet to a point of curve which curve has a central angle of 14°49’45” a radius of 316.07 feet and an arc length of 81.79 feet to the point of tangent; thence N 48°09’19” E along said Canal right-of-way for a distance of 517.59 feet; thence S 27°26’14” E for a distance of 623.40 feet; thence S 00°00’00” E for a distance of 964.32 feet to the Point of Beginning, containing 34.48 acres more or less. Point of diversion: Through the Wannamaker Ditch at a point described in paragraph 2.4.2.1., above. 2.4.5.15. B-7 Lake: Located on a parcel of land in the SW 1/4 of Section 24 and in the SE 1/4 of Section 23, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado, and more particularly described as follows: Beginning at the Northwesterly corner of said parcel which is on the Southerly right-of-way of 44th Avenue, from whence the Southeast corner of said Section 23 bears S 14°28’29” E a distance of 1418.70 feet; thence

S 28°21’00” E for a distance of 225.71 feet to a point on the Northerly right-of-way of the Croke Canal to a point of curve to the right which curve has a central angle of 05°17’53” a radius of 974.12 feet and an arc length of 90.08 feet to a point of reverse curve to the left which curve has a central angle of 06°15’17” a radius of 1392.30 feet and an arc length of 147.94 feet to a point on the East line of said Section 23; thence N 02°51’17” W for a distance of 10.00 feet to a point of curve to the left which curve has a central angle of 03°54’43” a radius of 1382.37 feet and an arc length of 94.38 feet to a point of compound curve to the left which curve has a central angle of 15°45’00” a radius of 768.45 feet and an arc length of 211.24 feet to a point of reverse curve; thence continuing along said Canal right-of-way on said reverse curve to the right which curve has a central angle of 11°40’00” a radius of 909.42 feet and an arc length of 185.18 feet to a point of tangent; thence continuing on said Canal right-of-way N 79°09'00" E for a distance of 545.77 feet to a point of curve to the left which curve has a central angle of 46°30’24” a radius of 514.36 feet and an arc length of 417.50 feet to a point of tangent; thence N 32°38’36” E for a distance of 718.13 to a point on the Southerly right-of-way of West 44th Avenue; thence along said 44th Avenue right-of-way S 69°45’00” W for a distance of 772.28 feet; thence continuing on said right-of-way N 20°15’00” W for a distance of 20.00 feet; thence S 69°45’00” W for a distance of 355.03 feet to the Easterly property line of Public Service Company property; thence along said property S 20°15’00” E for a distance of 259.72 feet; thence continuing along said property S 69°45’00” W for a distance of 294.26 feet; thence continuing along said property N 27°25’00” W for a distance of 261.76 feet to the Southerly right-of-way of West 44th Avenue; thence along said right-of-way S 69°45’00” W for a distance of 308.56 feet; thence continuing along said right-of-way S 38°14’36” E for a distance of 27.46 feet to a point of curve to the left which curve has a central angle of 04°58’00” a radius of 1919.57 feet and an arc length of 166.41 feet to a point of tangent; thence continuing along said right-of-way S 59°44’00” W for a distance of 344.28 feet to the Point of Beginning, containing 18.25 acres more or less. Point of diversion: Through the Wannamaker Ditch at a point described in paragraph 2.4.2.1., above. 2.4.5.16. B-9 Lake: Alternate place of storage for the Frost and Waldorf Rights. (From 88CW206). Located on a parcel in the N 1/2 SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado, lying South of Highway 58; East of the Denver Water Board R.O.W.; and North of Clear Creek. Points of Diversions of the structure used to fill the Reservoir: 2.4.5.16.1. On the North side of Clear Creek in the NW 1/4 SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado, at a point which is approximately 1700 feet from the East section line and 1400 feet from the South section line of said Section 19. 2.4.5.16.2. Through the Slough Ditch at a point on the North bank of Clear Creek in the NW 1/4 SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado, at a point which is approximately 2400 feet from the East section line and 1320 feet from the South section line of said Section 19. 2.4.5.16.3. Through the Reno and Juchem Ditch at a point on the North bank of Clear Creek in the SE 1/4 SW 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado, at a point approximately 1320 feet from the West section line and 1250 feet from the South section line of said Section 19. 2.4.5.17. West Lake: Located on a parcel of land in the South 1/2 of Section 20 and the North 1/2 of Section 30, Township 3 South, Range 69 West of the 6th P.M., Jefferson County, Colorado, and more particularly described as follows: Beginning at a point whence the S ¼ corner of said Section 20 bears S 66°33’50” E for a distance of 269.53 feet; thence S 64°29’14” W for a distance of 616.53 feet to a point on the Wheatridge Greenbelt Lease Line; thence N 00°51’09” W along said Lease Line for a distance of 1741.97 feet; thence N 77°15’36” E for a distance of 48.75 feet; thence N 64°33’16” E for a distance of 75.03 feet; thence N 61°42’11” E for a distance of 231.53 feet; thence N 66°11’47” E for a distance of 170.34 feet; thence N 68°16’03” E for a distance of 81.95 feet; thence N 75°41’01” E for a distance of 106.98 feet; thence N 81°43’17” E for a distance of 133.28 feet; thence N 89°17’40” E for a distance of 121.73 feet; thence S 81°21’39”E for a distance of 238.19 feet; thence along a curve to the right which curve has a central angle of 75°10’02” a radius of 193.61 feet and an arc length of 254.00 feet to a point of tangent; thence S 01°22'40"W for a distance of 47.08 feet; thence N 85°19'46"E for a distance of 286.64 feet; thence S 71°20'44" E for a distance of 32.45 feet; thence S 87°08'26" E for a distance of 34.66 feet; thence N 89°01'29"E for a distance of 131.24 feet; thence N 83°04'26" E for a distance of 84.59 feet; thence S 85°03'23" E for a distance of 105.15 feet; thence S 76°32'17" E for a distance of 147.73 feet;

thence S 70°37'40"E for a distance of 27.85 feet; thence S 48°02'50"E for a distance of 22.33 feet; thence S 27°44'13" E for a distance of 43.26 feet to the East line of the West 1/2 of the Southeast 1/4 of said Section 20; thence S 00°07'43"E along said Section line for a distance of 611.14 feet; thence S 84°54'43"W for a distance of 35.00 feet to a point on the Wheatridge Greenbelt Lease Line; thence S 43°29'10"W along said Lease Line for a distance of 358.76 feet; thence S 86°27'46" W for a distance of 558.63 feet; thence S 68°07'07" W for a distance of 618.11 feet; thence S 68°07'06" W for a distance of 87.22 feet; thence S 58°51'52" W for a distance of 193.77 feet; thence S 00°04'29"W for a distance of 180.00 feet to the Point of Beginning, containing 64.06 acres more or less. Point of diversion: At a point on the South side of Clear Creek in the SW 1/4 of Section 20, Township 3 South Range 69 West of the 6th P.M., in Jefferson County, Colorado, whence the South 1/4 corner of said Section 20, bears S 1° E., 1920 feet. 2.4.5.18. Bass Lake: Located on a parcel of land in the South 1/2 of Section 20 and the North 1/2 of Section 30, Township 3 South, Range 69 West of the 6th P.M., Jefferson County, Colorado, and more particularly described as follows: Beginning at a point whence the South 1/4 corner of said Section 20 bears S 66°33'50" E for a distance of 269.53 feet; thence S 64°29'14" W for a distance of 616.53 feet to a point on the Wheatridge Greenbelt Lease Line; thence N 00°51'09" W along said Lease Line for a distance of 1741.97 feet; thence N 77°15'36" E for a distance of 48.75 feet; thence N 64°33'16" E for a distance of 75.03 feet; thence N 61°42'11"E for a distance of 231.53 feet; thence N 66°11'47" E for a distance of 170.34 feet; thence N 68°16'03" E for a distance of 81.95 feet; thence N 75°41'01" E for a distance of 106.98 feet; thence N 81°43'17"E for a distance of 133.28 feet; thence N 89°17'40" E for a distance of 121.73 feet; thence S 81°21'39"E for a distance of 238.19 feet; thence along a curve to the right which curve has a central angle of 75°10'02" a radius of 193.61 feet and an arc length of 254.00 feet to a point of tangent; thence S 01°22'40"W for a distance of 47.08 feet; thence N 85°19'46"E for a distance of 286.64 feet; thence S 71°20'44" E for a distance of 32.45 feet; thence S 87°08'26" E for a distance of 34.66 feet; thence N 89°01'29"E for a distance of 131.24 feet; thence N 83°04'26" E for a distance of 84.59 feet; thence S 85°03'23" E for a distance of 105.15 feet; thence S 76°32'17" E for a distance of 147.73 feet; thence S 70°37'40"E for a distance of 27.85 feet; thence S 48°02'50"E for a distance of 22.33 feet; thence S 27°44'13" E for a distance of 43.26 feet to the East line of the West 1/2 of the SE 1/4 of said Section 20; thence S 00°07'43"E along said Section line for a distance of 611.14 feet; thence S 84°54'43"W for a distance of 35.00 feet to a point on the Wheatridge Greenbelt Lease Line; thence S 43°29'10"W along said Lease Line for a distance of 358.76 feet; thence S 86°27'46" W for a distance of 558.63 feet; thence S 68°07'07" W for a distance of 618.11 feet; thence S 68°07'06" W for a distance of 87.22 feet; thence S 58°51'52" W for a distance of 193.77 feet; thence S 00°04'29"W for a distance of 180.00 feet to the Point of Beginning, containing 64.06 acres more or less. Point of diversion: At a point on the South side of Clear Creek in the SE 1/4 of Section 20, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado, whence the South 1/4 corner of said Section 20, bears S. 30°W., 1880 feet. 2.4.5.19. Tabor Lake: Located on a parcel of land in the East 1/2 of Section 20, Township 3 South, Range 69 West of the 6th P.M., Jefferson County, Colorado, and more particularly described as follows: Beginning at a point on the East-West Center Line of said Section 20 from whence the East 1/4 corner of said Section 20 bears N 89°37'13" E for a distance of 836.84 feet; thence S 00°10'30" E for a distance of 132.00 feet; thence N 89°21'26"E for a distance of 165.00 feet; thence S 00°01'30"E for a distance of 803.67 feet; thence N 84°49'19" W for a distance of 1432.87 feet; thence N 00°02'08" W for a distance of 790.37 feet; thence N 89°21'26" E for a distance of 306.90 feet; thence N 00°02'40" W for a distance of 238.36 feet; thence N 89°38'20" E for a distance of 325.18 feet; thence N 00°06'13" W for a distance of 58.89 feet; thence N 89°21'26"E for a distance of 469.74 feet; thence S 00°09'28" E for a distance of 295.65 feet; thence N 89°21'25" E for a distance of 157.38 feet to the Point of Beginning, containing 26 acres more or less. Point of diversion: Through the Slough Ditch at a point described in paragraph 2.4.5.16.2, above. 2.4.5.20. Prospect Park Lake: Located on a parcel of land in the W 1/2 of Section 21, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado and more particularly described as follows: Beginning at the SW corner of said parcel which point is on the West Line of the SW 1/4 of said Section 21 from whence the W 1/4 corner of said Section bears N 00°13'17" W for a distance of 666.42 feet; thence continuing along said West line of the NW ¼ of said Section 21 for a distance of 213.93 feet; thence N

89°19'08" E for a distance of 821.7 feet; thence S 00°20'57" E for a distance of 881.80 feet; thence S 89°25'14" W for a distance of 823.61 feet to the Point of Beginning, containing 10 acres more or less. Point of diversion of the structure used to fill the Reservoir: Through the Slough Ditch at a point described in paragraph 2.4.5.16.2, above. 2.4.6. Coors Industries Ditch: Originally decreed in Case No. W-224 as amended by Case No. W-7585. Point of diversion is located on the Southern bank of Clear Creek at a point which is South 25°6'12" East, 1525.92 feet from the NW corner of the SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., Jefferson County, Colorado. Alternate points of diversion for the Coors Industries Ditch as decreed in Case No. W-7585: 2.4.6.1 Coors Cooling Water Intake. Point of diversion located at a point on the South bank of Clear Creek in the SW 1/4 of Section 27, Township 3 South, Range 70 West, which bears South 32°59'17" East 1620.67 feet from the NW corner of the SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., Jefferson County, Colorado. 2.4.6.2 The Wannamaker Ditch with a point of diversion as described above in paragraph 2.4.2.1. 2.4.6.3 The Rocky Mountain Ditch. The point of diversion is located on the South side of the Croke Dam in the NE 1/4 NE 1/4 NW 1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point on the South side of Clear Creek which bears South 18°12'25" West, a distance of 401.11 feet from the N 1/4 corner of said Section 26, Jefferson County, Colorado. 2.4.6.4 Coors Industries Ditch Alternate Point of Diversion #3. Point of diversion at a headgate in the SE 1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M., located at a point on the South bank of Clear Creek whence the S 1/4 corner of Section 24, Township 3 South, Range 70 West of the 6th P.M. bears South 47°51'47" W, a distance of 1375.04 feet, in Jefferson County, Colorado. 2.4.7 Discharge Points from the Coors Industrial Complex: 2.4.7.1. Cooling Water Pumped Return Above Cooling Water Inlet: A point lying in the SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado, and more particularly described as lying S 32°28'54" East, 1622.56 feet from the W 1/4 corner of said section. 2.4.7.2. Cooling Water Pumped Return Below Cooling Water Inlet: A point lying in the SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado, and more particularly described as lying S 33°37'49" E, 1609.50 feet from the W 1/4 corner of said section. 2.4.7.3 Pond Overflow Cooling Water Return: A point lying in the SW ¼ of Section 27, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado, and more particularly described as lying S 71°21'56" E, 1890.89 feet from the W 1/4 corner of said section. 2.4.7.4. Hot Well #1 Cooling Water Return: A point lying in the SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado, and more particularly described as lying S 81°17'01" E, 2094.53 feet from the W 1/4 corner of said section. 2.4.7.5 Hot Well #2 Cooling Water Return: A point lying in the SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado, and more particularly described as lying S 75°00'09" E, 1944.76 feet from the W 1/4 corner of said section. 2.4.7.6 South Loop Cooling Water Return: A point lying in the NE 1/4 of Section 27, Township 3 South, Range 70 West, of the 6th P.M., in Jefferson County, Colorado, more particularly described as lying N 84°15'31" E, 2791.31 feet from the W 1/4 corner of said section. 2.4.7.7. Cooling Water Screen Backwash: At a point on the South bank of Clear Creek in Section 27, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado, more particularly described as lying S 39°38'50" E, 1611.0 feet from the W 1/4 corner of said Section 27. 2.4.7.8. Sewage Disposal Plant Outfall: At a point on the North bank of Clear Creek in Section 24, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado. 2.4.7.9. Water Treatment Plant Backwash: At a point on the South bank of Clear Creek in Section 24, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado, more particularly described as lying N 23°24'49" West, 1112.61 feet from the SE corner of said Section 24. 2.5 Source: Clear Creek, a tributary of the South Platte River. The source of exchange water is water from Clear Creek that may be stored or is divertible in the exercise of the water rights changed by Decree in Case No. 89CW234. 2.6 Appropriation Date: December 29, 1989. 2.7 Priority Date: December 29, 1989. 2.8 Decreed Uses: Agricultural and mechanical purposes, including drinking water, sanitation, fire protection purposes, cooling, manufacturing and normal urban usage, purposes, exchange and augmentation purposes. 3. Amounts: Coors may divert by exchange an annual maximum of 1,500 acre-feet during the non-Croke season (March 21 through November 10) at a maximum rate of 13.2 c.f.s. During the Croke season (November 11 through March 20), Coors may only exchange water after

2,836 acre-feet of its Croke by-pass water has been stored under the terms of the "Cosmic" Decree in Case No. 88CW268. 7.15 c.f.s. of the decreed amount was made absolute in Case No. 06CW83, leaving 6.05 c.f.s. conditional from the originally decreed 13.2 c.f.s. The 6.05 c.f.s. conditional right is the subject of this application. 4. Use: For all of the purposes for which water may lawfully be used through the structures to which the exchanges are made. 5. Reasonable Diligence in Development of Conditional Appropriative Right of Exchange: In support of this Application for Finding of Reasonable Diligence, during this diligence period from October 2020 through October 2026, in continuing the development of the conditional appropriative right of exchange for use in its unified system, Coors has been engaged in the use, construction and completion of some of the diversion facilities, storage facilities, and water rights involved. In addition, Coors has been engaged in the legal defense and protection of said water rights, and has continued in the planning, designing and exploration of the physical and business arrangements associated with the construction and use of the water rights and facilities involved. Work done during the diligence period toward completion and exercise of the appropriative rights of exchange, and application of water to a beneficial use as conditionally decreed, include the following activities: 5.1 Diligence activities directly related to development of the conditional Augmentation Plan II appropriative right of exchange in this application include: 5.1.1 Coors has exercised, operated and administered its decreed Plans for Augmentation and Exchange, but the exchange in operation of Coors Augmentation Plan II has not exceeded the amounts previously decreed absolute in Case No. 06CW83. The Plan for Augmentation, including exchange, decreed in Case No. 89CW234 is operated and administered in conjunction with Coors's decreed Augmentation Plan I (Case Nos. W-8036(75), W-8256(76) and 88CW271), Augmentation Plan III (Case No. 99CW236), Augmentation Plan IV (Case No. 17CW3177), and consistent with the decree in Case No. 89CW234. 5.1.2 During the diligence period, Coors has made substantial refinements to its accounting for its Augmentation Plans and exchanges decreed in the above-described cases, in coordination with the Division Engineer's Office. Coors believes that its revised accounting will improve the basis for the operation of the exchange at issue in this application, in accordance with the decree in Case No. 89CW234. 5.2 Unified System Activities: The appropriative rights of exchange in this Application are integral features in Coors's unified water system developed by Coors for beverage and food production, malting, irrigation, domestic and other commercial and industrial uses, as this Court found in Case No. 06CW83. Other components of the unified water system include the Straight Creek Tunnel Drainage and Effluent System (Case Nos. W-1665 in Water Division No. 5 and W-7097 in Water Division No. 1); Jefferson Storage System (Case Nos. W-152 and 88CW206; realignment of certain Jefferson Storage System reservoirs pending in Case No. 18CW3225); Coors Golden Milling Right (Civil Action No. B-9675, Jefferson County District Court); Coors's Underground Springs (Case Nos. W-7809-74, 90CW064 and 95CW081) and Augmentation Plan Springs (Case No. 81CW110); Idaho Springs Reservoir (Case No. 84CW671); the nontributary wells that are the subject of Case No. 85CW051; Coors Industries Ditch (Case Nos. W-224 and W-7585); the Coors Augmentation Plans I, III, and IV decreed in Case Nos. W-8036(75), W-8256(76), 88CW271, 99CW236 and 17CW3177; the Cosmic Decree (Case No. 88CW271), and related exchanges decreed in Case Nos. 88CW268, 88CW272 and 96CW1117 (all cases are decrees entered in Water Division No. 1, except where otherwise noted); as well as a complete water treatment, cooling, and distribution system at the plant site in Golden, Colorado. As described below, Coors and its affiliated entities, including Molson Coors Beverage Company, MillerCoors LLC, and Rocky Mountain Water Company, have expended substantial effort in the development of Coors's overall unified system of which the rights identified in this Application are integral components. During this diligence period, Coors has continued the development of the unified water supply system of which the exchanges that are the subject of this Application are an integral part. This Court has determined that continued development and maintenance of Coors's unified water system constitutes diligence for the individual water rights associated with that system as found by this Court. See, e.g., Decree in Case No. 13CW3112 at page 28, ¶ 9.2 (May 16, 2014). Coors has also been engaged in the legal defense and protection of said water rights and has continued in the planning, design, and exploration of the physical and business problems associated with the construction and use of the diversion facilities and water rights involved. During this diligence period, Coors and its affiliates, including MillerCoors, have undertaken the following activities

and expended at least $3,000,000 for the development and maintenance of Coors's unified water supply system: 5.2.1 Expenditures in excess of $369,000 for contractual obligations under the Cosmic Agreement and related agreements; 5.2.2 Coors' activities related to the Jefferson Storage System, including: (1) storage of water in the Jefferson Storage System; (2) completion of Case No. 18CW3225, involving changes of conditional storage locations to reflect a realignment of structures for future construction, and an alternate point of diversion for conditional water storage rights for multiple reservoirs in the Jefferson Storage System; and (3) negotiation of lease of reservoir water surface for several reservoirs in the Jefferson Storage System for floating photovoltaic panels and power generation; 5.2.3 Operation of deliveries and exchanges of water pursuant to Case No. 96CW1117 to the extent water has been available for such deliveries and exchanges; 5.2.4 Engineering costs in excess of $245,000 relating to Coors's water rights and water supply system; 5.2.5 Expenditures in excess of $600,000 for ditch companies supporting Coors's unified water system; 5.2.6 Expenditures of approximately $500,000 for pump installation and replacement, operation, maintenance, and repairs to Coors's underground springs; and 5.2.7 Expenditures in excess of $1,300,000 on other capital projects in support of Coors's unified water system. 5.3 During the diligence period, Coors and its affiliates have incurred significant legal expenses in furtherance of the unified system and its water rights. Since October 2020, Coors has participated in a number of water cases adjudicating matters required for the production of water used in Coors's unified water system, including but not limited to following cases: 5.3.1 Case No. 18CW3225 (Jefferson Storage System realignment); 5.3.2 Case No. 19CW3037 (diligence and making conditional rights absolute on Jefferson Storage System); 5.3.3 Case No. 20CW3060 (diligence on Underground Springs); 5.3.4 Case No. 20CW3087 (diligence on Coors-Golden Exchanges); 5.3.5 Case No. 20CW3137 (diligence on Augmentation Plan III Exchanges); 5.3.6 Case No. 20CW3076 (diligence on Coors Bookover Exchange); 5.3.7 Case No. 21CW3020 (diligence on Idaho Springs Exchange); 5.3.8 Case No. 21CW3115 (diligence on Coors/Farmers' High Line Canal Exchange, Coors/Croke-Standley Exchange, and Golden/Church Ditch Exchange); 5.3.9 Case No. 26CW3066 (diligence on Coors's Cosmic Exchanges); and 5.3.10 Case No. 26CW3134 (diligence on Coors's Augmentation Plan IV Exchange). Coors has also filed statements of opposition to a number of water court applications to prevent injury to Coors' water rights, including those which are the subject of this Application. Additionally, the Rocky Mountain Water Company, an affiliate of Coors, has also been a party to litigation necessary to protect its interests in the Rocky Mountain Ditch, a structure involved in the exchanges that are the subject of this application. CASE NUMBER 2026CW3167 (Consolidated Cases W-8036-75 and W-8256-76; 13CW3111; 20CW3060) **COORS BREWING COMPANY** ("**Coors**"), PO Box 4030, 5th Floor BOC Golden, Colorado 80401-0030, (303) 277-3342. April D. Hendricks and Peter D. Jaacks, Jewell Jimmerson Natural Resources Law LLC, 333 Perry Street, Suite 310, Castle Rock, CO 80104. **APPLICATION FOR FINDING OF REASONABLE DILIGENCE IN JEFFERSON COUNTY**. 2. Description of conditional water rights: **2.1 Date of Original Decree**: April 15, 1977 in Consolidated Case Nos. W-8036-75 and W-8256-76, District Court, Water Division No. 1. Since that time, the Court has found Coors to have been diligent in the development of the subject conditional water rights and accordingly has entered decrees making certain amounts absolute and continuing the remaining conditional portion of such rights in full force and effect in Case Nos. 81CW110, 85CW090, 89CW040, 98CW419, 05CW240, 13CW3111, and most recently in 20CW3060 (entered on October 12, 2020). **2.2 Names and locations of structures:** Underground Spring No. 115: Located in the SE 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., at a point 720 feet west of the east line and 460 feet north of the south line of said Section 19. Underground Spring No. 116: Located in the SE 1/4 of SE 1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M. at a point 250 feet west of the east line and 60 feet north of the south line of said Section 19. Underground Spring No. 117: Located in the NW 1/4 of NW 1/4 of Section 29, Township 3 South, Range 69 West of the 6th P.M. at a point 200 feet east of the west line and 410 feet south of the north line of said Section 29. Underground Spring No. 118: Located in the NW 1/4 of NW 1/4 of Section 29, Township 3 South, Range 69 West of the 6th P.M. at a point 550 feet east of the west line and 780 feet south of the north line of said Section 29. Underground Spring No. 120: Located in the SW 1/4 of SW 1/4

of Section 24, Township 3 South, Range 70 West of the 6th P.M. at a point 600 feet east of the west line and 500 feet north of the south line of said Section 24. Underground Spring No. 121: Located in the SW 1/4 of SW 1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M. at a point 1200 feet east of the west line and 530 feet north of the south line of said Section 24. Underground Spring No. 122: Located in the SE 1/4 of SW 1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M. at a point 1810 feet east of the west line and 580 feet north of the south line of said Section 24. Underground Spring No. 123: Located in the SE 1/4 of SW 1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M. at a point 2480 feet east of the west line and 620 feet north of the south line of said Section 24. Underground Spring No. 124: Located in the NW 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M. at a point 650 feet east of the west line and 110 feet south of the north line of said Section 25. Underground Spring No. 125: Located in the NW 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M. at a point 1280 feet east of the west line and 90 feet south of the north line of said Section 25. Underground Spring No. 126: Located in the NE 1/4 of NW 1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M. at a point 1890 feet east of the west line and 110 feet south of the north line of said Section 25. Underground Spring No. 127: Located in the SE 1/4 of SW 1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M. at a point 2500 feet east of the west line and 20 feet north of the south line of said Section 24. Underground Spring No. 133: Located in the NE 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3100 feet west of the east line and 2830 feet south of the north line of said Section 27. Underground Spring No. 134: Located in the NE 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3300 feet west of the east line and 3070 feet south of the north line of said Section 27. Underground Spring No. 135: Located in the NE 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3350 feet west of the east line and 2860 feet south of the north line of said Section 27. Underground Spring No. 136: Located in the SE 1/4 of NW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3270 feet west of the east line and 2620 feet south of the north line of said Section 27. Underground Spring No. 1: Located in the NE 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3300 feet west of the east line and 3090 feet south of the north line of said Section 27. Underground Spring No. 2: Located in the NE 1/4 of SW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3320 feet west of the east line and 3120 feet south of the north line of said Section 27. Underground Spring No. 9: Located in the SE 1/4 of NW 1/4 of Section 27, Township 3 South, Range 70 West of the 6th P.M. at a point 3050 feet west of the east line and 2380 feet south of the north line of said Section 27. **2.3 Source**: Groundwater, tributary to Clear Creek, a tributary of the South Platte River. **2.4. Appropriation Date**: May 30, 1976, for all of the subject rights. **2.5 Priority Date**: May 30, 1976, for all of the subject rights. **2.6 Decreed Uses**: Domestic, commercial, industrial, municipal and fire protection purposes. **2.7 Amounts:**

3. Work Done Toward Development of Conditional Water Rights: During the diligence period from October 2020 through October 2026, in continuing the development of the conditional water rights for this system, Coors has been engaged in use, construction, and completion of some of the diversion facilities and water rights involved. In addition, Coors has been engaged in the legal defense and protection of said water rights, and has continued in the planning, designing and exploration of the physical and business arrangements associated with the construction and use of the water rights involved. An outline of work done during the diligence period toward completion, or for completion, of the appropriation and application of water to a beneficial use as conditionally decreed, include the following activities: 3.1 Diligence activities directly related to the Underground Springs in this application include: Continued operation of Coors's Underground Springs system to supply water for decreed purposes; Expenditures of approximately $500,000 for pump installation and replacement, operation, maintenance, and repairs to Coors's Underground Springs system; and Continued refinements to Coors's measurement and accounting systems for Coors's Underground Springs in compliance with applicable rules of the State Engineer. 3.2 Unified System Activities. The Underground Springs in this Application are integral features in the unified water system developed by Coors for beverage and food production, malting, irrigation, domestic, and other commercial and industrial uses, as this Court found in the decree entered in Case No. 05CW240 (paragraph 9.2). Other components of the unified water system include the Straight Creek Tunnel Drainage and Effluent System (Case Nos. W-1665 in Water Division No. 5 and W-7097 in Water Division No. 1); Coors Golden Milling Right (Civil Action No. B-9675, Jefferson County District Court); other Coors Underground Springs (Case No. W-7809-74); Jefferson Storage System (Case Nos. W-152 and 88CW206); Idaho Springs Reservoir (Case No. 84CW671); the nontributary wells which are the subject of Case No. 85CW051; Coors Industries Ditch (Case Nos. W-224 and W-7585); the Coors Augmentation Plans I, II, III, and IV decreed in Case Nos. W-8036(75), W-8256(76), 88CW271, 89CW234, 99CW236; and 17CW3177); the Cosmic Decree (Case No. 88CW271); and related exchanges decreed in Case Nos. 88CW268, 88CW272, and 96CW1117 (all cases are decrees entered in Water Division No. 1, except where otherwise noted); as well as a complete water treatment, cooling and distribution system at the plant site in Golden, Colorado. As described below, Coors and its affiliated entities, including Molson Coors Beverage Company, MillerCoors LLC, and Rocky Mountain Water Company, have expended substantial effort in the development of Coors's overall unified system of which the rights identified in this Application are integral components. During this diligence period, Coors has continued the development of the unified water supply system of which the rights that are the subject of this Application are an integral part. This Court has determined that continued development and maintenance of Coors's unified water system constitutes diligence for the individual water rights associated with that system as found by this Court. *See, e.g.*, Decree in Case No. 12CW155 at pages 21-22, ¶13.2 (March 20, 2013). Coors has also been engaged in the legal defense and protection of said water rights and has continued in the planning, design, and exploration of the physical and business problems associated with the construction and use of the diversion facilities and water rights involved. During this diligence period, Coors and its affiliates, including MillerCoors, have undertaken the following activities and expended at least $3,000,000 for the development and maintenance of Coors's unified water supply system: Expenditures in excess of $369,000 for contractual obligations under the Cosmic Agreement and related agreements, including expenditures for

Standley Lake operations and maintenance; Operation of deliveries and exchanges of water pursuant to Case No. 96CW1117 to the extent water has been available for such deliveries and exchanges; Coors' activities related to the Jefferson Storage System, including: (1) storage of water in the Jefferson Storage System; (2) completion of Case No. 18CW3225, involving changes of conditional storage locations to reflect a realignment of structures for future construction, and an alternate point of diversion for conditional water storage rights for multiple reservoirs in the Jefferson Storage System; and (3) negotiation of lease of reservoir water surface for several reservoirs in the Jefferson Storage System for floating photovoltaic panels and power generation; Engineering costs in excess of $245,000 relating to Coors's water rights and water supply system; Expenditures in excess of $600,000 for ditch companies supporting Coors's unified water system; Expenditures in excess of $1,300,000 on capital projects in support of Coors' unified water system; and 3.3 During the diligence period, Coors and its affiliates have incurred significant legal expenses in furtherance of the unified system and its water rights. Since October 2020, Coors has participated in a number of water cases adjudicating matters required for the production of water used in Coors's unified water system, including but not limited to following cases: Case No. 18CW3225 (Jefferson Storage System realignment); Case No. 19CW3037 (diligence and making conditional rights absolute on Jefferson Storage System); Case No. 20CW3066 (diligence on Augmentation Plan II Exchange); Case No. 20CW3087 (diligence on Coors-Golden Exchanges); Case No. 20CW3137 (diligence on Augmentation Plan III Exchanges); Case No. 20CW3076 (diligence on Coors Bookover Exchange); Case No. 21CW3020 (diligence on Idaho Springs Exchange); Case No. 21CW3115 (diligence on Coors/Farmers' High Line Canal Exchange, Coors/Croke-Standley Exchange, and Golden/Church Ditch Exchange); Case No. 26CW3066 (diligence on Coors's Cosmic Exchanges); and Case No. 26CW3134 (diligence on Coors's Augmentation Plan IV Exchange). Coors has also filed statements of opposition to a number of water court applications to prevent injury to Coors' water rights, including those which are the subject of this Application. Additionally, the Rocky Mountain Water Company, an affiliate of Coors, has also been a party to litigation necessary to protect its interests in the Rocky Mountain Ditch, a structure involved in the exchanges that are the subject of this application. Number of pages in Application: 8

CASE NUMBER 2026CW3168 (Case Nos. W-152, 88CW206, 12CW67, and 19CW3037). **COORS BREWING COMPANY ("Coors"),** PO Box 4030, 5th Floor BOC, Golden, Colorado 80401-0030, (303) 277-3342. April D. Hendricks and Peter D. Jaacks, Jewell Jimmerson Natural Resources Law LLC, 333 Perry Street, Suite 310, Castle Rock, CO 80104. **APPLICATION FOR FINDING OF REASONABLE DILIGENCE IN JEFFERSON, CLEAR CREEK, AND ADAMS COUNTIES**. 2. Name of Structures: Jefferson Storage System, comprised of the following structures: 1. Clinton Reservoir; 2. Crawford Reservoir; 3. Wanemaker (Wannamaker) Reservoir: 4. Hawley Reservoir; 5. Lee Reservoir; 6. Frost Reservoir; 7.Waldorf Reservoir; 8. Summers Reservoir; 9. Eskins Reservoir; 10. Pearson Reservoir No. 1 (also known as Lake B-5); 11. Pearson Reservoir No. 1 Enlargement; 12. B-4 Lake; 13. B-5 East Lake; 14. B-7 Lake; 15. B-9 Lake; 16 West Lake; 17. Bass Lake; 18. Tabor Lake; 19. Prospect Park Lake; and 20. West Gravel Lakes. Additional features of the Jefferson Storage System have water rights that are fully decreed absolute and therefore are not included in this application on Coors's remaining conditional water rights for the structures listed above. 3. Description of conditional water rights for the Jefferson Storage System: A.Date of Original Decree: July 23, 1971, Case No.: W-152 Court: District Court for Water Division No. 1; Change Decrees: Case No. 88CW206 (December 30, 1993); Case No. 18CW3225 (February 25, 2021). Since the original conditional decree was entered in Case No. W-152, this Court has found Coors to have been diligent in the development of the above-described conditional water rights, the most recent finding having been made in Case No. 19CW3037, entered on October 12, 2020. In addition, in Case Nos. 88CW206 and 18CW3225, this Court approved changes and transfers of a portion of the conditional water rights to conform to the actual as-built and/or planned configuration of Coors's Jefferson Storage System. B. Locations of Structures: 1. Clinton Reservoir. (From W-152) Said reservoir is located in the SE1/4 of the SW1/4 of Section 24 and in the NE1/4 of the NW1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SW Corner of Section 24, Township 3 South,

Range 70 West of the 6th P.M. bears South 0° East, 700 feet. Amount: 1100 acre-feet (conditional). Source: Clear Creek. Appropriation Date: October 1965. 2. Crawford Reservoir. (From W-152) Said reservoir is located in the SW1/4 of the SW1/4 of Section 24 and in the NW1/4 of the NW1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SW Corner of said Section 24, Township 3 South, Range 70 West of the 6th P.M. bears South 0° West, 700 feet. Amount: 1000 acre-feet (conditional) Source: Clear Creek Appropriation Date: October 1965. 3. Wanamaker (Wannamaker) Reservoir. (From W-152) Said reservoir is located in the SE1/4 of the SE1/4 of Section 23 and in the NE1/4 of the NE1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SE Corner of said Section 23, Township 3 South, Range 70 West of the 6th P.M. bears North 90° East, 1,300 feet. Amount: 530 acre-feet (conditional) Source: Clear Creek. Appropriation Date: October 1965. 4. Hawley Reservoir. (From W-152) Said reservoir is located in the E1/2 of the NW1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. Original Point of Diversion: Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SW Corner of said Section 19, Township 3 South, Range 69 West of the 6th P.M. bears South 0° West, 1,100 feet. Alternate Point of Diversion - Rocky Mountain Ditch Headgate (decreed in Case No. 18CW3225): Point of diversion located on the South side of the Croke Dam in the NE1/4 NE1/4 NW1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., at a point on the South side of Clear Creek which bears South 18°12'25" West, a distance of 401.11 feet from the North 1/4 corner of said Section 26, Jefferson County, Colorado. The UTM coordinates of the Rocky Mountain Ditch headgate are UTM X 483376 and UTM Y 4402024. The Rocky Mountain Ditch WDID is 0700652. Amount: 570 acre-feet (conditional). By the decree in Case No. 18CW3225, the remaining conditional 570 acre-feet will be stored in other Jefferson Storage System structures, as described in Paragraph 4 herein. Source: Clear Creek. Appropriation Date: May 27, 1966. 5. Lee Reservoir. (From W-152) Said reservoir is located in the W1/2 of the NE1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. Original Point of Diversion: Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SW Corner of said Section 19, Township 3 South, Range 69 West of the 6th P.M. bears South 0° West, 1,100 feet. Alternate Point of Diversion - Rocky Mountain Ditch Headgate (decreed in Case No. 18CW3225): This point of diversion is described in Paragraph 3.B.4. Amount: 310 acre-feet (conditional). By the decree in Case No. 18CW3225, the remaining conditional 310 acre-feet will be stored in other Jefferson Storage System structures, as described in Paragraph 4 herein. Source: Clear Creek. Appropriation Date: May 27, 1966. 6. Frost Reservoir. (From W-152). Said reservoir is located in Sections 10 and 15 of Township 5 South, Range 75 West of the 6th P.M., in Clear Creek County, Colorado. The height of the dam is 44 feet. The dam axis bears South 87° 26' West, 646 feet from a point whence the NW Corner of Section 1, Township 5 South, Range 75 West of the 6th P.M. bears North 29° 24' East, 11,200 feet. Amount: 400 acre-feet (conditional). Source: Clear Creek. Appropriation Date: October 28, 1965. 7. Waldorf Reservoir. (From W-152) Said reservoir is located in the SW1/4 of the NE1/4 of Section 2, Township 5 South, Range 75 West of the 6th P.M., in Clear Creek County, Colorado. The height of the dam is 60 feet. The dam axis bears South 56° 57' East, 922 feet from a point whence the NW Corner of Section 1, Township 5 South, Range 75 West of the 6th P.M. bears North 40° 17' East, 2,582 feet. Amount: 400 acre-feet (conditional). Source: Clear Creek. Appropriation Date: October 28, 1965. 8. Summers Reservoir. (From W-152) Said reservoir is located in the SE1/4 of the SW1/4 of Section 19, and in the NE1/4 of the NW1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. Original Point of Diversion: Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SW Corner of said Section 19, Township 3 South, Range 69 West of the 6th P.M. bears South 0° West, 1,100 feet. Alternate Point of Diversion - Rocky Mountain Ditch Headgate (decreed in Case No. 18CW3225): This point of diversion is described in Paragraph 3.B.4. Amount: 700 acre-feet (conditional). By the decree in Case No. 18CW3225, storage at the originally decreed location for Summers Reservoir is limited to 690 acre-feet, with the remaining 10 acre-feet to be stored in other Jefferson Storage System structures, as described in Paragraph 4 herein. Source: Clear Creek. Appropriation Date: October 1965. 9.

Eskins Reservoir. (From W-152) Said reservoir is located in the SW1/4 of the SE1/4 of Section 19, and in the NW1/4 of the NE1/4 of Section 30, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. Original Point of Diversion: Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the S1/4 Corner of said Section 19, Township 3 South, Range 69 West of the 6th P.M. bears South 0° East, 1,300 feet. Alternate Point of Diversion - Rocky Mountain Ditch Headgate (decreed in Case No. 18CW3225): This point of diversion is described in Paragraph 3.B.4. Amount: 1,500 acre-feet (conditional). By the decree in Case No. 18CW3225, storage at the originally decreed location for Eskins Reservoir is limited to 1,140 acre-feet, with the remaining 360 acre-feet to be stored in other Jefferson Storage System structures, as described in Paragraph 4 herein. Source: Clear Creek. Appropriation Date: October 1965. 10. Pearson Reservoir No. 1 (also known as Lake B-5). (From W-152) Said reservoir is located in the NE1/4 of the NE1/4 of Section 30 and in the SE1/4 of the SE1/4 of Section 19, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the Pearson Ditch at a point whence the corner common to Sections 19, 20, 29 and 30, Township 3 South, Range 69 West of the 6th P.M. bears North 77° East, 1,310 feet, in the amount of 101 acre-feet with an appropriation date of October 1, 1965. Amount 39.3 acre-feet (absolute); 61.7 acre-feet (conditional). Source: Clear Creek. Appropriation Date: October 1, 1965. 11. Pearson Reservoir No. 1 Enlargement. (From W-152) Said reservoir is located in the SE1/4 of the SE1/4 of Section 19, and in the NE1/4 of the NE1/4 of Section 30, and in the NW1/4 of the NW1/4 of Section 29, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. Water for said reservoir will be diverted from the right bank of Clear Creek at a point whence the SW Corner of said Section 19, Township 3 South, Range 69 West of the 6th P.M. bears South 64° West, 2,800 feet. Amount: 700 acre-feet (conditional). Source: Clear Creek. Appropriation Date: January 16, 1968. 12. B-4 Lake. (From 88CW206) Located on a parcel of land in the NE1/4 of Section 25, and in the SE1/4 of Section 24, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado, and more particularly described as follows: Commencing at the NE corner of said Section 25 which point is also the Point of Beginning; thence S 00° 09' 02" W along the East line of said Section 25 for a distance of 2294.00 feet; thence N 87° 57' 37" W for a distance of 2618.35 feet to the Easterly right-of-way of McIntyre Street; thence N 00° 01' 20" E along said right-of-way for a distance of 2,065.10 feet; thence S 89° 43' 46" E for a distance of 920.81 feet; thence N 56° 12' 36" E for a distance of 1379.95 feet; thence N 79° 51' 11" E for a distance of 563.94 feet to the East line of the SE1/4 of said Section 24; thence S 00° 04' 01" W along said line for a distance of 726.75 feet to the Point of Beginning, containing 147.26 acres more or less. Points of diversion: 1. On the right bank of Clear Creek at a point whence the South 1/4 Corner of Section 24, Township 3 South, Range 70 West of the 6th P.M. bears S 0° E, 900 feet. 2. On the right bank of Clear Creek at a point whence the SE Corner of Section 24, Township 3 South, Range 70 West of the 6th P.M. bears S 60° E, 1900 feet. 3. On the south side of Clear Creek which is on the south side of the diversion dam common to the Croke Canal and the Rocky Mountain Ditch in the NE1/4 NE1/4 NW1/4 of Section 26, T3S, R70W of the 6th P.M. and which bears South 18° 12' 25" West a distance of 401.11 feet from the North 1/4 corner of said Section 26. 4. On the Miles and Eskins Drainage, Seepage and Waste Water Ditch at a point whence the NW Corner of Section 30, T3S, R69W bears North 18° 46' W, 1,621 feet. Source: Clear Creek. Amounts and Appropriation Dates: 250 acre-feet, October 1965 (absolute) (Thuet-Mauz); 840 acre-feet, October 1965 (absolute) (Killian-Mauz); 938 acre-feet, March 22, 1968 (absolute) (Blue Lake Enl.); 68 acre-feet, March 22, 1968 (absolute) (Blue Lake Enl.); 1200 acre-feet, March 22, 1968 (absolute) (Lewis); 439 acre-feet, March 22, 1968 (absolute) (Sanderson); 281 acre-feet, March 22, 1968 (conditional) (Sanderson). 13. B-5 East Lake. (From 88CW206) Located on a parcel of land in the SW 1/4 of Section 20, and in the NW 1/4 of Section 29, and in the NE 1/4 of Section 30, and in the SE 1/4 of Section 19, T 3 S., R 69 W., of the 6th P.M., Jefferson County, State of Colorado, and more particularly described as follows: Beginning at the Northeast corner of said parcel from whence the Southwest corner of said Section bears S 44º54'15" W for a distance of 1411.34 feet; thence S 00º29'44" E along the Westerly right-of-way of Colorado Interstate 70 for a distance of 1587.97 feet; thence S 41º42'18" W to a point on the Northeasterly right-of-way of the Denver Water Board for a distance of 354.31 feet; thence N 48º17'42" W along the Northeasterly right-of-way for a distance of 2671.15 feet; thence S 89º53'13" E for a distance of 333.32 feet; thence N 65º11'47"

E for a distance of 177.70 feet; thence S 89º26'41" E to the East line of the Southeast 1/4 of the Southeast 1/4 of said Section 19 for a distance of 731.27 feet; thence N 89º31'56" E for a distance of 990.00 feet to the Point of Beginning, containing 52.28 acres more or less. Points of diversions of the structure used to fill the Reservoir: 1. Original Point of Diversion: On the right bank of Clear Creek at a point whence the SW Corner of Section 19, T 3 S., R 69 W., of the 6th P.M., Jefferson County, State of Colorado, bears S 64° W., 2800 feet. 2. Original Point of Diversion: On the Pearson Ditch at a point whence the corner common to Sections 19, 20, 29, and 30, T 3 S., R 69 W., of the 6th P.M., Jefferson County, State of Colorado, bears N 77°E, 1310 feet. 3. Alternate Point of Diversion - Rocky Mountain Ditch Headgate (as decreed in Case No. 18CW3225): This point of diversion is described in Paragraph 3.B.4. Source: Clear Creek. Amounts and Appropriation Dates: 105 acre-feet, October 1, 1965 (conditional) (Pearson No. 2); 530 acre-feet, January 16, 1968 (conditional) (Pearson No. 2 Enl.); 420 acre-feet, January 1, 1968 (conditional) (Pearson No. 3); 200 acre-feet, May 27, 1966 (conditional) (Hawley). By the decree in Case No. 18CW3225, the remaining conditional 1,255 acre-feet will be stored in other Jefferson Storage System structures, as described in Paragraph 4 herein. 14. B-7 Lake. (From 88CW206) Located on a parcel of land in the SW1/4 of Section 24 and in the SE1/4 of Section 23, T 3 S., R 70 W., of the 6th P.M., Jefferson County, State of Colorado, and more particularly described as follows: Beginning at the Northwesterly corner of said parcel which is on the Southerly right-of-way of 44th Avenue, from whence the Southeast corner of said Section 23 bears S 14º28'29" E a distance of 1418.70 feet; thence S 28º21'00" E for a distance of 225.71 feet to a point on the Northerly right-of-way of the Croke Canal to a point of curve to the right which curve has a central angle of 05º17'53" a radius of 974.12 feet and an arc length of 90.08 feet to a point of reverse curve to the left which curve has a central angle of 06º15'17" a radius of 1392.30 feet and an-arc length of 147.94 feet to a point on the East line of said Section 23; thence N 02º51'17" W for a distance of 10.00 feet to a point of curve to the left which curve has a central angle of 03º54'43" a radius of 1382.37 feet and an arc length of 94.38 feet to a point of compound curve to the left which curve has a central angle of 15º45'00" a radius of 768.45 feet and an arc length of 211.24 feet to a point of reverse curve; thence continuing along said Canal right-of-way on said reverse curve to the right which curve has a central angle of 11º40'00" a radius of 909.42 feet and an arc length of 185.18 feet to a point of tangent; thence continuing on said Canal right-of-way N 79º09'00" E for a distance of 545.77 feet to a point of curve to the left which curve has a central angle of 46º30'24" a radius of 514.36 feet and an arc length of 417.50 feet to a point of tangent; thence N 32º38'36" E for a distance of 718.13 to a point on the Southerly right-of-way of West 44th Avenue; thence along said 44th Avenue right-of-way S 69º45'00" W for a distance of 772.28 feet; thence continuing on said right-of-way N 20º15'00" W for a distance of 20.00 feet; thence S 69º45'00" W for a distance of 355.03 feet to the Easterly property line of Public Service Company property; thence along said property S 20º15'00" E for a distance of 259.72 feet; thence continuing along said property S 69º45'00" W for a distance of 294.26 feet; thence continuing along said property N 27º25'00" W for a distance of 261.76 feet to the Southerly right-of-way of West 44th Avenue; thence along said right-of-way S 69º45'00" W for a distance of 308.56 feet; thence continuing along said right-of-way S 38º14'36" E for a distance of 27.46 feet to a point of curve to the left which curve has a central angle of 04º58'00" a radius of 1919.57 feet and an arc length of 166.41 feet to a point of tangent; thence continuing along said right-of-way S 59º44'00" W for a distance of 344.28 feet to the Point of Beginning, containing 18.25 acres more or less. Point of diversion of the structure used to fill the Reservoir: Through the Wannamaker Ditch at a point on the North bank of Clear Creek in the NE1/4 of Section 27, T 3 S., R 70 W., of the 6th P.M., Jefferson County, State of Colorado, whence the NE Corner of said Section 27, bears N. 38°17.5' East, 2099.64 feet. Source:Clear Creek Amount: 280 acre-feet (absolute), 220 acre-feet (conditional) Appropriation Date: October, 1965 (Summers Reservoir). 15. B-9 Lake. Alternate place of storage for the Frost and Waldorf Rights. (From 88CW206) Location: Located on a parcel in the N1/2 SE1/4 of Section 19, T 3 S., R 69 W., of the 6th P.M., Jefferson County, State of Colorado, lying South of Highway 58; East of the Denver Water Board R.O.W.; and North of Clear Creek. Points of Diversions of the structure used to fill the Reservoir: 1. On the North side of Clear Creek in the NW1/4 SE1/4 of Section 19, T 3 S., R 69 W., of the 6th P.M., Jefferson County, State of Colorado, at a point which is approximately 1700 feet from the East section line and 1400 feet from the South section line of said Section 19. 2.Through the Slough Ditch at a point on the North bank of Clear

Creek in the NW1/4 SE1/4 of Section 19, T 3 S., R 69 W., of 6th P.M., Jefferson County, State of Colorado, at a point which is approximately 2400 feet from the East section line and 1320 feet from the South section line of said Section 19. 3. Through the Reno and Juchem Ditch at a point on the North bank of Clear Creek in the SE1/4 SW1/4 of Section 19, T 3 S., R 69 W., of the 6th P.M., Jefferson County, State of Colorado, at a point approximately 1320 feet from the West section line and 1250 feet from the South section line of said Section 19. Source: Clear Creek Amount: Up to 400 acre-feet each from the Frost Reservoir and Waldorf Reservoir rights as an alternate place of storage under Case No. 88CW206 (conditional). Appropriation Date: October 28, 1965. 16. West Lake. (From 88CW206) Located on a parcel of land in the South 1/2 of Section 20 and the North 1/2 of Section 30, T 3 S., R 69 W., of the 6th P.M., County of Jefferson, State of Colorado, and more particularly described as follows: Beginning at a point whence the South quarter corner of said Section 20 bears S 66º33'50" E for a distance of 269.53 feet; thence S 64º29'14" W for a distance of 616.53 feet to a point on the Wheat Ridge Greenbelt Lease Line; thence N 00º51'09" W along said Lease Line for a distance of 1741.97 feet; thence N 77º15'36" E for a distance of 48.75 feet; thence N 64º33'16" E for a distance of 75.03 feet; thence N 61º42'11"E for a distance of 231.53 feet; thence N 66º11'47" E for a distance of 170.34 feet; thence N 68º16'03" E for a distance of 81.95 feet; thence N 75º41'01" E for a distance of 106.98 feet; thence N 81º43'17"E for a distance of 133.28 feet; thence N 89º17'40" E for a distance of 121.73 feet; thence S 81º21'39"E for a distance of 238.19 feet; thence along a curve to the right which curve has a central angle of 75º10'02", a radius of 193.61 feet and an arc length of 254.00 feet to a point of tangent; thence S 01º22'40"W for a distance of 47.08 feet; thence N 85º19'46"E for a distance of 286.64 feet; thence S 71º20'44" E for a distance of 32.45 feet; thence S 87º08'26" E for a distance of 34.66 feet; thence N 89º01'29"E for a distance of 131.24 feet; thence N 83º04'26" E for a distance of 84.59 feet; thence S 85º03'23" E for a distance of 105.15 feet; thence S 76º32'17" E for a distance of 147.73 feet; thence S 70º37'40"E for a distance of 27.85 feet; thence S 48º02'50"E for a distance of 22.33 feet; thence S 27º44'13" E for a distance of 43.26 feet to the East line of the West 1/2 of the Southeast 1/4 of said Section 20; thence S 00º07'43"E along said Section line for a distance of 611.14 feet; thence S 84º54'43"W for a distance of 35.00 feet to a point on the Wheat Ridge Greenbelt Lease Line; thence S 43º29'10"W along said Lease Line for a distance of 358.76 feet; thence S 86º27'46" W for a distance of 558.63 feet; thence S 68º07'07" W for a distance of 618.11 feet; thence S 68º07'06" W for a distance of 87.22 feet; thence S 58º51'52" W for a distance of 193.77 feet; thence S 00º04'29"W for a distance of 180.00 feet to the Point of Beginning, containing 64.06 acres more or less. Point of diversion: At a point on the South side of Clear Creek in the SW1/4 of Section 20, T 3 S., R 69 W., of the 6th P.M., Jefferson County, State of Colorado, whence the South quarter corner of said Section 20, bears S. 1° E., 1920 feet. Source: Clear Creek Amount: 400 acre-feet (conditional) Appropriation Date: January 16, 1968 (from Pearson Res. No. 1 Enlargement as originally decreed) 17. Bass Lake. (From 88CW206) Located on a parcel of land in the South 1/2 of Section 20 and the North 1/2 of Section 30, T 3 S., R 69 W., of the 6th P.M., County of Jefferson, State of Colorado, and more particularly described as follows: Beginning at a point whence the South quarter corner of said Section 20 bears S 66º33'50" E for a distance of 269.53 feet; thence S 64º29'14" W for a distance of 616.53 feet to a point on the Wheat Ridge Greenbelt Lease Line; thence N 00º51'09" W along said Lease Line for a distance of 1741.97 feet; thence N 77º15'36" E for a distance of 48.75 feet; thence N 64º33'16" E for a distance of 75.03 feet; thence N 61º42'11"E for a distance of 231.53 feet; thence N 66º11'47" E for a distance of 170.34 feet; thence N 68º16'03" E for a distance of 81.95 feet; thence N 75º41'01" E for a distance of 106.98 feet; thence N 81º43'17"E for a distance of 133.28 feet; thence N 89º17'40" E for a distance of 121.73 feet; thence S 81º21'39"E for a distance of 238.19 feet; thence along a curve to the right which curve has a central angle of 75º10'02", a radius of 193.61 feet and an arc length of 254.00 feet to a point of tangent; thence S 01º22'40"W for a distance of 47.08 feet; thence N 85º19'46"E for a distance of 286.64 feet; thence S 71º20'44" E for a distance of 32.45 feet; thence S 87º08'26" E for a distance of 34.66 feet; thence N 89º01'29"E for a distance of 131.24 feet; thence N 83º04'26" E for a distance of 84.59 feet; thence S 85º03'23" E for a distance of 105.15 feet; thence S 76º32'17" E for a distance of 147.73 feet; thence S 70º37'40"E for a distance of 27.85 feet; thence S 48º02'50"E for a distance of 22.33 feet; thence S 27º44'13" E for a distance of 43.26 feet to the East line of the West 1/2 of the Southeast 1/4 of said Section 20; thence S 00º07'43"E along said Section line for a distance of 611.14 feet; thence S

84º54'43"W for a distance of 35.00 feet to a point on the Wheat Ridge Greenbelt Lease Line; thence S 43º29'10"W along said Lease Line for a distance of 358.76 feet; thence S 86º27'46" W for a distance of 558.63 feet; thence S 68º07'07" W for a distance of 618.11 feet; thence S 68º07'06" W for a distance of 87.22 feet; thence S 58º51'52" W for a distance of 193.77 feet; thence S 00°04'29"W for a distance of 180.00 feet to the Point of Beginning, containing 64.06 acres more or less. Point of diversion: At a point on the South side of Clear Creek in the SE1/4 of Section 20, T 3 S., R 69 W., of the 6th P.M., Jefferson County, State of Colorado, whence the South quarter corner of said Section 20, bears S. 30°W., 1880 feet. Source: Clear Creek Amount: 100 acre-feet (conditional) Appropriation Date: May 27, 1966 (from Lee Reservoir as originally decreed). 18. Tabor Lake. (From 88CW206) Located on a parcel of land in the East 1/2 of Section 20, T 3 S., R 69 W., of the 6th P.M., County of Jefferson, State of Colorado, and more particularly described as follows: Beginning at a point on the East-West Center Line of said Section 20 from whence the East quarter corner of said Section 20 bears N 89º37'13" E for a distance of 836.84 feet; thence S 00º10'30" E for a distance of 132.00 feet; thence N 89º21'26"E for a distance of 165.00 feet; thence S 00º01'30"E for a distance of 803.67 feet; thence N 84º49'19" W for a distance of 1432.87 feet; thence N 00º02'08" W for a distance of 790.37 feet; thence N 89º21'26" E for a distance of 306.90 feet; thence N 00º02'40" W for a distance of 238.36 feet; thence N 89º38'20" E for a distance of 325.18 feet; thence N 00º06'13" W for a distance of 58.89 feet; thence N 89º21'26"E for a distance of 469.74 feet; thence S 00º09'28" E for a distance of 295.65 feet; thence N 89º21'25" E for a distance of 157.38 feet to the Point of Beginning, containing 26 acres more or less. Point of diversion: Through the Slough ditch at a point on the North side of Clear Creek in the NW1/4 SE1/4 of Section 19, T 3 S., R 69 W., of the 6th P.M., Jefferson County, State of Colorado, at a point which is approximately 2400 feet from the East section line and 1320 feet from the South section line of said Section 19. Source: Clear Creek Amount: 500 acre-feet (conditional) Appropriation Date: October, 1965 (from Eskins Reservoir as originally decreed). 19. Prospect Park Lake. (From 88CW206) Located on a parcel of land in the West 1/2 of Section 21, T 3 S., R 69 W., of the 6th P.M., Jefferson County, State of Colorado and more particularly described as follows: Beginning at the Southwest corner of said parcel which point is on the West Line of the Southwest 1/4 of said Section 21 from whence the West quarter corner of said Section bears N 00º13'17" W for a distance of 666.42 feet; thence continuing along said West line of the Northwest 1/4 of said Section 21 for a distance of 213.93 feet; thence N 89º19'08" E for a distance of 821.7 feet; thence S 00º20'57" E for a distance of 881.80 feet; thence S 89º25'14" W for a distance of 823.61 feet to the Point of Beginning, containing 10 acres more or less. Point of diversion of the structure used to fill the Reservoir: Through the Slough ditch at a point on the North side of Clear Creek in the NW1/4 SE1/4 of Section 19, T 3 S., R 69 W., of the 6th P.M., Jefferson County, State of Colorado, at a point which is approximately 2,400 feet from the East section line and 1,320 feet from the South section line of said Section 19. Source: Clear Creek Amount: 100 acre-feet (conditional) Appropriation Date: October, 1965 (from Summers Reservoir as originally decreed). 20. West Gravel Lakes. Alternate places for storage for the Frost and Waldorf rights. (From 88CW206) These facilities are owned by City of Thornton. Coors may not store water in these facilities from the Frost Reservoir and Waldorf Reservoir conditional water storage rights without Thornton's prior approval. Location: Located just West of the South Platte River about 1/2 mile East of the intersection of East 80th Avenue and North York Street in Thornton, Colorado; in Sections 25 and 36, T 2 S., R 68 W., of the 6th P.M., Adams County, Colorado. Point of diversion of the structure used to fill the Reservoir: Lower Clear Creek Ditch, which point of diversion is located on the North bank of Clear Creek at a point 1,400 feet West and 1,200 feet North of the SE corner of Section 4, T3S., R68W., of the 6th P. M., Adams County, Colorado. Source: Clear Creek Amount: Up to 400 acre-feet each from the Frost Reservoir and Waldorf Reservoir rights as changed to alternate places of storage in Case No. 88CW206 (conditional) Appropriation Date: October 28, 1965. C. Use for all of the above rights: Irrigation, domestic, mechanical, manufacturing, generation of power, power generally, fire protection, sewage treatment, street sprinkling, watering of parks, trees, lawns and grounds, recreation, golf club, storage reserves, replacement, adjustments and regulation of the Jefferson Storage System with other uses, and ground water storage and recharge, and water exchange. 4. Realignment of Jefferson Storage System Structures in Case No. 18CW3225: By the terms of the decree in Case No. 18CW3225, 10 acre-feet of the remaining storage amount conditionally

decreed to Summers Reservoir, 360 acre-feet of the remaining storage amount conditionally decreed to Eskins Reservoir, and the entire amounts conditionally decreed to Hawley Reservoir, Lee Reservoir, and B5 East Lake, were changed to new storage locations at B-5 Lake (a/ka/ Pearson No. 1) 2nd Enlargement, B-10 Lake, B-11 Lake, B-12 Lake, and B-13 Lake. Storage of water in the new storage locations will occur in a manner consistent with the 18CW3225 Decree. The changed storage locations decreed in 18CW3225 are described below (all conditional): A. B-5 Lake (a/k/a Pearson No. 1) 2nd Enlargement: 1. Amount: 56 acre-feet from B-5 East Lake (October 1, 1965 priority). 2. Storage Location: Reservoir is located in the SE1/4 of the SE1/4 of Section 19 and in the NE1/4 of the NE1/4 of Section 30 and in the NW1/4 of the NW1/4 of Section 29, Township 3 South, Range 69 West of the 6th P.M., in Jefferson County, Colorado. B. B-10 Lake: 1. Amount: up to 1,446 acre-feet 2. Storage Location: Reservoir is to be located in the SE1/4 of the NW1/4 and in the NE1/4 of the NW1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado. C. B-11 Lake: 1. Amount: up to 804 acre-feet 2. Storage Location: Reservoir is to be located in the NW1/4 of the NE1/4 and in the NE1/4 of the NE1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado. D. B-12 Lake: 1. Amount: up to 1,394 acre-feet 2. Storage Location: Reservoir is to be located in the SW1/4 of the SE1/4 and in the SE1/4 of the SE1/4 of Section 24, and in the NW1/4 of the NE1/4 of Section 25, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado. E. B-13 Lake: 1. Amount: up to 380 acre-feet 2. Storage Location: Reservoir is to be located in the NW1/4 of the NW1/4 of Section 25, and in the NE1/4 of the NE1/4 of Section 26, Township 3 South, Range 70 West of the 6th P.M., in Jefferson County, Colorado. 5. Reasonable Diligence in Development of Conditional Water Rights. In support of this Application for Finding of Reasonable Diligence, during this diligence period from October 2020 through October 2026, in continuing the development of the conditional appropriative right of exchange for use in its unified system, Coors has been engaged in the use, construction and completion of some of the diversion facilities, storage facilities, and water rights involved. In addition, Coors has been engaged in the legal defense and protection of said water rights, and has continued in the planning, designing and exploration of the physical and business arrangements associated with the construction and use of the water rights and facilities involved. Work done during the diligence period toward completion and exercise of the appropriative rights of exchange, and application of water to a beneficial use as conditionally decreed, include the following activities: A. Diligence activities directly related to the Jefferson Storage System during the diligence period: 1. Storage of water in the Jefferson Storage System; 2. Negotiation of lease of reservoir water surface for several reservoirs in the Jefferson Storage System for floating photovoltaic panels and power generation; 3. Completion of Case No. 18CW3225 (decreed on February 25, 2021), approving of changes of the conditional storage locations of certain Jefferson Storage System reservoirs. This change case reflected a realignment of structures for future construction, and an alternate point of diversion, for parts or all of the conditional water storage rights decreed for Hawley Reservoir, Lee Reservoir, Summers Reservoir, Eskins Reservoir and B-5 East Lake, which are all part of the Jefferson Storage System, as decreed in Water Division No. 1, Case No. W-152, July 23, 1971, and changed in Case No. 88CW206, December 30, 1993; and as decreed for diversion, storage, and use in Coors Augmentation Plans I, II, III, and IV as decreed in Case Nos. W-8036(75), W 8256(76), 89CW234, 99CW236, and 17CW3177. These changes will maintain the feasibility of future development and use of those conditional rights. These expenditures were incurred directly by Coors and its corporate affiliates, including Molson Coors Brewing Company and MillerCoors LLC, for the benefit of the Jefferson Storage System and Coors water supply system. B. Unified System Activities. The Jefferson Storage System components, as decreed in Case Nos. 18CW3225, 88CW206 and W-152, are integral features in Coors' unified water system developed by Coors for beverage and food production, malting, irrigation, domestic and other commercial and industrial uses, as the Water Court found in Case Nos. 98CW222 and 05CW186. Other components of the unified water system include the Straight Creek Tunnel Drainage and Effluent System (Case Nos. W-1665 in Water Division No. 5 and W-7097 in Water Division No. 1), Coors Golden Milling Right (Civil Action No. B-9675, Jefferson County District Court), Coors' Underground Springs (Case Nos. W-7809-74, 90CW064 and 95CW081); Augmentation Plan Springs (Case No. 81CW110), Idaho Springs Reservoir (Case No. 84CW671), the nontributary wells which are the subject of Case No. 85CW051, Coors Industries

Ditch (Case Nos. W-224 and W-7585), the Coors Augmentation Plans I, II, III, and IV decreed in Case Nos. W-8036(75), W-8256(76), 88CW271, 89CW234, 99CW236, and 17CW3177), the Cosmic Decree (Case No. 88CW271), and related exchanges decreed in Case Nos. 88CW268, 88CW272, and 96CW1117 (all cases are decrees entered in Water Division No. 1, except where otherwise noted), as well as a complete water treatment, cooling and distribution system at the plant site in Golden, Colorado. As described below, Coors and its affiliated entities, including Molson Coors Brewing Company, MillerCoors LLC, and Rocky Mountain Water Company, have expended substantial effort in the development of Coors' overall unified system of which the rights identified in this Application are integral components. During this diligence period, Coors has continued the development of the unified water supply system of which the storage structures which are the subject of this Application are an integral part. This Court has determined that continued development and maintenance of Coors' unified water system constitutes diligence for the individual water rights associated with that system. See, e.g., Decree in Case No. 05CW186 at pages 17-18, ¶10.B (March 28, 2006) (Water Division 1). Coors has also been engaged in the legal defense and protection of said water rights, and has continued in the planning, design and exploration of the physical and business problems associated with the construction and use of the diversion facilities and water rights involved. During this diligence period, Coors and its affiliates have undertaken the following activities and expended at least $3,000,000 for the development and maintenance of Coors' unified water supply system: 1. Engineering costs in excess of $245,000 relating to Coors' water rights and water supply system; 2. Expenditures in excess of $600,000 for ditch companies supporting Coors' unified water system; 3. Expenditures of approximately $500,000 for pump installation and replacement, operation, maintenance and repairs to Coors' underground springs; 4. Expenditures in excess of $369,000 for contractual obligations under the Cosmic Agreement, operation of deliveries and exchanges of water pursuant to Case No. 96CW1117, and related agreements. 5. Expenditures in excess of $1,300,000 on other capital projects in support of Coors' unified water system; and 6.Operation of deliveries and exchanges of water pursuant to Case No. 96CW1117 to the extent water has been available for such deliveries and exchanges; C. During the diligence period, Coors has also participated in a number of water cases adjudicating matters required for the production of water used in Coors' unified water system, including but not limited to following cases: 1. Case No. 18CW3225 (Jefferson Storage System realignment); 2. Case No. 20CW3137 (diligence on Augmentation Plan III exchanges); 3. Case No. 20CW3066 (diligence on Augmentation Plan II exchanges); 4. Case No. 20CW3087 (diligence on Coors-Golden Exchanges); 5. Case No. 20CW3076 (diligence on Coors Bookover Exchange); 6. Case No. 20CW3060 (diligence on Coors' Underground Springs); 7. Case No. 21CW3020 (diligence on Idaho Springs Exchange); 8. Case No. 21CW3115 (diligence on Coors/Farmers' High Line Canal Exchange, Coors/Croke-Standley Exchange, and Golden/Church Ditch Exchange); 9. Case No. 26CW3066 (diligence on Coors's Cosmic Exchanges); 10. Case No. 26CW3134 (diligence on Coors Augmentation Plan IV exchanges). Coors has also filed statements of opposition to a number of water court applications to prevent injury to Coors' water rights, including those which are the subject of this Application. Additionally, the Rocky Mountain Water Company, an affiliate of Coors, has also been a party to litigation necessary to protect its interests in the Rocky Mountain Ditch. 6. Names and addresses of owners or reputed owners of the land upon which any new diversion or storage structure or modification to any existing diversion or storage structure is or will be constructed, or upon which water will be stored: The structures described above are located on land owned by Coors Brewing Company and/or its corporate affiliates, including Rocky Mountain Water Company and MillerCoors LLC, except the following: A. West Gravel Lakes: City of Thornton, 9500 Civic Center Dr. Thornton, Colorado 80229. B. West Lake, Bass Lake, Tabor Lake and Prospect Park Lake: City of Wheat Ridge, 7500 W. 29th Ave., 1st Floor, Wheat Ridge, CO 80033. C. Frost Reservoir and Waldorf Reservoir: United States Forest Service, 2060 Miner Street, Idaho Springs, CO 80452. Number of Pages in Application: 22

CASE NUMBER 2026CW3169 LOREEN E GREEN TRUST. ATTN: Rick and Lori Green, 40339 County Road 13, Elizabeth, CO 80107. Please send all correspondence to Philip E. Lopez, Eric K. Trout, FAIRFIELD AND WOODS, P.C., 1801 California Street, Suite 2600, Denver, CO 80202.

APPLICATION FOR UNDERGROUND WATER RIGHTS FROM NONTRIBUTARY AND NOT NONTRIBUTARY SOURCES AND APPROVAL OF PLAN FOR AUGMENTATION, IN THE NONTRIBUTARY LOWER DAWSON, DENVER, ARAPAHOE AND LARAMIE-FOX HILLS AQUIFERS AND THE NOT-NONTRIBUTARY UPPER DAWSON IN ELBERT COUNTY. 2. Subject Property: A parcel totaling approximately 67.88 acres generally located in the S1/2 of the S1/2 of Section 12, Township 7 South, Range 65 West of the 6th P.M., also known as 40339 County Road 13, Elizabeth, CO, 80107, as shown on **Exhibit A** ("Subject Property"). 3. Lien Holder Certification: There are no mortgage or lien holders with an interest in the Subject Property, therefore no notice is required under C.R.S. § 37-92-302(2)(b). 4. Well Permits: The Subject Property is being divided into an approximately 57-acre parcel ("**Parcel A**") and an approximately 10-acre parcel ("**Parcel B**"). There is one existing well on the Subject Property, completed into the Upper Dawson aquifer and permitted as an exempt well under Well Permit No. 198018 pursuant to C.R.S. § 37-92-602 (the "Existing Exempt Well"). Following the division, the Existing Exempt Well will be used on only Parcel A and will remain the only well serving that parcel. It will continue to be used in accordance with C.R.S. § 37-92-602(1)(b) and (3)(b)(II)(A) and the terms of Well Permit No. 198018 and return flows will continue to be provided as required by § 37-92-602(3)(b)(II)(A), such that the presumption of noninjury is maintained pursuant to § 37-92-602(3)(b)(IV). The Existing Exempt Well is not a structure to be augmented under the plan for augmentation requested herein, and its withdrawals will be accounted for separately from withdrawals from any augmented well. Applicant will apply for a well permit for additional well on Parcel B, in accordance with C.R.S. § 37-90-137 and the decree entered in this case, prior to construction of that well. 5. Source of Water Rights: The Upper Dawson Aquifer is not-nontributary as defined in C.R.S. § 37-90-103(10.7), and the Lower Dawson, Denver, Arapahoe, and Laramie-Fox Hills aquifers are nontributary as defined in C.R.S. § 37-90-103(10.5). 6. Estimated Volumes: Applicant desires to leave 4 acre-feet per year, 400 acre-feet total, of Upper Dawson Aquifer groundwater unadjudicated for the Existing Exempt Well or any future exempt purposes. Applicant estimates the following volumes may be available for withdrawal:

Aquifer	Estimated Annual Volume 100 Years (acre-feet)	Estimated Annual Volume 300 Years (acre-feet)	Estimated Total Volume (acre-feet)
Upper Dawson (NNT)*	15.18	5.06	1,518
Lower Dawson (NT)	5.47	1.82	547
Denver (NT)	30.75	10.25	3,075
Arapahoe (NT)	36.67	12.22	3,667
Laramie-Fox Hills (NT)	17.63	5.88	1,763

* The total estimated volume in the Upper Dawson Aquifer is 19.18 acre-feet per year for 100 years, or 1,918 acre-feet total. 4 acre-feet per year, 400 acre-feet total, is reserved from the not-nontributary Upper Dawson Aquifer for the Existing Exempt Well, and any future exempt purposes. 7. Proposed Uses: Groundwater withdrawn from the not-nontributary and nontributary aquifers underlying the Subject Property will be used, reused, and successively used to extinction for all allowable beneficial uses, including, but not limited to, domestic, including in-house use, commercial, irrigation, stock watering, fire protection, recreational, fish and wildlife, and augmentation purposes, including storage. The water may be immediately used or stored for subsequent use, used for exchange purposes, for direct replacement of depletions, and for other augmentation purposes, including taking credit for all return flows resulting from the use of such water for augmentation of, or as an offset against, any out-of-priority depletions. The water may be leased, sold, or otherwise disposed of for all the above uses both on and off the Subject Property. 8. Jurisdiction: The Court has jurisdiction over the subject matter of this application pursuant to C.R.S. §§ 37-90-137(6), 37-92-203(1), 37-92-302(2). 9. Summary of Plan for Augmentation: 9.1. Groundwater to be Augmented: 1.2 acre-feet per year of not-nontributary Upper Dawson Aquifer groundwater for 300 years. 9.2. Water Rights to be Used for Augmentation: Return flows from the use of not-nontributary and nontributary groundwater and direct discharge of nontributary groundwater. 9.3. Statement of Plan for

Augmentation: The not-nontributary Upper Dawson Aquifer groundwater will be used in one well to provide in-house use in up to two (2) single-family residences (0.6 acre-feet per year) outdoor irrigation of up to 10,000 square-feet (0.5 acre-feet per year), watering of 8 large domestic animals (0.1 acre-feet per year), fire protection, and storage before use anywhere on the Subject Property. Applicant reserves the right to amend the amount and uses without amending the application or republishing the same. Sewage treatment for in-house use will be provided by non-evaporative septic systems. Return flow from in-house use will be approximately 90% of that use and return flow from irrigation use will be approximately 15% of that use. During pumping Applicant will replace actual depletions pursuant to C.R.S. § 37-90-137(9)(c.5). Depletions occur to the South Platte River stream system and return flows accrue to that stream system and are sufficient to replace actual depletions while the subject groundwater is being pumped. Applicant will reserve an equal amount of nontributary groundwater underlying the Subject Property to meet post-pumping augmentation requirements. Applicant requests the Court approve the above underground water rights and augmentation plan, find that Applicant has complied with C.R.S. § 37-90-137(4) and water is legally available for withdrawal, find there will be no material injury to the owners of or persons entitled to use water under any vested water right or decreed conditional water right, and grant such other and further relief as is appropriate. (5 pages with exhibit).

CASE NUMBER 2026CW3170 KEVIN O'NEIL, 9663 E. Palmer Divide Ave., Larkspur, CO 80118. Attorney for Applicant: Julianne M. Woldridge, MacDougall & Woldridge, P.C., P.O. Box 7273, Woodland Park, CO 80863 (719)520-9288. **APPLICATION FOR WATER STORAGE RIGHTS AND APPROVAL OF PLAN FOR AUGMENTATION, IN DOUGLAS AND EL PASO COUNTIES**. 2. **Summary**: Applicant owns approximately 1,393.25 acres located in El Paso and Douglas Counties, Colorado, generally described as a parcel of land being a part of Sections 29, 30, 31, and 32, Township 10 South, Range 65 West of the 6th P.M. ("Property) and shown on Exhibit A attached to the Application. Applicant owns rights to water and water rights underlying, appurtenant to, or used or to be used in connection with the Property, including but not limited to: a. 1070.6 acre-feet per year in the not nontributary Dawson aquifer, 834.8 acre-feet per year in the nontributary Denver aquifer, and 427.6 acre-feet per year (of the 592.3 acre-feet per year) in the nontributary Arapahoe aquifer, all as adjudicated in Case No. 99CW218 decided on December 14, 2000, Water Division No. 1; b. 128.7 acre-feet per year in the not nontributary Dawson aquifer, 106.3 acre-feet per year in the nontributary Denver aquifer, and 79.7 acre-feet per year in the nontributary Arapahoe aquifer, all as adjudicated in Case No. 00CW79 decided on June 28, 2001, Water Division No. 1; c. water storage rights decreed to Gollehon Irrigation and Stock Water Reservoir No. 1 and Gollehon Irrigation and Stock Water Reservoir No. 2 in Civil Action 3635 decided on May 18, 1972, Douglas County District Court. Applicant requests the adjudication of water storage rights and approval of an augmentation plan. 3. **Application for water storage rights**: a. O'Neil Reservoir: 1). Location and Point of Diversion: The reservoir is an existing on-channel reservoir located in the SE1/4 of the NE1/4 of Section 31, T.10S., R.65W., 6th P.M., UTM coordinates of the centerline of the dam 525669.46 Easting, 4332285.46 Northing, Zone 13, NAD83, in Douglas County, as generally shown on Exhibit A attached to the Application. Source of PLSS information – aerial photography. 2). Source: Iron Gulch, tributary of East Cherry Creek; and not nontributary Dawson aquifer groundwater the right to which was adjudicated in Case No. 99CW218, Water Div. No. 1 on December 14, 2000 and pumped from wells permitted pursuant to that decree, augmented according to the augmentation plan described herein. 3). Date of appropriation: October 29, 2026, based on the filing of this application. The water has not yet been applied to beneficial use. 4). Amount: 80 acre-feet, conditional with the right to fill and refill continuously as needed to keep the pond full. 5). Uses: domestic, commercial, agricultural, livestock watering, recreational, fish and wildlife, fire protection, piscatorial, storage, augmentation uses, as a source of exchange, and irrigation on the Property shown on Exhibit A in Sections 29, 30, 31, and 32, T.10.S., R.65W., 6th P.M. and Sections 5 and 6, T.11S., R.65W, including filling of ponds and storage for such uses and including use of water in water features. To the extent the water stored is from rights adjudicated in Case No. 99CW218, the uses may include all uses for which those rights are adjudicated, including all beneficial uses, municipal, domestic, agricultural, industrial, commercial, irrigation, live stock watering,

recreational, fish and wildlife, fire protection, augmentation substitution, replacement of depletions and augmentation, and exchange uses on or off the property for which those rights were adjudicated. 6). Surface area of high water line: 13 acres. A). Vertical height of dam: 23 feet. B). Length of dam: 585 feet. 7). Total capacity of the reservoir: 140 acre-feet, all active capacity. b. O'Neil Ponds 1-5: a series of ponds located in Douglas County as follows: 1). Locations and points of diversion: O'Neil Pond 1: Located in the SE ¼ of Section 10, Township 10 South, Range 65 West, 6th P.M., UTM Coordinates 525684.41 Easting, 4331681.71 Northing, Zone 13, NAD83; O'Neil Pond 2: Located in the SW 1/4 of Section 10, Township 10 South, Range 65 West, 6th P.M., UTM Coordinates 524913.18 Easting, 4331228.25 Northing, Zone 13, NAD83; O'Neil Pond 3: Located in the SE 1/4 of Section 10, Township 10 South, Range 65 West, 6th P.M., UTM Coordinates 525264.80 Easting, 4331531.34 Northing, Zone 13, NAD 83; O'Neil Pond 4: Located in the SE 1/4 of Section 10, Township 10 South, Range 65 West, 6th P.M., UTM Coordinates 525497.31 Easting, 4331852.57 Northing, Zone 13, NAD83; O'Neil Pond 5: Located in the SE ¼ of Section 10, Township 10 South, Range 65 West, 6th P.M., UTM Coordinates 5255464.85 Easting, 4331982.28 Northing, Zone 13, NAD83. 2). Source of water for O'Neil Ponds 1 through 5: Iron Gulch, tributary of Cherry Creek including possible exposed groundwater, and not nontributary Dawson aquifer groundwater pumped from wells, the right to which was adjudicated in Case No. 99CW218, Water Div. No. 1 on December 14, 2000, as augmented according to the augmentation plan described herein. O'Neil Pond 1 is off-channel. O'Neil Ponds 2 through 5 are on-channel. 3). Date of appropriation for each of O'Neil Ponds 1 through 5 storage rights: October 29, 2026, based on the filing of this application. The water has not yet been applied to beneficial use. 4). Amounts: O'Neil Pond 1 – 1.8 acre-feet, O'Neil Pond 2 – 0.5 acre-feet, O'Neil Pond 3 – 1.8 acre-feet, O'Neil Pond 4 - 0.7 acre-feet, O'Neil Pond 5 –0.7 acre-feet, all conditional and each with the right to fill and refill continuously as needed to keep the ponds full. 5). Uses: domestic, commercial, agricultural, livestock watering, recreational, fish and wildlife, fire protection, piscatorial, storage, augmentation uses, as a source of exchange, and irrigation on the Property shown on Exhibit A in Sections 29, 30, 31, and 32, T.10.S., R.65W., 6th P.M. and Sections 5 and 6, T.11S., R.65W, including filling of ponds and storage for such and including use of water in water features. To the extent the water stored is from rights adjudicated in Case No. 99CW218, the uses may include all uses for which those rights are adjudicated, including all beneficial uses, municipal, domestic, agricultural, industrial, commercial, irrigation, live stock watering, recreational, fish and wildlife, fire protection, augmentation, substitution, replacement of depletions and augmentation, and exchange uses on or off the property for which those rights were adjudicated. 6). Surface area of high water line, height and length of dam: not applicable. 7). Total capacity of the ponds: – 1.8 acre-feet, O'Neil Pond 2 – 0.5 acre-feet, O'Neil Pond 3 – 1.8 acre-feet, O'Neil Pond 4 - 0.7 acre-feet, O'Neil Pond 5 – 0.7 acre-feet, all active capacity. 4. **Application for approval of augmentation plan**: a. Structures to be augmented: 1). Gollehon Irrigation and Stock Water Reservoir No. 1. Applicant intends to augment out-of-priority depletions associated with this reservoir, including but not limited to its use to store the water storage right described below. a). Decreed in Case No. CA3635, Douglas County District Court, May 18, 1972. b). Legal description: Parts of the NW1/4 of Section 32 and the SE1/4 of Section 29, T.10.S. R.65W., 6th P.M., UTM coordinates 526095.51 Easting, 4332810.3 Northing, Zone 13, NAD83, as generally shown on the map attached to the Application as Exhibit A. The decreed location is "the initial point of survey of the high water line is located at a point (the SE corner of the dam and N side of the spillway) whence the SW corner of Sec. 29, T10S R65W of the 6th P.M. bears S78º30' W 812 feet". c). Appropriation date: February 13, 1957. d). Amount: 16.65 acre-feet, absolute. e). Source: Iron Gulch, tributary of Cherry Creek. f). Decreed uses: Recreation and agriculture, including stock watering. g). No other water rights are diverted from this structure. 3). O'Neil Reservoir described above. 4). O'Neil Ponds 1 through 5 described above. 5). "Not nontributary Dawson Wells". Wells pumping not nontributary Dawson aquifer water, the rights to which were determined in Case No. 99CW218, Water Div. No. 1, on Dec. 14, 2000, including without limitation the following wells: a). "Well No. 30050A" or any replacement or additional well: located within the SE1/4 of the SW1/4 of Section 31, T.10S., R.65W., 6th P.M., 220 feet from the South section line and 2,390 feet from the East section line; source: not nontributary Dawson aquifer water, the rights to which were determined in Case No. 99CW218, Water Div. No. 1, on Dec. 14, 2000. This well is currently permitted as an exempt well but will be

repermitted as necessary to include such non-exempt purposes. Copies of the current well permit and well reports are in Exhibit B attached to the Application. b). "Well No. 212164" or any replacement or additional well: located within the SW1/4 of the SE1/4 of Section 31, T.10S., R.65W., 6th P.M., 400 feet from the South section line and 1,990 feet from the East Section line; source: not nontributary Dawson aquifer water, the rights to which were determined in Case No. 99CW218, Water Div. No. 1, on Dec. 14, 2000. This well is currently permitted as an exempt well but will be repermitted as necessary to include such non-exempt purposes. Copies of the current well permit and well reports are in Exhibit B attached to the Application. b.Water rights to be used for augmentation: 1). Not nontributary Dawson aquifer water rights determined in Case No. 99CW218, Water Div. No. 1, on Dec. 14, 2000 and pumped from wells allowed pursuant to that decree including but not limited to Well No. 30050A and Well No. 212164 described above as repermitted for such uses. a). The wells will be located on the Property at locations allowed by the decree in Case No. 99CW218. Well No. 30050A and Well No. 212164 are located as described above. b). Appropriation date: not applicable. c). Amount decreed: 1,070.6 acre-feet may be withdrawn annually based on a 100-year aquifer life. Amount to be included in this plan: amounts sufficient to augment depletions under this augmentation plan. d). decreed uses: use, reuse, succession of uses, and after use, the water may be leased, sold, or disposed of for the following beneficial uses: municipal, domestic, industrial, commercial, irrigation, agricultural, livestock watering, recreational, fish and wildlife, fire protection and any other beneficial uses. Said water will be produced for immediate application to said uses, both on and off the subject property for storage and subsequent application to beneficial uses, for exchange purposes, for replacement of depletions resulting from the use of water from other sources and for augmentation purposes. 2). Nontributary Arapahoe aquifer water rights determined in Case No. 99CW218, Water Div. No. 1 on Dec. 14, 2000 and pumped from wells allowed pursuant to that decree. a). The wells will be located on the Property at locations allowed by the decree in Case No. 99CW218. b). Appropriation Date: not applicable. c). Amount decreed: 592.3 acre-feet may be withdrawn annually assuming a 100-year aquifer life. Amount to be included in this plan for augmentation: amounts sufficient to augment depletions under this augmentation plan. d). Decreed uses: use, reuse, succession of uses, and after use, the water may be leased, sold, or disposed of for the following beneficial uses: municipal, domestic, industrial, commercial, irrigation, agricultural, livestock watering, recreational, fish and wildlife, fire protection and any other beneficial uses. Said water will be produced for immediate application to said uses, both on and off the subject property for storage and subsequent application to beneficial uses, for exchange purposes, for replacement of depletions resulting from the use of water from other sources and for augmentation purposes. 3). Nontributary Denver aquifer water rights determined in Case No. 99CW218, Water Div. No. 1, on Dec. 14, 2000 and pumped from wells allowed pursuant to that decree, including but not limited to that well currently permitted with well permit number 80739-F, a copy of which is in Exhibit B attached to the Application. a). The wells will be located on the Property at locations allowed by the decree in Case No. 99CW218. That well currently permitted with well permit number 80739-F is located in the NW 1/4 of the SW 1/4 section 32, T.10S., R.65W., 6th P.M., UTM coordinates 526056.79 Easting, 4331931.9 Northing, Zone B, NAD83. b). Appropriation date: not applicable. c). Amount decreed: 834.8 acre-feet may be withdrawn annually based on a 100-year aquifer life. Amount to be included in this plan: amounts sufficient to augment depletions under this augmentation plan. d). decreed uses: use, reuse, succession of uses, and after use, the water may be leased, sold, or disposed of for the following beneficial uses: municipal, domestic, industrial, commercial, irrigation, agricultural, livestock watering, recreational, fish and wildlife, fire protection and any other beneficial uses. Said water will be produced for immediate application to said uses, both on and off the subject property for storage and subsequent application to beneficial uses, for exchange purposes, for replacement of depletions resulting from the use of water from other sources and for augmentation purposes. Applicant does not intend to change a water right to provide a source of augmentation. c. Complete statement of plan for augmentation: All augmented structures will be located on the land that is the subject of the decree in Case No. 99CW218, as such may be amended. Applicant will augment actual out-of-priority depletions associated with the augmented storage structures described above including to fill, refill, and keep full on a continuous basis and replacement of evaporative losses and including any depletions associated with groundwater exposure, and to augment all actual stream

depletions attributable to pumping the "Not nontributary Dawson Wells" for the purposes described above. Pursuant to C.R.S. § 37-90-137 (9)(c.5), Applicant is required to replace actual stream depletions attributable to pumping of the not nontributary Dawson aquifer wells described above. The estimated annual stream depletions assuming annual fills and annual evaporative losses is 157 acre-feet. The actual amount of depletions augmented may vary from year to year but will not exceed the amount of augmentation water available pursuant to the approved augmentation plan. Depletions will be replaced by leaving a portion of the water pumped from the augmentation wells into the stream system during the first 100 years of operation. For the replacement of any injurious post pumping depletions that may be associated with the use of the "Not Nontributary Dawson Wells" and any depletions from out-of-priority inflows to the augmented storage structures after the first 100 years of operation, Applicant will reserve sufficient water from the nontributary Arapahoe or Denver aquifer water rights, accounting for actual depletions replaced during the pumping period, as necessary to replace any injurious depletions. Applicant also reserves the right to substitute other legally available augmentation sources for such post-pumping depletions upon further approval of the Water Court under its retained jurisdiction, and to add additional augmentation water to the augmentation plan pursuant to applicable law and the terms and conditions of a decree approving the augmentation plan. Even though this reservation is made, under the Court's retained jurisdiction Applicant reserves the right in the future to prove that post-pumping depletions will not be injurious. Upon entry of a decree in this case, Applicant shall be entitled to apply for and receive new well permits for the wells described herein and any replacement or additional wells, for the uses in accordance with the augmentation plan and in compliance with C.R.S. § 37-90-137. 5. The Property and associated water are not located within a designated groundwater basin. 6. Name and address of owner or reputed owner of the land upon which any new diversion or storage structure, or modification to any existing diversion or storage structure is or will be constructed or upon which water is or will be stored, including any modification to the existing storage pool: Applicant. Name of record owner of the Property: Applicant. Application – 9 pages.

CASE NUMBER 2026CW3171 (19CW3128; 2012CW185; 2000CW193; 1991CW55) **CONCERNING THE APPLICATION FOR WATER RIGHTS OF PUBLIC SERVICE COMPANY OF COLORADO, A COLORADO CORPORATION. APPLICATION FOR FINDING OF REASONABLE DILIGENCE FOR CONDITIONAL WATER RIGHT IN DENVER AND ADAMS COUNTIES**. 1. Name, Address, and Telephone Number of Applicant: Public Service Company of Colorado, a Colorado Corporation ("PSCo"), c/o Carolyn F. Burr, James M. Noble, Rachel L. Bolt, Matthew C. Nadel, Welborn Sullivan Meck & Tooley, P.C., 1401 Lawrence Street, Suite 1800, Denver, Colorado 80202, Telephone: (303) 830-2500. 2. Name of Structures: This application relates to the Cherokee Pipeline water right originally decreed in Division No. 1, Case No. 91CW55. On July 6, 2006, a decree was entered in Case No. 00CW193, finding that a portion of the water right had been made absolute, and that PSCo had exercised reasonable diligence with respect to the remainder of the conditional water right. Decrees were entered in Case Nos. 12CW185 on June 10, 2013, and 19CW3128 on October 26, 2020, finding that PSCo had exercised reasonable diligence with respect to the conditional water right. 3. Description of Conditional Water Rights: The Cherokee Pipeline water right was originally decreed on May 17, 1994, by the Division No. 1 Water Court in Case No. 91CW55. Water diverted under the Cherokee Pipeline water right is beneficially used at the Cherokee Generating Station (the "Cherokee Station"). See the map attached as Exhibit A depicting the locations of the structures related to this water right. 3.1. Point of Diversion: The Fisher Ditch Headgate. The Fisher Ditch diverts from the Fisher Ditch Headgate on the south bank of Clear Creek about four miles upstream from its confluence with the South Platte River. The Fisher Ditch diverts from a point in the Northwest 1/4 of the Northwest 1/4 of Section 17, Township 3 South, Range 68 West, in Adams County at a point that is approximately 60 feet east and 200 feet south of the Northwest corner of said section. The Fisher Ditch then flows in an easterly direction to Copeland Reservoir. Copeland Reservoir is located in the Southeast 1/4 of the Northeast 1/4 of Section 10, Township 3 South, Range 68 West in Adams County. The water is then delivered by gravity through the Cherokee Pipeline, a 24-inch pipe that delivers water from Copeland Reservoir to Cherokee Station. The Cherokee Station is located in the East 1/2 of Section 11, Township 3 South, Range 68 West. 3.2. Source: Clear Creek.

3.3. Appropriation Date: July 31, 1991. 3.4. Amount: 35.00 c.f.s. (18.76 c.f.s. Conditional, 16.24 c.f.s. Absolute). 3.5. Decreed Use: Direct application for industrial use at the Cherokee Station or for storage in the Copeland Reservoir for subsequent application at the Cherokee Station, as well as for all purposes, including potable, domestic, piscatorial, firefighting, municipal, augmentation, exchange or replacement purposes. This claim includes the right to re-use, successively use and use to extinction at the Cherokee Station all water diverted under this priority. 4. Prior Decrees Finding Reasonable Diligence and Making Water Right Partially Absolute: 4.1. On July 6, 2006, the Division 1 Water Court entered a decree in Case No. 00CW193, finding that 16.24 c.f.s. of the Cherokee Pipeline water right had been made absolute, and that PSCo had exercised reasonable diligence with respect to the remainder of the conditional water right. 4.2. On June 10, 2013, in Case No. 12CW185, and on October 26, 2020, in Case No. 19CW3128, the Division 1 Water Court entered decrees finding that PSCo had exercised reasonable diligence with respect to the remainder of the conditional water right. 5. Evidence of Reasonable Diligence Towards Completing Appropriation: 5.1. During the diligence period, PSCo has diverted and beneficially used water pursuant to the Cherokee Pipeline water right at the Cherokee Station. PSCo has diligently monitored stream conditions and priority calls on Clear Creek to allow it to divert water pursuant to this water right. 5.2. PSCo, in coordination with the Fisher Ditch Company, made improvements to Copeland Reservoir, which is used for the delivery of the subject water rights, including maintaining the dam, removing vegetation, and constructing an emergency spillway. 5.3. During the diligence period, PSCo participated as an objector in numerous Division 1 water court cases involving water rights and augmentation plans on Clear Creek in order to protect its existing water rights at the Cherokee Station. Some of these cases have concluded, and others are ongoing. Some of the cases in which PSCo has participated as an objector during the diligence period include Case Nos. 21CW3020, 2021CW3038, 21CW3042, and 26CW3066. 5.4. PSCo has coordinated with the Fisher Ditch Company to perform routine maintenance and repair work on the facilities and structures necessary for the development of the subject water rights, as well as major repairs to several piped sections of ditch from the diversion point on Clear Creek to approximately Federal Boulevard. 6. Names and Addresses of Owners of the Land Upon Which any New Diversion or Storage Structure, or Modification to any Existing Diversion or Storage Structure is or will be Constructed or upon Which Water is or will be Stored, Including any Modification to the existing Storage Pool. Not applicable. There are no other new or modified diversion or storage structures involved in this application. WHEREFORE, PSCo requests that the Court enter a decree finding that PSCo has satisfied the statutory standard of steady application of effort to complete the appropriation in a reasonably expedient and efficient manner under all the facts and circumstances, that reasonable diligence was performed during the diligence period in development of the conditional water rights, and that the remaining conditional portion of the water right should continue.

CASE NUMBER 2026CW3172 Name of Applicants: BLUE SKY III, LLLC, BLUE SKY INVLLC, and BAM FAM LLC, c/o Patrick Murphy, Manager, Blue Sky III, LLC and Blue Sky IV LLC, 6655 W. Prentice Avenue Littleton, CO 80132, and c/o Brett Murphy, Manager, Bam Fam LLC, 2179 Green Oaks Drive Greenwood Village, CO 80121. Direct all pleadings to: Scott E. Holwick, Esq., sholwick@lyonsgaddis.com, Bradley N. Kershaw, Esq., bkershaw@lyonsgaddis.com, and Catherine E. Fink, Esq., cfink@lyonsgaddis.com, Lyons Gaddis, P.C., PO Box 978 Longmont, CO 80502-0978; (303) 776-9900. **APPLICATION FOR CONDITIONAL WATER STORAGE RIGHT AND APPROVAL OF PLAN FOR AUGMENTATION INCLUDING WATER EXCHANGE PROJECT IN LARIMER COUNTY. 2. Description of Application**: Applicants own a commercial property located in Estes Park, Colorado, south of Moraine Avenue on the north side of the Big Thompson River, known as Trout Haven Estes Park ("THEP"). THEP contains an event center, multiple guest cabins, and a pond that is stocked with trout for recreational purposes. THEP has been maintained for similar uses dating back to 1933. By the Application in this case, Applicants seek approval of a conditional water storage right for the pond and approval of a plan for augmentation, including a conditional Water Exchange Project right, to replace evaporative depletions from the exposed pond surface area as further described below. **3. Claim for Conditional Water Storage Right**: Trout Haven Pond ("TH Pond"). 3.1. Legal description of structure:

TH Pond is located in the NW1/4 of the NE1/4 of Section 35 and the SW1/4 of the SE1/4 of Section 26, Township 5 North, Range 73 West of the 6th P.M., Larimer County, Colorado, UTM 454298 E; 4468392 N (Zone 13). Water is diverted into TH Pond through an inlet headgate structure on the Big Thompson River located in the NW1/4 of the NE1/4 of Section 35, Township 5 North, Range 73 West of the 6th P.M., Larimer County, Colorado, UTM 454296 E; 4468293 N (Zone 13), through which water is diverted and conveyed to TH Pond through a 275-foot-long channel. 3.2. Source: The Big Thompson River and natural drainage and seepage water tributary to the Big Thompson River. 3.3. Amount: 1.0 cfs, up to 2.0 acre-feet, CONDITIONAL, with the right to refill. 3.4. Uses: Recreation, aesthetic, piscatorial, wildlife, and maintenance of water levels. 3.5. Appropriation date: October 30, 2026, the date of filing this Application. **4. Name of Structure to be Augmented**: **TH** Pond as described above. 4.1. Legal description of structure: Described above in Paragraph 3.1. 4.2. Source: The Big Thompson River and natural drainage and seepage water tributary to the Big Thompson River. 4.3. Pond Surface Area: 0.36 acres. 4.4. Remarks: Water inflow to TH Pond is controlled by an inlet headgate on the Big Thompson River and an outlet headgate in the North-East section of the Pond which releases water directly to the Big Thompson River through a 24-inch outlet pipeline. Water is conveyed from the inlet headgate to the TH Pond via a 275-foot-long channel, of which the first 195 feet is unlined and the final 80 feet is a rectangular, concrete channel. These elements are shown on Exhibit A attached to the Application. Pond levels in TH Pond are regulated by inflows from the inlet headgate on the Big Thompson River, precipitation, and the outlet headgate which returns water to the Big Thompson River. To maintain water quality in the Pond for fish health, the inlet and outlet headgates remain open and are adjusted as needed to maintain a constant depth in the Pond. Therefore, TH Pond operates as a flow-through structure that does not impound runoff from precipitation or other tributary flows which would otherwise flow directly to the Big Thompson River. **5. Water Rights to be Used for Augmentation**: 5.1. Applicants entered into a Water Lease with the Town of Estes Park ("Town"), dated September 8, 2026 ("Water Lease"). Pursuant to the Water Lease, the Town will provide Applicants with up to 1.2 acre-feet annually of the Town's reusable Windy Gap Project Water ("WG Water") to be used as augmentation replacement water in the subject plan for augmentation. The water rights for the Windy Gap Project are in the Colorado River Basin and consist of the Windy Gap Pump, Pipeline, and Canal; Windy Gap Pump, Pipeline, and Canal First Enlargement; Windy Gap Pump, Pipeline, and Canal Second Enlargement; and Windy Gap Reservoir. These water rights were originally decreed in Case No. CA-1768, Grand County District Court on October 27, 1980, and in Case Nos. W-4001 and 80CW108, District Court, Water Division 5 on October 27, 1980. In addition, decrees awarding absolute water rights for municipal, industrial, irrigation, and recreational uses, including reuse, successive use, and use to extinction for the Windy Gap Reservoir; Windy Gap Pump, Pipeline and Canal; and Windy Gap Pump, Pipeline, and Canal First and Second Enlargements were entered in Case No. 88CW169, Water Division 5 (February 6, 1989) and Case No. 89CW298, Water Division 5 (July 19, 1990). Windy Gap Project water is introduced, stored, carried, and delivered in and through the components of the Colorado-Big Thompson Project, operated by the Northern Colorado Water Conservancy District. WG Water is imported foreign water that is available for use, reuse, and successive use until extinction. The Town's WG Water is part of an augmentation and exchange plan decreed by the District Court, Water Division 1 in Case No. 97CW126. 5.1.1. Reusable return flows from the Town's WG Water will be delivered to the Big Thompson River by direct releases from Lake Estes at the Lake Estes Outlet, which releases water from a point in the E1/2 of the NW1/4 of Section 29, Township 5 North, Range 72 West of the 6th P.M., Larimer County, Colorado, UTM 458615 E; 4469552 N (Zone 13). 5.1.2. Additional or alternative sources of augmentation replacement water may be added to the subject plan for augmentation pursuant to C.R.S. § 37-92-305(8)(c) or successor statutes. **6. Complete Statement of Plan for Augmentation**: 6.1. The TH Pond operates as a flow-through structure which temporarily stores surface water diverted from the Big Thompson River and natural drainage and seepage water tributary to the Big Thompson River, as described above. Operation of the TH Pond causes evaporative depletions to the Big Thompson River when water is being stored and passed through the system. Applicants will replace the evaporative depletions associated with TH Pond in time, location, and amount as necessary to prevent injury to other water rights pursuant to the subject plan for augmentation. 6.2. The total calculated evaporative surface area of the TH Pond is approximately 0.36 acres (thirty-six

hundredths of an acre). The annual total evaporation associated with the TH Pond has been calculated to be approximately 0.68 acre-feet (sixty-eight hundredths) per year. Stream depletions are assumed to occur within the same month of diversion with no lagged effect to the Big Thompson River. 6.3. Diversion of water into the TH Pond and storage and outflow from the TH Pond will be controlled and measured. All diversions, releases, and releases of augmentation water will be accounted for. 6.4. Applicants will determine the amount, timing, and location of all evaporative depletions from the TH Pond, and will replace those depletions as necessary to prevent injury to other water rights by delivery of the augmentation water rights listed above in Paragraph 5 to the Big Thompson River at the location described above in Paragraph 5.1.1 and at other locations as necessary to prevent injury. **7. Claim for Water Exchange Project Right**: Applicants claim a Water Exchange Project right whereby substitute supplies replaced to the Big Thompson River will be exchanged upstream to the TH Pond for replacement of evaporative depletions as described above. 7.1. Legal description of exchange reach: 7.1.1. Downstream terminus (exchange-from point): The Outlet of Lake Estes, which is the release point for reusable return flows from the Town's WG Water, described above in Paragraph 5.1.1. 7.1.2. Upstream terminus (exchange-to point): TH Pond, described above in Paragraph 3.1. 7.2. Source of substitute supply: Described above in Paragraph 5. 7.3. Exchange rate: Up to 0.20 cfs, CONDITIONAL. 7.4. Appropriation date: October 30, 2026, the date of filing this Application. **8. Name(s) and address(es) of owner(s) or reputed owners of the land upon which any new diversion or storage structure, or modification to any existing diversion or storage structure is or will be constructed or upon which water is or will be stored, including any modification to the existing storage pool**: No new or modified diversion or storage structures will be constructed as part of the plan for augmentation described herein. The TH Pond and its components are located on the THEP property owned by Applicants. WHEREFORE, Applicants request that the Court enter a decree (1) approving a conditional water storage right for the TH Pond; (2) approving the above-proposed plan for augmentation including conditional Water Exchange Project right; and (3) granting such other relief that it deems proper. (Number of pages in Application: 5 pages excluding 1 Exhibit).

CASE NUMBER 2026CW3173 LOGAN WELL USERS, INC. ("Logan" or "Applicant"), P.O. Box 1172, Sterling, Colorado, 80751, (970) 580-3832 Lawrence Custer Grasmick Jones & Donovan, LLP Attorneys for Applicant, Logan Well Users, Inc., Ryan M. Donovan, #44435 Regan M. O'Donnell, #62937 **APPLICATION FOR NEW GROUNDWATER RIGHTS AND TO ADD WELLS TO THE PLAN OF AUGMENTATION DECREED IN 03CW195 IN LOGAN, MORGAN AND WASHINGTON COUNTIES.** 2. Summary of Application. Logan is a Colorado nonprofit corporation which operates a plan for augmentation (the "Logan Plan") decreed in Case No. 03CW195 (the "03CW195 Decree"). This Application includes two claims by Logan. The first claim seeks to adjudicate two groundwater rights for existing Logan members, both of which are large regional feedyards that provide a reliable local market for surrounding farms and contribute significantly to the agricultural community of Logan County. The second claim seeks to add the two member wells to the Logan Augmentation Plan. APPLICATION FOR NEW GROUNDWATER RIGHTS 3. Name of Structure: McEndaffer Process Well (LWU ID No. 569) 3.1. Owner: Bret and Tina McEndaffer, 13681 CR 12, Merino, CO 80741. 3.2. Permit No.: Pending. 3.3. Location: In the SW1/4 SE1/4 of Section 5, Township 6 North, Range 53 West of the 6th P.M., Logan County, Colorado, 1,215 ft from the South section line and 2,115 ft from the East section line. UTM Coordinates (NAD 83 Zone 13) Easting 642257, Northing 4485895. 3.4. Appropriation Date: October 30, 2026. 3.5. Amount Claimed: 45 g.p.m., conditional. 3.6. Source: Groundwater tributary to South Platte River. 3.7. Use: Commercial use for a flaker facility and feedlot use. 4. Name of Structure: NA Timmerman Process Well (LWU ID No. 570) 4.1. Owner: Timmerman Feedyards LLC, P.O. Box 1826, Sterling, CO 80751. 4.2. Permit No.: Pending. 4.3. Location: In the NE1/4 NW1/4 of Section 9, Township 7 North, Range 53 West of the 6th P.M., Logan County, Colorado, 1,000 ft from the North section line and 2,275 ft from the West section line. UTM Coordinates (NAD 83 Zone 13) Easting 643222, Northing 4494801. 4.4. Appropriation Date: October 30, 2026. 4.5. Amount claimed: 45 g.p.m., conditional. 4.6. Source: Groundwater tributary to South Platte River. 4.7. Use: Commercial use for a flaker facility and feedlot use. Application to Add Wells to Augmentation Plan 5. Augmentation Plan. ¶49.6 of the 03CW195 Decree

allows the addition of wells to the plan subject to notice and terms and conditions. Applicant seeks to add the wells (individually a "Well" and collectively the "Wells") described in ¶¶ 3-4 above to the Logan Plan. Figure 1, attached, shows the location of the Wells. 6. Aquifer Parameters. The aquifer parameters and other information required by the 03CW195 Decree for each Well are set out in Exhibit 1. 7. Consumptive Use and Depletions. The consumptive use factors for each Well will be 100%, as required by ¶ 52.3.4 of the 03CW195 Decree because the water withdrawn by the Wells will be for commercial use (flaker facility) on a feedlot. 8. Well Permits. Pursuant to ¶ 49.7 of the 03CW195 Decree, Applicant shall ensure that all well permit files are complete, valid, and the uses proposed for the Wells in this Application are consistent with their decreed and permitted uses. If permits for the Wells do not meet this standard, valid well permits must be obtained by the well owners identified in this Application. 9. Water Rights to be used for Augmentation. All water rights decreed for augmentation, either directly or by exchange, recharge, and replacement in Case No. 03CW195, 07CW300, 13CW3162, 20CW3166, and any other replacement source added to the Logan Plan in the future. 10. Names and Address of Owners of the Structures. The names and addresses of the owners of the structures are set out above. This application consists of 4 pages.

CASE NUMBER 2026CW3174 (19CW3244) FORT MORGAN FARMS, LLC ("Applicant") c/o Robert L. Graves, 5821 West County Road 54E, Bellvue, Colorado 80512, Telephone: (970) 482-5789. Direct all pleadings to John P. Justus, Kate A. Bosh, CURTIS, JUSTUS, & ZAHEDI, LLC,1333 W. 120th Ave., Suite 302, Westminster, CO 80234, Tele: (303) 595-9441. Email: johnj@cjzwaterlaw.com; kateb@cjzwaterlaw.com. **APPLICATION FOR FINDINGS OF REASONABLE DILIGENCE IN MORGAN AND WELD COUNTIES. CONDITIONAL WATER RIGHT** 2. **Name of Structures and Water Right**. Fort Morgan Farms Augmentation Pipeline; the Fort Morgan Farms Augmentation Pipeline Water Right. 3. **Description of Conditional Water Right**. a. Date of Original Decree: January 2, 2014, Case No. 11CW40, District Court, Water Division 1 (the "11CW40 Decree"). b. Subsequent Diligence Decree: October 26, 2020, Case No. 19CW3244, District Court, Water Division 1 (the "19CW3244 Decree"). c. Legal Description of Point of Diversion: Pumping station diverting from the surface flow of the South Platte River located in Section 18, Township 4 North, Range 58 West of the 6th P.M., at a point located between a point in the Southwest Quarter of the Northeast Quarter of said Section 18, being 2,141 feet south of the north section line and 2,609 feet west of the east section line, and a point in the Northwest Quarter of the Southeast Quarter of said Section 18, being 2,899 feet south of the north section line and 1,663 feet west of the east section line ("Fort Morgan Farms Pumping Station"). The approximate location of the Fort Morgan Farms Pumping station is shown in Exhibit 1. d. Source: South Platte River. The Fort Morgan Farms Pumping Station shall only divert surface flows. e. Appropriation Date: December 31, 2010. f. Amount: 20 cfs, but not more than a total of 13,048 acre-feet during any period from November 1 to October 31 of the succeeding year, as measured at the Fort Morgan Farms Pumping Station, Conditional. g. Uses. The water will be diverted into the Fort Morgan Farms Augmentation Pipeline for delivery for direct irrigation, and recharge of the alluvial aquifer of the South Platte River for augmentation and replacement purposes, including replacement of return flows. The water that is used for recharge of the alluvial aquifer of the South Platte River for augmentation and replacement purposes will be delivered from the pipeline into the Recharge Facilities described in the Plan for Augmentation set forth in the 11CW40 Decree, and the resulting accretions accruing to the South Platte River will be used for augmentation and replacement purposes as set forth in the 11CW40 Decree. When used for direct irrigation purposes, the water will be applied to lands lying in the West Half of Section 30, and in the Northwest Quarter and the South Half of Section 31, Township 4 North, Range 58 West of the 6th P.M.; lands lying in the Northwest Quarter of Section 6, Township 3 North, Range 58 West of the 6th P.M.; and lands lying in the South Half of Section 25, Township 4 North, Range 59 West of the 6th P.M. **CONDITIONAL APPROPRIATIVE RIGHTS OF SUBSTITUTION AND EXCHANGE** 4. **Name of Water Right**. Fort Morgan Farms Pipeline Exchange. 5. **Description of Exchange.** a. General description: The Fort Morgan Farms Pipeline Exchange will be used by the Applicant as a means of diverting, by exchange, fully consumable water accruing to the South Platte River associated with the use and operation of the Fort Morgan Company Augmentation Water Right, confirmed in the Decree entered on September 16, 2008 in Case No.

2000CW261 by the District Court in and for Water Division 1 ("00CW261 Decree"), and described in paragraph 16.c of the 11CW40 Decree, at the Fort Morgan Farms Pumping Station, for delivery to the Recharge Facilities described in paragraph 18 of the 11CW40 Decree, for the uses described in paragraph 15 of the 11CW40 Decree. b. Exchange reach and points of substitution and exchange: i. Exchange-from point: The Northeast Quarter of Section 34, Township 5 North, Range 55 West of the 6th P.M., which is the furthest downstream point of introduction of substitute supply from the fully consumable water attributable to the 00CW261 Decree. ii. Exchange-to point: The Fort Morgan Farms Pumping Station, described in paragraph 3.b of this Application, which is the point of diversion by exchange from the South Platte River. c. Water and water rights to be used as the substitute supply: Fully consumable water available to the Applicant accruing to the South Platte River associated with the use and operation of the Fort Morgan Company Augmentation Water Right, confirmed in the 00CW261 Decree and described in paragraph 16.c of the 11CW40 Decree. d. Appropriation date: December 31, 2010. e. Amount: 20 cfs, conditional. f. Uses: The water will be used in the Plan for Augmentation described in paragraph 15 of the 11CW40 Decree. 6. Outline of what has been done toward completion. During the diligence period the Applicant has taken significant steps toward completion of the appropriations and the application of water to beneficial use, including but not limited to the following: (1) conducting in-house engineering design and planning for the pump station and augmentation ponds; (2) touring existing pumping facilities to assess successful design and operational approaches and inform the design and development of the pumping facilities; (3) installing infiltration chambers along the riverbank, at a materials cost of $4,790.02, with an estimated value of $10,000 for in-house installation labor and equipment, including excavator use; (4) developing a functional description for the pumping automation system; (5) improving the riverbank infiltration chambers and access road including materials, labor, and equipment, at a cost of $27,069; (6) improving the project access road, installing a cattle guard, and constructing fencing to facilitate access to and development of the project site, at a total cost of $35,554; (7) purchasing pumps for the pumping facilities at a cost of $33,908; and (8) purchasing steel pipe and fittings for the pumping infrastructure at a cost of $7,233. 7. Names(s) and address(es) of owner(s) or reputed owners of the land upon which any new diversion or storage structure, or modification to any existing diversion or storage structure is or will be constructed or upon which water is or will be stored, including any modification to the existing storage pool: Fort Morgan Farms, LLC, 5821 West County Road 54E, Bellvue, Colorado, 80512; Mark A. and David E. Arndt 13091 Highway 144, Fort Morgan, Colorado 80701; Weimer Farms LLC, 20405 County Road 13, Fort Morgan, Colorado 80701; High Plains Grazing Association, 5821 West County Road 54E, Bellvue, Colorado 80512. WHEREFORE, Applicant requests the Court enter a decree finding that Applicant has exercised reasonable diligence in the development of the Fort Morgan Farms Augmentation Pipeline Water Right and the Fort Morgan Farms Pipeline Exchange and continuing the subject conditional water rights in full force and effect for an additional diligence period. (5 pages, 1 exhibit)

CASE NUMBER 2026CW3175 BIG LOOP RANCH LLC, 6597 S Highway 83, Franktown, Colorado 80116. Direct all pleadings and correspondence to Adam C. Davenport, Horizons West Legal, LLC, 2679 W. Main Street, Unit 300-796, Littleton, Colorado 80210 (970) 217-7387. **APPLICATION FOR UNDERGROUND WATER RIGHTS FROM NONTRIBUTARY AND NOT-NONTRIBUTARY SOURCES IN THE NONTRIBUTARY LOWER DAWSON, DENVER, ARAPAHOE AND LARAMIE-FOX HILLS AQUIFERS AND THE NOT-NONTRIBUTARY UPPER DAWSON AQUIFER IN DOUGLAS COUNTY**. Subject Property. An approximately 102-acre tract of land situated in the Southeast 1/4 of Section 13, Township 9 South, Range 66 West of the 6th Principal Meridian, and in the Southwest 1/4 of the Southwest 1/4 of Section 18, Township 9 South, Range 65 West of the 6th P.M., Douglas County, State of Colorado, as shown on **Exhibit A** (the "Subject Property"). Lien Holder Certification; Deed. Applicant certifies that there is no mortgage or lien holder that has an interest in the Subject Property, therefore no notice is required under C.R.S. § 37-92-302(2)(b). A copy of Applicant's vesting deed is provided as **Exhibit B**. Well Permits. There is one existing well completed into the Upper Dawson Aquifer on the Subject Property under Well Permit Number 33054 ("Well 33054"), which will continue operating under its existing permit. Additional well permits will be applied for prior to

construction of additional wells. Applicant requests the ability to produce the full legal entitlement from the Denver Basin aquifers underlying the Subject Property through any combination of wells. Applicant requests that these wells be treated as a well field. Source of Water Rights. The Upper Dawson Aquifer is not-nontributary as defined in C.R.S. § 37-90-103(10.7), and the Lower Dawson, Denver, Arapahoe, and Laramie-Fox Hills aquifers are nontributary as defined in C.R.S. § 37-90-103(10.5). Estimated Volume. Applicant requests a vested right for the withdrawal of all legally available groundwater in the Denver Basin aquifers underlying the Subject Property. Applicant desires to leave no additional groundwater unadjudicated, except the volume specified for Well 33054, as described below. Applicant estimates the following volumes may be available for withdrawal, based on a 100-year withdrawal period:

Aquifer	Annual Volume (Acre-feet)	Total Volume (Acre-feet)
Upper Dawson (NNT)*	39.9	4,090.20
Lower Dawson (NT)	32.9	3,286.44
Denver (NT)	43.7	4,371.41
Arapahoe (NT)	54.0	5,403.14
Laramie-Fox Hills (NT)	29.1	2,913.12

*The total estimated volume in the not-nontributary Upper Dawson Aquifer is 40.9 acre-feet per year. 1 acre-foot per year is reserved for existing Well Permit No. 33054.

Proposed Uses. Groundwater withdrawn from the not-nontributary and nontributary aquifers underlying the Subject Property will be used, reused, and successively used to extinction for all allowable beneficial uses, including, but not limited to, domestic (including in-house use), commercial, irrigation, stock watering, fire protection, recreational, fish and wildlife, and augmentation purposes (including storage). The water may be immediately used or stored for subsequent use, used for exchange purposes, for direct replacement of depletions, and for other augmentation purposes, including taking credit for all return flows resulting from the use of such water for augmentation of, or as an offset against, any out-of-priority depletions. The water may be leased, sold, or otherwise disposed of for all the above uses both on and off the Subject Property. Jurisdiction. The Court has jurisdiction over the subject matter of this application pursuant to C.R.S. §§ 37-90-137(6), 37-92-203(1), and 37-92-302(2). Remarks. Applicant claims the right to withdraw more than the average annual amounts estimated in Paragraph 6 above pursuant to Rule 8A of the Statewide Rules, 2 C.C.R. 402-7. Applicant requests the right to revise the estimates upward or downward, based on better or revised data, without the necessity of amending this application or republishing the same. Applicant waives the 600-feet well spacing requirement, pursuant to C.R.S. § 37-90-137(2)(b), for any wells to be located on the Subject Property in relation to one another. This waiver does not apply to wells not located on the Subject Property and/or not owned by Applicant. Applicant requests the Court approve the above underground water rights, find that Applicants have complied with C.R.S. § 37-90-137(4) and water is legally available for withdrawal, find there will be no material injury to the owners of or persons entitled to use water under any vested water right or decreed conditional water rights, and grant such other and further relief as is appropriate. (Application is 4 pages)

CASE NUMBER 2026CW3176 DANIEL R GROSS AND KATHRYN M GROSS, 27580 Rainbow Circle, Elizabeth, CO 80107. Please send all correspondence to Philip E. Lopez, Eric K. Trout, FAIRFIELD AND WOODS, P.C., 1801 California Street, Suite 2600, Denver, CO 80202. **APPLICATION FOR UNDERGROUND WATER RIGHTS FROM NONTRIBUTARY AND NOT NONTRIBUTARY SOURCES AND APPROVAL OF PLAN FOR AUGMENTATION, IN THE NONTRIBUTARY LOWER DAWSON, DENVER, ARAPAHOE AND LARAMIE-FOX HILLS AQUIFERS AND THE NOT-NONTRIBUTARY UPPER DAWSON IN ELBERT COUNTY**. 2. Subject Property: A parcel totaling approximately 40.16 acres generally located in the SE1/4 of the NW1/4 of Section 15, Township 9 South, Range 65 West of the 6th P.M., also known as 27580 Rainbow Circle, Elizabeth, CO, 80107, as shown on **Exhibit A** ("Subject Property"). 3. Lien Holder Certification: Applicants have provided notice to all mortgage or lien holders as required under C.R.S. § 37-92-302(2)(b), as follows: Onity Mortgage, PO

Box 24738, West Palm Beach, FL 33416. 4. Well Permits: The Subject Property is being divided into an approximately 30-acre parcel ("Parcel A") and an approximately 10-acre parcel ("Parcel B"). There is one existing exempt Upper Dawson well on the Subject Property, permitted under Well Permit No. 192283 pursuant to C.R.S. § 37-92-602(3)(b)(II)(A) (the "Existing Exempt Well"). The Existing Exempt Well is located on Parcel A, will remain the only well serving Parcel A, and will continue to operate under its existing permit and uses, with its presumption of noninjury maintained pursuant to C.R.S. § 37-92-602(3)(b)(IV). It is not a structure to be augmented under this plan. Applicants will apply for a well permit for each additional well on Parcel B prior to its construction. 5. Source of Water Rights: The Upper Dawson Aquifer is not-nontributary ("NNT") as defined in C.R.S. § 37-90-103(10.7), and the Lower Dawson, Denver, Arapahoe, and Laramie-Fox Hills aquifers are nontributary ("NT") as defined in C.R.S. § 37-90-103(10.5). 6. Estimated Volumes: Applicants desire to reserve 4 acre-feet per year for 300 years, 1,200 acre-feet total, from the NNT Upper Dawson Aquifer for any existing or future exempt purposes. Applicants estimate the following volumes may be available for withdrawal:

Aquifer	Estimated Annual Volume 100 Years (acre-feet)	Estimated Annual Volume 300 Years (acre-feet)	Estimated Total Volume (acre-feet)
Upper Dawson (NNT)*	7.01	2.34	701
Lower Dawson (NT)	11.70	3.90	1,170
Denver (NT)	16.27	5.42	1,627
Arapahoe (NT)	16.13	5.38	1,613
Laramie-Fox Hills (NT)	11.55	3.85	1,155

* The total estimated volume available in the NNT Upper Dawson is 19.01 acre-feet per year for 100 years, 6.34 acre-feet per year for 300 years, or 1,901 acre-feet total. 7. Proposed Uses: Groundwater withdrawn from the NNT and NT aquifers underlying the Subject Property will be used, reused, and successively used to extinction for all allowable beneficial uses, including, but not limited to, domestic, including in-house use, commercial, irrigation, stock watering, fire protection, recreational, fish and wildlife, and augmentation purposes, including storage. The water may be immediately used or stored for subsequent use, used for exchange purposes, for direct replacement of depletions, and for other augmentation purposes, including taking credit for all return flows resulting from the use of such water for augmentation of, or as an offset against, any out-of-priority depletions. The water may be leased, sold, or otherwise disposed of for all the above uses both on and off the Subject Property. 8. Jurisdiction: The Court has jurisdiction over the subject matter of this application pursuant to C.R.S. §§ 37-90-137(6), 37-92-203(1), 37-92-302(2). 9. Summary of Plan for Augmentation: 9.1. Groundwater to be Augmented: 1.4 acre-feet per year of NNT Upper Dawson Aquifer groundwater for 300 years. 9.2. Water Rights to be Used for Augmentation: Return flows from the use of not-nontributary and nontributary groundwater and direct discharge of nontributary groundwater. 9.3. Statement of Plan for Augmentation: The NNT Upper Dawson Aquifer groundwater will be used in one, or more, wells to provide in-house use in up to two (2) single-family dwellings or their equivalent (0.6 acre-feet per year), outdoor irrigation of up to 14,000 square-feet (0.7 acre-feet per year), watering of 8 large domestic animals (0.1 acre-feet per year), fire protection, and storage before use anywhere on the Subject Property. Applicants reserve the right to amend the amount and uses without amending the application or republishing the same. Sewage treatment for in-house use will be provided by non-evaporative septic systems. Return flow from in-house use will be approximately 90% of that use and return flow from irrigation use will be approximately 15% of that use. During pumping Applicants will replace actual depletions pursuant to C.R.S. § 37-90-137(9)(c.5). Depletions occur to the South Platte River stream system and return flows accrue to that stream system and are sufficient to replace actual depletions while the subject groundwater is being pumped. Applicants will reserve an equal amount of nontributary groundwater underlying the Subject Property to meet post-pumping augmentation requirements. Applicants request the Court approve the above underground water rights and augmentation plan, find that Applicants have complied with C.R.S. § 37-90-137(4) and water is legally available for withdrawal, find

there will be no material injury to the owners of or persons entitled to use water under any vested water right or decreed conditional water right, and grant such other and further relief as is appropriate. (5 pages with exhibit)

CASE NUMBER 2026CW3177 THE LOWER SOUTH PLATTE WATER CONSERVANCY DISTRICT WATER ACTIVITY ENTERPRISE ("Lower" or "Applicant"), 615 S. 10th Avenue, Sterling, Colorado 80751. Telephone: (970) 522-1378. Lawrence Custer Grasmick Jones & Donovan, LLP Attorneys for Applicant, Lower South Platte Water Conservancy District Water Activity Enterprise, Ryan M. Donovan, #44435 Regan M. O'Donnell, #62937 **APPLICATION FOR NEW CONDITIONAL GROUNDWATER RIGHTS AND TO ADD WATER RIGHTS TO PLAN FOR AUGMENTATION DECREED IN 02CW320 IN SEDGWICK COUNTY**. 2. Summary of Application. Lower operates a plan for augmentation ("Lower Plan") decreed in Case No. 2002CW320 (the "02CW320 Decree"). This Application seeks approval of a new conditional groundwater right and seeks approval to add the new groundwater right, and an existing, previously decreed reservoir, to the Lower Plan. APPLICATION FOR NEW GROUNDWATER RIGHTS 3. Name of Structure. Chamberlain Well (LSPWCD WAE No. 79). 3.1. Owner: Mason and Corie Chamberlain, PO Box 425, Wray, Colorado 80758 3.2. Location of Well. SE1/4 of the NW1/4, Section 7, Township 11 North, Range 43 West of the 6th P.M. UTM Coordinates (NAD 83 Zone 13). Easting 737331; Northing 4536567. 3.3. Source. Groundwater tributary to the South Platte River. 3.4. Appropriation Date. October 30, 2026. 3.5. Amount. 45 g.p.m, conditional. 3.6. Use. Industrial use at a concrete plant and stock watering. 3.7. Remarks: The Chamberlain Well water right sought in this Application will be diverted at an existing well, Permit No. 74126-A, which is an exempt well permitted for livestock watering on a farm or ranch. A new well permit will be obtained permitting the additional uses claimed in this Application. APPLICATION TO ADD THE WELL AND AN EXISTING, DECREED RESERVOIR TO THE LOWER PLAN 4. Addition to the Lower Plan. ¶ 21.6 of the 02CW320 Decree allows for the addition of wells to the Lower Plan, subject to notice and terms and conditions. Applicant seeks to add the Chamberlain Well to the Lower Plan, as well as the existing reservoir described in ¶ 4.1 below, to the Lower Plan. Figures 1 and 2, attached, shows the location of the structures. 4.1. Existing, Previously Decreed Structure to be added to the Lower Plan: 4.1.1. Name of Structure: Johnson Lake (LSPWCD WAE No. 80). 4.1.2. Name and Address of Structure Owner. W6, LLC, Kyle Watchorn, P.O. Box 385, Dalton, Nebraska 69131. 4.1.3. Prior Decree: 05CW310, entered on August 3, 2006. 4.1.4. Location of Structure. E1/2 of Section 15, Township 11 North, Range 45 West of the 6th P.M., with the center of the main dam being approximately 1800 feet West of the East section line and 1550 feet South of the North section line. 4.1.5. Source. Natural springs tributary to the South Platte River. 4.1.6. Amount Claimed. 80 acre-feet, absolute. 4.1.7. Appropriation Date. Johnson Lake, as described in the decree entered Case No. 05CW310 ("05CW310 Decree"), is comprised of four structures that create several lakes or ponds, identified as Johnson Lake, Irrigation Pond, Trout Pond, and New Reservoir. The New Reservoir is not part of this Application and is not being added to the Lower Plan by this Application. In Case No. 05CW310, a December 31, 1939 appropriation date was adjudicated for the main body of Johnson Lake, and a December 31, 1941 appropriation date was adjudicated for the Trout Pond and Irrigation Pond portions of Johnson Lake. 4.1.8. Use. Storage for recreation, piscatorial, wetland and wildlife habitat, livestock watering and irrigation of 130 acres in the E1/2 of Section 15 and the SE1/4 of Section 10, Township 11 North Range 45 West. 4.1.9. Remarks. This Application seeks to add Johnson Lake, including the Johnson Lake, Trout Pond, and Irrigation Pond structures as described in the 05CW310 Decree, to the Lower Plan. ¶ 8 of the 05CW310 Decree states that all water stored out of priority, and for which depletions are not replaced pursuant to a lawful augmentation plan, shall be promptly released to the stream without use. By this Application, Lower seeks to add Johnson Lake, Trout Pond, and Irrigation Pond to the Lower Plan and, following such approval, will replace evaporative losses at Johnson Lake, Trout Pond, and Irrigation Pond, as well as augment out of priority diversions into the same structures, pursuant to an agreement with the owners of Johnson Lake. 5. Aquifer Parameters. The aquifer parameters and other information required by the 02CW320 Decree for the Chamberlain Well and Johnson Lake (Johnson Lake, Trout Pond, and Irrigation Pond) are set out in Exhibit 1. 6. Consumptive Use and Depletions. Pursuant to

¶ 25.6.3 of the 02CW320 Decree, the consumptive use factors for the Chamberlain Well and Johnson Lake (Johnson Lake, Trout Pond, and Irrigation Pond) will be 100%. 7. Water Rights to be Used for Augmentation. The water rights to be used for augmentation will be all water rights approved for augmentation in the Lower Plan, and any other sources legally added to the Lower Plan in the future. 8. Names and Address of Owners of the Structures. The names and addresses of the owners of the structures are set out above. This application consists of 4 pages.

CASE NUMBER 2026CW3178 THE LOWER LATHAM RESERVOIR COMPANY ("LLRC or "Applicant"**)**, 8209 West 20th Street, Suite A, Greeley, CO 80634, (970) 353-6611. Please send all further pleadings to: Whitney Phillips and Sara J.L. Irby, Fischer, Brown, Bartlett, Larsen & Irby, P.C., 1319 East Prospect Road, Fort Collins, CO 80525. **APPLICATION FOR FINDING OF REASONABLE DILIGENCE IN WELD COUNTY**. 2. Application. With this Application, LLRC seeks findings of reasonable diligence of the conditional water rights adjudicated in Consolidated Cases 03CW047 and 06CW291 ("Original Decree"). The Original Decree authorized a plan for augmentation ("Augmentation Plan"), the change of 29.5 shares in the Lower Latham Ditch, and three conditional water rights, which are the subject of this Application. The conditional rights are: 1) ground water rights for two augmentation wells ("Augmentation Wells"), 2) surface water rights used for augmentation and replacement of well-pumping depletions ("Latham Augmentation Right"), and 3) appropriative rights of substitution and exchange ("Latham Exchange Rights") on the South Platte River and Beebe Draw. 3. Previous Decrees. 3.1. Date of Original Decree: November 25, 2012, Consolidated Case Nos. 03CW047/06CW291, District Court, Water Division 1, State of Colorado. 3.2. Finding of Reasonable Diligence: October 16, 2020, Case No. 18CW3194, District Court, Water Division 1, State of Colorado. 4. Description of Conditional Water Rights. 4.1. Ground Water Rights. for the Augmentation Wells 4.1.1. Jurgens Well 1-12253. 4.1.1.1. Location. The Jurgens Well 1-12253 is an existing well located in the SW 1/4 of Section 8, Township 5 North, Range 64 West, 6th P.M., at a distance of 1,565 feet from the west section line and 198 feet from the south section line of said Section 8. 4.1.1.2. Depth. 48 feet. 4.1.1.3. Source. Ground water tributary to the South Platte River. 4.1.1.4. Date of Appropriation. November 30, 2007. 4.1.1.5. Amount. 2.67 cfs, CONDITIONAL. 4.1.1.6. Use. Augmentation and replacement of depletions from wells included in the Augmentation Plan. 4.1.2. Jurgens Well 3-6606. 4.1.2.1. Location. The Jurgens Well 3-6606 is an existing well located in the SE 1/4 of Section 8, Township 5 North, Range 64 West, 6th P.M., at a distance of 2,624 feet from the east section line and 193 feet from the south section line of said Section 8. 4.1.2.2. Depth. 67 feet. 4.1.2.3. Source. Ground water tributary to the South Platte River. 4.1.2.4. Date of Appropriation. November 30, 2007. 4.1.2.5. Amount. 1.56 cfs, CONDITIONAL. 4.1.2.6. Use. Augmentation and replacement of depletions from wells included in the Augmentation Plan. 4.2. Latham Augmentation Right. 4.2.1. Name of structure used for diversion: Lower Latham Ditch. 4.2.2. Location: The location of the diversion is the location of the existing headgate of the Lower Latham Ditch on the east bank of the South Platte River in the NW 1/4 of the NE 1/4 of Section 31, Township 5 North, Range 65 West, 6th P.M. 4.2.3. Source: South Platte River. 4.2.4. Date of Appropriation: November 30, 2007. 4.2.5. Amount: 180 cfs, CONDITIONAL. 4.2.6. Use: Augmentation and replacement of depletions from wells included in the Augmentation Plan approved in the Original Decree by delivering water diverted under the Latham Augmentation Right pursuant to Paragraph 32.9 of the Original Decree to generate accretions, and such accretions will either be placed to direct use or use by substitution and exchange in the appropriative rights of substitution and exchange decreed in the Original Decree. Applicant's rights to reuse and successively use the water diverted pursuant to the this water right shall be limited to the diversion by exchange of Excess Recharge Accretions from the delivery of this water right to recharge sites determined in accordance with Paragraph 29.3 of the Original Decree. Excess Recharge Accretions attributable to this water right may also be stored in Lower Latham Reservoir by operation of the exchange to Lower Latham Reservoir described in Paragraph 10 of the Original Decree. 4.3. Latham Exchange Rights. 4.3.1. Exchange reaches. The exchange reaches for the Latham Exchange Rights are described by the following Exchange-From Points and Exchange-To Points. An exchange matrix showing the exchanges is attached to the Original Decree as Exhibit E. 4.3.2. Exchange-From Points: 4.3.2.1. A point on the South Platte River immediately upstream from the Patterson Ditch river headgate located in the NE 1/4 of the NE 1/4 of Section 21, Township 5

North, Range 65 West, 6th P.M. 4.3.2.2. A point on the South Platte River immediately upstream from the Highland Ditch (aka Plumb Ditch) river headgate in the E 1/2 of Section 14, Township 5 North, Range 65 West, 6th P.M. 4.3.2.3. A point on the South Platte River immediately upstream from the Empire Inlet Canal River Headgate in the SW 1/4 of the SW 1/4 of Section 19, Township 5 North, Range 63 West, 6th P.M. 4.3.2.4. A point on the South Platte River immediately upstream from the Riverside Inlet Canal river headgate in the SW 1/4 of the SW 1/4 of Section 20, Township 5 North, Range 63 West, 6th P.M. 4.3.2.5. A point on the South Platte River immediately upstream from the Bijou Canal river headgate in the NE 1/4 of the NE 1/4 of Section 13, Township 4 North, Range 63 West, 6th P.M. 4.3.3. Exchange-To Points: 4.3.3.1. The river headgate of the Lower Latham Ditch located in the NW 1/4 of the NE 1/4 of Section 31, Township 5 North, Range 65 West, 6th P.M. 4.3.3.2. The Lower Latham Reservoir, located in parts of Section 34, and Section 35, Township 5 North, Range 65 West, and Sections 2 and 3, Township 4 North, Range 65 West, 6th P.M.4.3.4. Source: The Latham Exchange Rights appropriate exchange potential in the South Platte River and the Beebe Draw in the exchange reaches described in Paragraph 4.3.1 above. 4.3.5. Date of Appropriation: November 30, 2007. 4.3.6. Amounts: 4.3.6.1. For exchanges to the Lower Latham Ditch: 35 cfs, CONDITIONAL. 4.3.6.2. For exchanges to the Lower Latham Reservoir: 21 cfs, CONDITIONAL. 4.3.7. Sources of Substitute Water Supply: The sources of substitute water supply for the Latham Exchange Rights are Excess Recharge Accretions (as defined in Paragraph 29.3 of the Original Decree) derived from water diverted pursuant to the LLDC Shares (as defined in Paragraph 7 of the Original Decree), the Latham Augmentation Right, and the UDC Shares (as described in Paragraph 14.2.6.2 of the Original Decree), as well as water delivered directly to the Cache la Poudre and/or South Platte River attributable to the GIC Shares (described in Paragraph 14.2.6.1 of the Original Decree). Applicant shall not use the UDC Shares or the GIC Shares in the Latham Exchange Rights unless and until they have been approved for such use by a decree of this Court or, if available pursuant to the terms of C.R.S. § 37-92-308(4), a substitute water supply plan approved by the State Engineer, and added to the augmentation plan pursuant to Paragraph 32.3 of the Original Decree. 4.3.8. Use: Augmentation and replacement of depletions from wells included in the Augmentation Plan approved in the Original Decree. 5. Absolute Amounts Decreed in Case No. 18CW3194: 5.1. Latham Augmentation Right. 5.1.1. Date Applied to Beneficial Use: April 11, 2016. 5.1.2. Amount: 7.83 cfs 5.1.3. Use: Augmentation and replacement uses described in Paragraph 4.2.6 above. 5.1.4. Location: diverted at the Lower Latham Ditch river headgate and delivered to the Schmidt Recharge Facility. 5.2. Latham Exchange Rights. 5.2.1. From Bijou Canal Headgate to Lower Latham Reservoir (Exchange E-2). 5.2.2. Date Applied to Beneficial Use. August 7, 2016. 5.2.3. Amount. 16 cfs. 5.2.4. Use. Augmentation and replacement uses by exchange as described Paragraph 4.3.8 above. 5.2.5. Location. Reach E-2 (in the Exchange Matrix attached as Exhibit E to the Original Decree): from a point on the South Platte River immediately upstream from the Bijou Canal river headgate in the NE 1/4 of the NE 1/4 of Section 13, Township 4 North, Range 63 West, 6th P.M. (Reach E) to the Lower Latham Reservoir located in parts of Section 34, and Section 35, Township 5 North, Range 65 West, and Sections 2 and 3, Township 4 North, Range 65 West, 6th P.M. 6. Claim to Continue Remaining Conditional Rights: Applicant seeks to continue the following rights and portions of rights as conditional: The conditional Ground Water Rights for the Augmentation Wells; the remaining conditional 172.17 cfs of the Latham Augmentation Right; the remaining conditional 5 cfs for the Latham Exchange Right for Reach E-2 described above in Paragraph 5 above; and the Conditional Latham Exchange Rights for remaining reaches shown in Exhibit E of the Original Decree. 7. Detailed Outline of Continued Diligence: All of the conditional water rights decreed in the Original Decree are to be used in and as part of the Augmentation Plan. During this diligence period, Applicant has continued operate the Augmentation Plan each year during the diligence period, including the preparation and filing of numerous quota reports and projection, and updates, as well as continuing to divert water under the Latham Augmentation Right and under the Latham Exchange Right in Reach E-2. Applicant has also continued to develop and improve the Augmentation Plan and otherwise demonstrate diligence including but not limited to the following: Applicant obtained a decree to remove certain wells from the Augmentation Plan in Case No. 19CW3056. Applicant has been or is involved in numerous court cases for the purpose of protecting and defending its water rights and irrigation system, including the water rights and Augmentation Plan decreed in the Original Decree. Applicant has

also expended considerable effort and money developing a lined in-situ or gravel pit that, in part, will be used to help provide and manage augmentation water to the Augmentation Plan. Since 2020, Applicant has expended not less than $500,000 in legal fees and engineering fees on these matters and $150,000 to develop additional water sources for the Augmentation Plan. 8. Proof and Additional Details. Applicant reserves the right to provide additional details and proof of diligence as requested or deemed necessary by the Court. 9. Right to Supplement. Applicant reserves the right to supplement this Application with additional information on Applicant's work and expenses related to its continued diligence toward making absolute the conditional rights described herein. 10. Notice Requirement, Section 37-92-302(2)(b). Names(s) and address(es) of owner(s) or reputed owners of the land upon which any new diversion or storage structure, or modification to any existing diversion or storage structure is or will be constructed or upon which water is or will be stored, including any modification to the existing storage pool: Not applicable. (Application consists of 7 pages).

CASE NUMBER 2026CW3179 Applicant. **THE CENTRAL COLORADO WATER CONSERVANCY DISTRICT, THE GROUNDWATER MANAGEMENT SUBDISTRICT OF THE CENTRAL COLORADO WATER CONSERVANCY DISTRICT, AND THE WELL AUGMENTATION SUBDISTRICT OF THE CENTRAL COLORADO WATER CONSERVANCY DISTRICT**, 3209 West 28th Street, Greeley, CO 80634, (970) 330-4540 with all correspondence connected herewith being sent to Applicant's counsel, Bradley C. Grasmick or David P. Jones, Lawrence Custer Grasmick Jones & Donovan, LLP., 5245 Ronald Regan Blvd., Suite 1, Johnstown, CO 80534, 970-622-8181. **APPLICATION FOR FINDING OF REASONABLE DILIGENCE AND TO MAKE WATER RIGHTS ABSOLUTE IN PART IN THE COUNTY OF BROOMFIELD AND THE CITY AND COUNTY OF DENVER AND IN BOULDER, JEFFERSON, DOUGLAS, WELD, MORGAN, LARIMER, ADAMS, AND ARAPAHOE COUNTIES**. Collectively, the district and two subdistricts are referred to herein as "Central" or "Applicant." Where reference is made to the subdistricts, the Groundwater Subdistrict is referred to as "GMS" and the Well Augmentation Subdistrict is referred to as "WAS."2. Original and Subsequent Decrees. Below is a description of the conditional water rights from the "Original Decree" in Case No. 05CW331/03CW437 dated October 7, 2011; and Subsequent Decree: Case No. 17CW3165, dated October 12, 2020. **RECHARGE PROJECTS AND NEW CONDITIONAL RECHARGE WATER RIGHTS** 2. Bee Line Ditch and Big Thompson & Platte River Ditch Recharge Project and New Conditional Recharge Water Right. 3.1. Points of Diversion. 3.1.1. Headgate of the Bee Line Ditch. On the Little Thompson River in the NW 1/4 of the SW 1/4 of the NE 1/4 of Section 10, Township 4 North, Range 67 West of the 6th P.M. 3.1.2. Headgate of the Big Thompson & Platte River Ditch. On the Big Thompson River in the SW 1/4 of the NE 1/4 of the NE 1/4 of Section 4, Township 4 North, Range 67 West of the 6th P.M. 3.2. Sources. The Little Thompson River and Big Thompson River. 3.3. Diversion Rate and Volume. 3.3.1. 40 c.f.s, conditional at the headgate of the Bee Line Ditch. Diversions shall be measured at the location indicated on the table in ¶24 of the Original Decree, the approximate location of which is shown in Figure 1 of the Original Decree. 3.3.2. 40 c.f.s., conditional at the headgate of the Big Thompson & Platte River Ditch. Diversions shall be measured at the location indicated on the table in ¶24 of the Original Decree, the approximate location of which is shown in Figure 1 of the Original Decree. 3.3.3. Combined diversions under the new recharge water right described in ¶9 of the Original Decree at the headgate of the Bee Line Ditch and the headgate of the Big Thompson & Platter River Ditch, shall not exceed 40 c.f.s. and 1000 acre-feet in any water year. 1.1. Date of Appropriation. December 30, 2025. 3.5. Remarks. 3.39 c.f.s. made absolute in Case No. 17CW3165 leaving 36.61 c.f.s., conditional. 4. Evans No. 2 Ditch Recharge Project and New Conditional Recharge Water Right. 3.6. Point of Diversion. Combined headgate of the Platte Valley Canal and Evans No. 2 Ditch. SE 1/4 of the NW 1/4 of the NE 1/4 of Section 19, Township 2 North, Range 66 West of the 6th P.M. The ditch bifurcates and the Evans No. 2 Ditch continues form a point in the SW 1/4 of the NW 1/4 of Section 9, Township 3 North, Range 6 West of the 6th P.M. 4.2. Source. South Platte River. 4.3. Diversion Rate and Volume. 125 c.f.s., conditional at the headgate of the Platte Valley Canal. The volume diverted shall not to exceed 25,000 acre-feet in any water year. Diversions shall be measured at the location indicated on the table in ¶24 of the

Original Decree, the approximate location of which is shown in Figure 2 of the Original Decree. 4.4. Date of Appropriation. December 30, 2025. 4.5. Remarks. 13.20 c.f.s. made absolute in Case No. 17CW3165, leaving 111.8 c.f.s., conditional. 5. Farmers Independent Ditch Recharge Project and New Conditional Recharge Water Right. 4.6. Previous decrees. A recharge water right was previously decreed by the Applicant GMS in Case No. 85CW0370. Water Division 1 on March 29, 1989; with diligence decrees entered in Case No. 95CW0077 on July 25, 1996, and in Case No. 02CW0146 on November 3, 2023. Nothing herein amends the terms of the previous decrees entered in Case Nos. 85CW0370, 95CW0077, and 02CW0146. 5. Point of Diversion. Headgate of the Farmers Independent Ditch ("FID"). SW 1/4 of Section 19, Township 3 North, Range 66 West of the 6th P.M., Weld County, Colorado. 5.3. Source. South Platte River. 5.4. Diversion Rate and Volume. 130 c.f.s., conditional at the headgate of the Farmers Independent Ditch. The volume diverted shall not exceed 25, 000 acre-feet in any water year. Diversions shall be measured at location indicated in the table in ¶24 of the Original Decree, the approximate location of which is shown in Figure 3A of the Original Decree. 5.5. Date of Appropriation. December 30, 2005. 6. Greeley No. 3 Ditch Recharge Project and New Conditional Recharge Water Right. 6.1. Point of Diversion. Headgate of the Greeley No. 3 Ditch in the NE 1/4 of the NW 1/4 of the SE 1/4 of Section 32, Township 6 North, Range 66 West of the 6th P.M. 6.2. Source. Cache La Poudre River. 6.3. Diversion Rate and Volume. 40 c.f.s., conditional at the headgate of the Greely No. 3 Ditch not exceed 7500 acre-feet in any water year. Diversions shall be measured at the location indicated in the table in ¶24 of the Original Decree, the approximate location of which is shown in Figure 4 of the Original Decree. 6.4. Date of Appropriation. December 30, 2025. 7. Highland aka Plumb Ditch Recharge Project and New Conditional Recharge Water Right. 6.5. Point of Diversion. Headgate of the Highland aka Plumb Ditch located in the SW 1/4 of the NW 1/4 of Section 13, Township 5 North, Range 65 West of the 6th P.M. 7.2. Source. South Platte River. 7.3. Diversion Rate and Volume. 10 c.f.s., conditional at the headgate of the Highland aka Plumb Ditch, not to exceed 500 acre-feet in any water year. Diversions shall be measured at the location indicated in the table in ¶24 of the Original Decree, the approximate location of which is shown in Figure 5 of the Original Decree. 7.4. Date of Appropriation. December 30, 2025. 8. Jones Ditch Recharge Project and New Conditional Recharge Water Right. 8.1. Point of Diversion. Headgate of the Jones Ditch located in the NW 1/4 of the SW 1/4 of the SE 1/4 of Section 36, Township 6 North, Range 67 West of the 6th P.M. 8.2. Source. Cache La Poudre River. 8.3. Diversion Rate and Volume. 10 c.f.s., conditional at the headgate of the Jones Ditch, not to exceed 200 acre-feet in any water year. Diversions shall be measured at the location indicated in the table in ¶24 of the Original Decree, the approximate location of which is shown in Figure 6 of the Original Decree. 8.4.Date of Appropriation. December 30, 2005. 8.5. Remarks. 6.00 c.f.s. made absolute in Case No. 17CW3165 leaving 4 c.f.s., conditional. Lupton Bottom Recharge Project and New Conditional Recharge Water Right. 9.1. Previous Decrees. A recharge project was previously decreed by Applicant GMSD in Case No. 94CW0199, Water Division 1 on December 16, 1966; with a diligence decree entered in Case No. 02CW0318 on November 3, 2003, for a total of 100 c.f.s., 22.15 which is absolute and 77.85 which is conditional. Nothing herein amends the terms of the decrees entered in Case No. 94CW0199 and Case No. 02CW0318. 9.2. Point of Diversion. Headgate of the Lupton Bottom Ditch located in Section 19, Township 1 North, Range 66 West of the 6th P.M., on the west bank of the South Platte River in the NW 1/4 of the NW 1/4 of the SW 1/4 of said section. 9.3. Source. South Platte River. 9.4. Diversion Rate and Volume. 100 c.f.s., conditional at the Lupton Bottom Ditch headgate, not to exceed 20,000 acre-feet in any water year. Diversions shall be measured at the location indicated in the table in ¶24 of the Original Decree, the approximate location of which is shown in Figure 7 of the Original Decree. 9.5. Date of Appropriation. December 30, 2005. 10. Orchard Recharge Project and New Conditional Recharge Water Right. 10.1. Points of Diversion. 10.1.1. Headgate of the Jackson Reservoir Inlet Canal located in the NE 1/4 of the SW 1/4 of the SE 1/4 of Section 18, Township 4 North, Range 61 West of the 6th P.M. 10.1.2. Orchard Recharge Weld Field. Six Wells located in Section 13, Township 4 North, Range 61 West of the 6th P.M. The specific locations of the wells are described in the table and ¶16.1.3 of the Original Decree. The wells shall be operated in accordance with ¶32 of the Original Decree. See table in the original application. 10.1.3. Well Permit No. 61336-F: Located in the NE 1/4 of the SW 1/4 of Section 13, Township 4 North, Range 61 West of the 6th P.M. 10.2. Source. South Platte River. 10.3. Diversion Rates and Volume.

10.3.1. Jackson Reservoir Inlet Canal. 50 c.f.s., conditional. Diversions shall be measured at the location indicated in the table in ¶24 of the Original Decree, the approximate location of which is shown in Figure 8 of the Original Decree. 10.3.2. Orchard Recharge Well Field. 23.38 c.f.s. absolute, and 21.62 c.f.s. conditional. Diversions shall be measured at the totalizing flow meter for each well, as indicated in ¶32.2 of the Original Decree, the approximate locations of which are shown in Figure 8 of the Original Decree. 10.3.3. Well Permit No. 61336-F. 5000 gpm, conditional. 10.3.4. Combined diversions under the new recharge water right described in ¶16 at the headgate of the Jackson Reservoir Inlet Canal and the Orchard Recharge Well Gield shall not exceed 10,000 acre-feet in any water year. 10.4. Dates of Appropriation. 10.4.1. Jackson Reservoir Inlet Canal. December 30, 2005. 10.4.2. Orchard Recharge Well Field, including Well Permit No. 61336-F. December 30, 2005. 10.5. Remarks. Orchard Recharge Project. An additional 15.36 c.f.s. was made absolute in Case No. 17CW3165, for a total of 38.66 c.f.s absolute, and 11,34 c.f.s. conditional; and the diversion point for the Jackson Reservoir Inlet Canal was abandoned. Rural Ditch Recharge Project and New Conditional Recharge Water Right. 11.1. Point of Diversion. The Rural Ditch headgate is located on Boulder Creek in the SE 1/4 of the SW 1/4 of the NE 1/4 of Section 20, Township 2 North, Range 68 West of the 6th P.M. 11.2. Source. Boulder Creek. 11.3. Diversion Rate and Volume. 50 c.f.s., conditional, not to exceed 2000 acre-feet in any water year. Diversions shall be measured at the location indicated on the table in ¶24 of the Original Decree, the approximate location of which is shown in Figure 9 of the Original Decree. 11.4. Date of Appropriation. December 30, 2005. 12. Slate Ditch Recharge Project and New Conditional Recharge Water Right. 12.1 Point of Diversion. Headgate of the Slate Ditch. SW 1/4 of the NE 1/4 of the SW 1/4 of Section 35, Township 2 North, Range 67 West of the 6th P.M. 12.2. Source. Little Dry Creek. 12.3. Diversion and Rate Volume. 10 c.f.s., conditional at the headgate of the Slate Ditch, not to exceed 600 acre-feet in any water year. Diversions shall be measured at the location indicated on in the table in ¶24 of the Original Decree, the approximate location of which is shown in Figure 10 of the Original Decree. 12.4. Date of Appropriation. November 17, 2009. 13. Western Mutual (aka Hewes and Cook) Recharge Project and Conditional Water Right. 13.1. Previous Decree. A recharge water right was previously decreed by Applicant GMS in Case No. 87CW0304, Water Division 1 on June 21, 1991. Nothing herein amends the terms of the decree entered in Case No. 87CW304. 13.2. Point of Diversion. The Wester Mutual Ditch (aka Hewes and Cook) headgate is located in the SE 1/4 of the SW 1/4 of Section 11, Township 3 North, Range 67 West of the 6th P.M., Weld County, Colorado. 13.3. Source. South Platte River. 13.4. Diversion and Rate Volume. 130 c.f.s., conditional at the headgate of the Western Mutual Ditch. Diversions shall be measured at the location indicated in ¶24 of the Original Decree, the approximate location of which is shown in Figure 11A of the Original Decree. The volume diverted shall not exceed 25,000 acre-feet in any water year. 13.5. Date of Appropriation. December 30, 2005. 14. Use. The recharge water rights for the recharge projects listed in paragraphs 3-13 above ("Recharge Project Rights") are decreed for the following uses within Central's boundaries as they exist now or as they may exist in the future, subject to ¶75 of the Original Decree. Augmentation and replacement of depletions and replacement of historical return flows associated with augmentation and use of wells used for irrigation, commercial, industrial, recreation, municipal, domestic, piscatorial, wildlife habitat, gravel washing, dust suppression and reclamation purposes. Applicant may use the recharge accretions as a source of augmentation and replacement water in the GMS Plan decreed in Case No. 02CW0335 and the WAS Plan decreed in Case Nos. 03CW0099/03CW0177 provided such recharge accretions are added to those plans in accordance with the terms of the decrees for those plans. The recharge accretions may be used in other plans for augmentation in a manner consistent with the Original Decree including but not limited to ¶30 thereof, and with the decrees, or the substitute water supply plans approved by the state engineer under C.R.S. § 37-92-308, or successor statutes, governing such plan. Such recharge accretions may be reused and successively used to extinction for the uses described in this paragraph, either directly or after exchange, by delivery to the recharge projects identified in ¶¶9-19 of the Original Decree or by diversion at the exchange-to locations identified for the Exchange Rights listed below. Use of water diverted from the Evans No. 2 Ditch Recharge Project which recharges the Beebe Draw is also specifically subject to the terms and conditions of ¶50.8 of the Original Decree. 15. Operation of the Recharge Project Rights listed above remain as described in, and subject to the terms and conditions of, the Original Decree.

AUGMENTATION WELL WATER RIGHTS 16. Name of Structure. McCarthy Well WDID 0207167, Well Permit No. 66881-F 16.1. Location. SW 1/4 of the SW 1/4 of Section 6, Township 4 North, Range 65 West of the 6th P.M., Weld County, Colorado. 16.2. Source. South Platte River alluvium. 16.3 Appropriation Date. February 2, 2007. 16.4. Amount. 750 gpm, conditional. 16.5. Use. Augmentation and replacement of depletions from wells used under the GMS Plan and the WAS Plan, or any other decreed augmentation plan obtained by Applicant, for irrigation, commercial, industrial, recreation, municipal, domestic, piscatorial, wildlife habitat, gravel washing, dust suppression and reclamation. 17. Name of Structure. McCarthy Well WDID 0207166, Well Permit No. 66882-F 16.6. Location. SW 1/4 of the SW 1/4 of Section 6, Township 4 North, Range 65 West of the 6th P.M., Weld County, Colorado. 17.2. Source. South Platte River alluvium. 17.3. Appropriation Date. February 2, 2007. 17.4. Amount. 925 gpm, conditional. 17.5. Use. Augmentation and replacement of depletions from wells used under the GMS Plan and the WAS Plan, or any other decreed augmentation plan obtained by Applicant, for irrigation, commercial, industrial, recreation, municipal, domestic, piscatorial, wildlife habitat, gravel washing, dust suppression and reclamation. **CONDITIONAL AND ABSOLUTE APPROPRIATIVE RIGHTS OF EXCHANGE** 18. General Description of Appropriative Rights of Exchange ("Exchange Rights"). Central owns or otherwise has the right to use multiple water rights in the South Platte River and its tributaries which include senior and junior direct flow and storage rights, recharge rights, augmentation wells, and other fully consumable water supplies. These water supplies are delivered to the South Platte River and its tributaries and used by Central for augmentation and replacement purposes pursuant to the plans for augmentation decreed in the GMS Plan and the WAS Plan. The GMS Plan and the WAS Plan each use certain "administrative reaches" defined in each of those plans to administer the use of such water supplies for augmentation and replacement purposes. Some of these water supplies are occasionally not needed for augmentation and replacement purposes under the GMS Plan and WAS Plan when the water supplies are delivered to the South Platte River and its tributaries. Pursuant to the terms and conditions set forth in [the Original Decree] Central may exchange the water supplies listed on **Exhibit 1** hereto**,** and accretions generated from the Recharge Project Rights, from locations described in ¶20 (and Exhibit 2 hereto), to one or more of the structures described in ¶21 (and Exhibit 2 hereto), below. 19. Location of Exchange Rights. The Exchange Rights are generally located on the South Platte River from a downstream point at the headgate of the Upper Platte & Beaver Canal to an upstream point at Chatfield Reservoir. The Exchange Rights also include certain portions of Little Dry Creek, St. Vrain Creek, Godding Hollow, Mayfield Hollow, Boulder Creek, The Big Thompson River, the Little Thompson River, Ashcroft Draw, and the Cache La Poudre River. A matrix illustrating the specific Exchange Rights including the exchange-from and exchange-to points and maximum flow rates is attached as **Exhibit 2** hereto. The exchange-from points and exchange-to points and substitute supplies are described in more detail in the succeeding paragraphs. 20. Exchange From Locations. 20.1. The downstream ends of administrative reaches F, D, C, B, and A, in the GMS Plan decreed in Case No. 02CW0335 located as follows, all of the 6th P.M. 20.1.1. Reach F. River headgate of the Jay Thomas Ditch, located in the SW 1/4 of the NE 1/4 of the NW 1/4 of Section 11, Township 3 North, Range 67 West. 20.1.2. Reach D. Confluence Beebe Seep Canal and the South Platte River. 20.1.3 Reach C. River headgate of the Lower Latham Ditch, located in the NE 1/4 of the NW 1/4 of the NE 1/4 of Section 31, Township 5 North, Range 65 West. 20.1.4. Reach B. Riverside Inlet, located in the SW 1/4 of the SW 1/4 of the SW 1/4 of Section 20, Township 5 North, Range 63 West. 20.1.5 Reach A. River headgate of the Upper Platte & Beaver Canal, located in the NW 1/4 of the NE 1/4 of the NE 1/4 of Section 35, Township 4 North, Range 58 West. 20.2. The downstream ends of administrative reaches F1, F2, F3, D, A1, A2, C1, and C2 in the WAS Plan decreed in consolidated Case Nos. 03CW0099/03CW0177, located as follows, all of the 6th P.M. 20.2.1. Reach F1. River headgate of the Fulton Ditch, located in the NE 1/4 of the NE 1/4 of the SE 1/4 of Section 17, Township 2 South, Range 67 West. 20.2.2. Reach F2. River headgate of the Platteville Irrigating and Milling Ditch, located in the NW 1/4 of the NW 1/4 of the SE 1/4 of Section 31, Township 2 North, Range 66 West. 20.2.3. Reach F3. River headgate of the Western Mutual Ditch, located in the SE 1/4 of the SW 1/4 of Section 11, Township 3 North, Range 67 West of the 6th P.M. 20.2.4. Reach D. Confluence of the Beebe Seep Canal and the South Platte River. 20.2.5 Reach C1. River headgate of the Union Ditch, located in the SE 1/4 of the SW 1/4 of

the NE 1/4 of Section 18, Township 4 North, Range 66 West. 20.2.6. Reach C2. River headgate of the Lower Latham Ditch, located in the NE 1/4 of the NW 1/4 of the NE 1/4 of Section 31, Township 5 North, Range 65 West. 20.2.7. Reach A1. River headgate of the Fort Morgan Canal, located in the NE 1/4 of the SE 1/4 of Section 31, Township 5 North, Range 59 West. 20.2.8. Reach A2. River headgate of the Upper Platte & Beaver Canal, located in the NW 1/4 of the NE 1/4 of the NE 1/4 of Section 35, Township 4 North, Range 58 West. 20.3. The confluences of the South Platte River with the Cache La Poudre, the St. Vrain River, Beebe Draw, Ashcroft Draw, Little Dry Creek, and the Big Thompson River, and the confluence of the St. Vrain River and Boulder Creek. 20.4. Stream delivery points for releases from the following Reservoir. 20.4.1.Koenig Reservoir. 20.4.1.1. Meadow Island Outlet. Water is released to the Meadow Island No. 1 Ditch where it is released to Little Dry Creek and delivered to the South Platte River at the confluence of the south Platte River and Little Dry Creek. 20.4.1.2. Koenig Reservoir Outlet. Water is released via closed pipe directly to the South Platte River at a location on the west bank of the South Platte River downstream of the Platte Valley Irrigation Canal's river headgate and upstream of the Meadow Island No. 2 Ditch's river headgate approximately 550 feet East and 1250 feet North of the Southwest corner of Section 18, Township 2 North, Range 66 West of the 6th P.M. 20.4.2. Shores Reservoir. 20.4.2.1. Rural Ditch Outlet. Water is released to the Godding Hollow which flows into the Rural Ditch where it is delivered to the St. Vrain Creek at a location in the NW 1/4 of the SE 1/4 of Section 36, Township 3 North, Range 68 West of the 6th P.M. 20.4.2.2. Shores Outlet via Tri-Town Drainage. Water is released to the Tri-Town Drainage which flows into the Rural Ditch, where it is then delivered to the St. Vrain Creek at a location in the NW 1/4 of the SE 1/4 of Section 36, Township 3 North, Range 68 West of the 6th P.M. 20.4.3. Bernhardt Reservoir. Water is released to the Big Thomspon River in the SE 1/4 of Section 1, Township 4 North, Range 67 West of the 6th P.M. 20.4.4. Nissen Reservoir. 20.4.4.1. Nissen Outlet. Water is released from the Reservoir via closed pipe directly to the South Platte River in the SW 1/4 of the SW 1/4 of the NE 1/4 of Section 12, Township 5 North, Range 67 West of the 6th P.M. 20.4.4.2. Plumb Ditch Outlet. Water is released from the Reservoir to the Plumb Ditch where it is subsequently delivered through an augmentation station to a slough just east of Weld County Road 51 in Section 8. Water delivered into the slough is delivered to the South Platte River in the NE 1/4 of the NE 1/4 of the SE 1/4 of said Section 8, Township 5 North, Range 64 West of the 6th P.M. Transit losses in the slough, if any, shall be determined consistent with ¶50.3, of the Original Decree. 20.4.5. Jo Dee Reservoir. Water is released to La Poudre Reservoir where it is released directly to the Cache La Poudre River at a location above the Whitney Ditch headgate in the NE 1/4 of the SW 1/4 of Section 19, Township 6 North, Range 67 West of the 6th P.M. 20.4.6. La Poudre Reservoir. Water is released directly to the Cache La Poudre River at a location above the Whitney Ditch headgate in the NE 1/4 of the SW 1/4 of Section 19, Township 6 North, Range 67 West of the 6th P.M. 20.4.7. Siebring Reservoir. Water is released directly to the Cache La Poudre River at a location in the SW 1/4 of the NE 1/4 of Section 31, Township 6 North, Range 66 West of the 6th P.M. 20.4.8. 83rd Avenue Reservoir. Water is released to Siebring Reservoir where it is released directly to the Cache La Poudre River at a location in the SW 1/4 of the NE 1/4 of Section 31, Township 6 North, Range 66 West of the 6th P.M. 20.5. Metro Wastewater Reclamation District's Robert W. Hite Treatment Facility Outfall, which discharges to the South Platte River in the SE 1/4 of the SW 1/4 of the SW 1/4 of Section 1, Township 3 South, Range 68 West of the 6th P.M. 21. Exchange To Locations. 21.1. The points of diversion for all Recharge Project Rights described in ¶¶3-13, above. 21.2. Chatfield Reservoir. The Chatfield Dam is located on the main stem of the South Platte River, the right abutment of which is located in Douglas County, Colorado, in Sections 6 and 7, Township 6 South, Range 68 West of the 6th P.M.; and the left abutment of which is located in Jefferson County, Colorado, in Section 1, Township 6 South, Range 69 West of the 6th P.M. The reservoir formed by said dam is located in all or portions of Sections 1, 2, 11, 12, 13, 14, and 23, Township 6 South, Range 69 West of the 6th P.M. and in all or portions of Sections 6, 7, 17, 18, 19, and 20, Township 6 South, Range 68 West of the 6th P.M. 21.3. Union Reservoir through Oligarchy Ditch. Water is diverted at the SE 1/4 of the NE 1/4 of Section 27, Township 3 North, Range 70 West of the 6th P.M. and may be delivered to Union Reservoir through the ditch. 21.4. Koenig Reservoir. 21.4.1. Lupton Bottom Ditch. Headgate located on the west bank of the South Platte River in the NW 1/4 of the NW 1/4 of the SW 1/4 of Section 19, Township 1 North, Range 66 West of the 6th P.M. 21.4.2.

Pump Station. Located on the west bank of the South Platte River in the NW 1/4 of the SW 1/4 of Section 18, Township 2 North, Range 66 West of the 6th P.M., Weld County, Colorado at a point 3800 feet south and 500 feet east of the NW corner of said Section 18. 21.4.3. The Meadow Island No. 1 Ditch. Headgate located on the northwest bank of the South Platte River in the NW 1/4 of the SW 1/4 of Section 19, Township 2 North, Range 66 West of the 6th P.M. 21.5. Shores Reservoir. 21.5.1. Rural Ditch. Headgate located on Boulder Creek in the NE 1/4 of Section 20, Township 2 North, Range 68 West of the 6th P.M. 21.5.2. Godding Ditch aka the Highland South Side Ditch. Headgate located on Boulder Creek in the NE 1/4 of the NW 1/4 of the SW 1/4 of Section 21, Township 2 North, Range 68 West of the 6th P.M. 21.5.3. Godding Hollow which originates in the NW 1/4 and the SE 1/4 of Section 15, Township 1 North, Range 68 West of the 6th P.M. and flows north into Shores Reservoir. 21.5.4. Mayfield Hollow which originates in the W 1/2 of Section 19, Township 2 North, Range 67 West of the 6th P.M. and flows north into Shores Reservoir. 21.6. Bernhardt Reservoir. 21.6.1. Bee Line Ditch. Headgate located on the Big Thompson River in the NW 1/4 of the SW 1/4 of the NE 1/4 of Section 10, Township 4 North, Range 67 West of the 6th P.M. 21.6.2. Big Thompson & Platte River Ditch. Headgate located on the Big Thompson River in the SW 1/4 of the NE 1/4 of the NE 1/4 of Section 4 North, Township 4 North, Range 67 West of the 6th P.M. 21.6.3. Bernhardt Pump Station. Located on the Big Thompson River in the S 1/2 of Section 1, Township 4 North, Range 67 West of the 6th P.M. 21.7. Nissen Reservoir. 21.7.1. Plumb Ditch. Headgate located in the SW 1/4 of the NW 1/4 of Section 13, Township 5 North, Range 65 West of the 6th P.M. 21.7.2. Nissen Pump Station. Located in the SE 1/4 and the E 1/2 of the SW 1/4 of Section 12, Township 5 North, Range 65 West of the 6th P.M. 21.8. Jo Dee Reservoir. 21.8.1. Jo Dee Infiltration Gallery. Located on the Cache La Poudre River in the SW 1/4 of the NE 1/4 of Section 24, Township 6 North, Range 68 West of the 6th P.M., 1400 feet South of the North Section line and 2000 feet West of the East Section line. 21.8.2. Jo Dee Inlet Pipe No. 1. Located in the NW 1/4 of the SE 1/4 of Section 24, Township 6 North, Range 68 West of the 6th P.M., 2800 feet South of the North Section line and 1600 feet West of the East Section line. 21.8.3. Jo Dee Inlet Pipe No. 2. Located in the SE 1/4 of the NW 1/4 of Section 24, Township 6 North, Range 68 West of the 6th P.M., 1600 feet South of the North Section line and 3600 feet West of the East Section line. 21.8.4. Jo Dee Inlet Pipe No. 3. Located in the NE 1/4 of the NW 1/4 of Section 24, Township 6 North, Range 68 West of the 6th P.M., 800 feet south of the North Section line and 3900 feet West of the East Section line. 21.8.5. Box Elder Ditch. Headgate located on the Cache La Poudre River in the SW 1/4 of the SE 1/4 of the NE 1/4 of Section 20, Township 7 North, Range 68 West of the 6th P.M., 2500 feet South of the North section line and 1000 feet West of the East Section line. 21.9. La Poudre Reservoir. La Poudre Pump located in the NE 1/4 of the SW 1/4 of Section 19, Township 6 North, Range 67 West of the 6th P.M. 21.10. Siebring Reservoir. 21.10.1. Pump station located on the Cache La Poudre River in the SW 1/4 of the NE 1/4 of Section 31, Township 6 North, Range 66 West of the 6th P.M. 21.10.2. William R. Jones Ditch. Headgate located on the Cache La Poudre River in the NE 1/4 of the NW 1/4 of the SW 1/4 of Section 36, Township 6 North, Range 67 West of the 6th P.M. 21.11. 83rd Avenue Reservoir. 21.11.1 Pump station located on the Cache La Poudre River in the SW 1/4 of the NE 1/4 of Section 31, Township 6 North, Range 66 West of the 6th P.M. 21.11.2. William R. Jones Ditch. Headgate located on the Cache La Poudre River in the SE 1/4 of the NW 1/4 of the SW 1/4 of Section 36, Township 6 North, Range 67 West of the 6th P.M. 22. Sources of Substitute Supply. The sources of substitute supply for the Exchange Rights are (1) all of the water rights and water supplies listed on **Exhibit 1** hereto, and (2) recharge accretions generated from the Recharge Project Rights listed in ¶¶ 3-13 above. 23. Rates and Volumes of Exchange Rights. The Exchange Rights and the maximum exchange rate for each Exchange Right are shown in the Original Decree matrix attached as Exhibit 2, hereto. 24. Dates of Appropriation. All exchanges have an appropriation date of December 30, 2005, except for the exchange to the headgate of the Slate Ditch on Little Dry Creek as described in ¶18.1 and ¶43.1 of the Original Decree, which has an appropriation date of November 17, 2009, and except for any exchange involving the following substitute supplies which have an appropriation date of December 7, 2009. 24.1. The water rights changed in Case No. 07CW0006; 24.2. Fully consumable effluent leased from the City of Aurora; 24.3. Direct flow water rights in the Brighton Ditch, leased from the City of Aurora; 24.4. Fully consumable effluent leased from the City of Longmont; 24.5. Windy Gap fully consumable effluent leased from the City of Longmont; 24.6. Direct flow water

rights in the Godfrey Bottom Ditch, leased from the Town of Evans; 24.7. Direct flow water rights in the Brighton Ditch; Lupton Bottom Ditch, and Lupton Meadow Ditch, changed in Case NO. 05CW0290, leased from the City and County of Broomfield. 24.8. Water Supply and Storage Company reusable transmountain return flows leased from the City of Thornton. 25. Absolute Exchange Rights. The following table identifies the Exchange Rights previously made absolute pursuant to the Original Decree and the decree entered in Case No. 17CW3165, together with the amounts of such exchange rights that remain conditional. All amounts are stated in cubic feet per second (c.f.s.). **Previously Absolute Exchange Rights and Remaining Conditional Amounts.** All amounts in cubic feet per second (c.f.s.). *See table in the original application.* 26. Use of Exchange Rights. The following uses within Central's boundaries as they exist now or as they may exist in the future, subject to ¶75 of the Original Decree: Augmentation and replacement of depletions and replacement of historical return flows associated with augmentation and use of wells used for irrigation, commercial, industrial, recreation, municipal, domestic, piscatorial, wildlife habitat, gravel washing, dust suppression and reclamation purposes. Applicant may use the recharge accretions from diversions by exchange as a source of augmentation and replacement water in the GMS Plan and the WAS Plan provided such recharge accretions are added to those plans in accordance with the terms of the decrees for those plans. The recharge accretions may be used in other plans for augmentation in a manner consistent with this Decree, and with the decrees, or the substitute water supply plans approved by the state engineer under C.R.S. § 37-92-308, or successor statues, governing such plan. The water diverted under the Exchange Rights and any recharge accretions form diversions by exchange thereunder may be reused and successively used to extinction for the uses described in this paragraph, either directly or after exchange, by delivery to the recharge projects identified in ¶¶9-19 of the Original Decree at the points of diversion described therein and in paragraphs 3-13 above, or by diversion at the exchange-to locations identified in ¶21 above. 27. Place of Use. The place for use for the water right claimed for the appropriative rights of exchange shall be any place within Central's boundaries as they exist now or in the future subject to ¶75 of the Original Decree. 28. Outline of Work Performed Towards Completion of the Appropriations. 28.1. Summary. During the diligence period, Central has diverted some of the Recharge Water Rights in priority and has delivered water to recharge in the recharge projects listed in ¶¶3-13 above and has diverted water by exchange under the Exchange Rights in ¶¶18-27 above. Central has entered into easement agreements and constructed recharge ponds and has added those recharge ponds to several of the recharge projects listed in ¶¶3-13 under the procedures for adding such structures provided for under the Decree. Central has entered into carriage agreements with the owners of the ditches listed in ¶¶3-13, and/or has renegotiated existing agreements; and/or has made payments to such owners for carriage of water in those ditches. Central has filed notices of additional sources of recharge water under the procedures for adding such sources provided for under the Decree. 28.2. Work on Integrated System. The water rights listed herein are part of Central's integrated system of water rights. Central has operated and developed its integrated system during the diligence period, including its Plans for Augmentation decree in Case Nos. 02CW0335, 16CW3202 and 03CW0099, and has retained legal counsel and engineering consultants to assist in such operation and development. Central had filed and prosecuted applications for addition and removal of wells to and from these Plans. Central has acquired water rights represented by shares in various ditch companies and has prosecuted applications changing those water rights for use by Central in its Plans. Central has acquired various gravel pits and made capital improvements for storage of water. Central has appropriated new water rights and has leased water rights on a temporary basis for use in its Plans. Central has participated as an opposer in numerous water court applications to protect its water rights. Central has prosecuted water court applications to perfect its water rights as absolute and/or maintain its conditionally decreed rights which are listed as sources of supply for the Exchange Rights listed in ¶¶18-27 above. Central has expended more than $114,000,000 towards the operation and development of the water rights decreed herein and its integrated system during the diligence period. 29. Claims to Make Water Rights Absolute in Part. 29.1. Central seeks to make the following Recharge Project Rights absolute in the amounts noted below. 29.1.1. Evans No. 2 Ditch Recharge Project and New Conditional Recharge Water Right. Amount: an additional 11.8 c.f.s., for a total of 25.0 c.f.s. absolute. (Note: 13.2 c.f.s. was previously made absolute in Case No. 17CW3165). 29.1.2. Farmers Independent Ditch Recharge Project and New Conditional Recharge Water

Right. Amount: 13.09 c.f.s. 19.1.3. Orchard Recharge Project and New Conditional Water Right. Amount: An additional 5.67 c.f.s. for a total of 44.33 c.f.s. absolute (Note: 23.3 c.f.s. was made absolute under the Original Decree; an additional 15.36 c.f.s. was made absolute in Case No. 17CW3165). 29.1.4. Western Mutual (aka Hewes and Cook) Recharge Project and New Conditional Recharge Water Right. Amount: 9.45 c.f.s. 29.2. Central seeks to make the following Exchange Rights absolute in the amounts set forth in the tables below. *See 2 tables in original application*. 30. Claim for Finding of Reasonable Diligence. Central seeks a finding that it has been reasonably diligent in the development of the conditional water rights described herein, and to maintain the conditional portion of the rights for an additional six years, or as otherwise provided by statute, and for such other relief that is just and proper. The original application consists of 20 pages and 2 Exhibits.

CASE NUMBER 2026CW3180 APPLICATION FOR FINDING OF REASONABLE DILIGENCE AND TO MAKE ABSOLUTE IN PART IN JEFFERSON COUNTY. Attorneys for Co-applicant, Town of Morrison: ALPERSTEIN & COVELL, P.C., Andrea L. Benson, #33176, Gilbert Y. Marchand, Jr., #19870, 2299 Pearl Street, Suite 400-C, Boulder, CO 80302, phone: 303-444-4256, alb@alpersteincovell.com; gym@alpersteincovell.com; Attorneys for Co-applicant, Amrize West Central, Inc.: James S. Witwer, #19482, Trevor I. Klein, #59431, TROUT RALEY P.C., 1120 Lincoln Street, Suite 1600, Denver, CO 80203, Telephone: (303) 861-1963, Email: jwitwer@troutlaw.com; tklein@troutlaw.com. **1. Name, mailing address, e-mail address, and telephone number of Co-Applicants: TOWN OF MORRISON** ("Morrison"), Mallory Nassau, Town Manager, 321 Highway 8, Morrison, CO 80465, 303.697.8749, Email: mnassau@morrisonco.us. Communications, including pleadings regarding this application should be directed to counsel for Morrison, Gilbert Y. Marchand, Jr. and Andrea L. Benson, Alperstein & Covell, P.C., 2299 Pearl Street, Suite 400-C, Boulder, CO 80302. **AMRIZE WEST CENTRAL, INC.** ("Amrize"), f/k/a Holcim – WCR, Inc., f/k/a Aggregate Industries – WCR Inc., f/k/a CAMAS Colorado, Inc., f/ka/ Cooley Gravel Company, Attn: Kurt Thurmann, Land Manager, 1687 Cole Blvd., Suite 300, Golden, CO 80401, (720) 329-8851. Communications, including pleadings regarding this application should be directed to counsel for Amrize, James S. Witwer and Trevor I. Klein, Trout Raley, P.C., 1120 Lincoln Street, Suite 1600, Denver, CO 80203. 2. **Names of structures (collectively, "Subject Structures"):** Morrison Quarry Reservoir No. 1 and Morrison Quarry Reservoir No. 2. **3. Description of conditional water rights:** 3**.A.** The water rights for the Subject Structures were decreed in Case No. 95CW126, District Court, Water Division No. 1, on February 4, 1997. Portions of the water rights were made absolute in decrees entered by the same court on December 15, 2013 in Case No. 12CW100 and on October 14, 2020 in Case No. 19CW3256. Decrees finding diligence toward the completion of the appropriations of the remaining conditional water rights were entered by the Court on July 19, 2005 in Case No. 03CW106 and on the dates mentioned above in Case Nos. 12CW100 and 19CW3256. **3.B. Location: 3.B.(1)** Morrison Quarry Reservoir No. 1 is located in the NE and SE Quarter Sections of Section 10, Township 5 South, Range 70 West, 6th P.M., Jefferson County, Colorado and is an off-channel reservoir. *See* Exhibit A attached to the application on file with the Court. **3.B.(2)** Morrison Quarry Reservoir No. 2 has an original decreed location in the NE Quarter Section of Section 10, Township 5 South, Range 70 West, 6th P.M., Jefferson County, Colorado and is an off-channel reservoir. The decree entered by this Court in Case No. 09CW33 corrected the legal description of Morrison Quarry Reservoir No. 2, as follows: N1/2, NE1/4 and SE1/4NE1/4 of Section 10, and W1/2, NW1/4 of Section 11, all in Township 5 South, Range 70 West of the 6th P.M., Jefferson County, Colorado. *See* Exhibit A attached to the application on file with the Court. **3.C. Source:** The sources of water for both reservoirs are Bear Creek and Strain Gulch, tributary to Bear Creek, both of which are tributary to the South Platte River. **3.D. Appropriation dates:** 3**.D.(1)** Morrison Quarry Reservoir No. 1: October 31, 1994. **3.D.(2)** Morrison Quarry Reservoir No. 2: October 31, 1994. **3.E. Amount:** 3**.E.(1)** Morrison Quarry Reservoir No. 1: 650 acre-feet. 641.807 acre-feet remain conditional. 8.193 acre-feet were made absolute in Case No. 12CW100. **3.E.(2)** Morrison Quarry Reservoir No. 2: 3,000 acre-feet. 2,252.06 acre-feet remain conditional. 747.944 acre-feet has been made absolute (115.297 acre-feet were made absolute in Case No. 12CW100 and 632.647 acre-feet were made absolute in Case No. 19CW3256). **3.F. Use:** The water rights

decreed to the Morrison Quarry Reservoir No. 1 and Morrison Quarry Reservoir No. 2 may be used directly or by exchange, for irrigation, agricultural, commercial, industrial, and all municipal uses, including, but not limited to, domestic, mechanical, manufacturing, industrial, power generation, fire protection, sewage treatment, street sprinkling, irrigation of parks, lawns and grounds, recreational, piscatorial, maintenance and preservation of wildlife and aesthetic values, lake and reservoir evaporation, augmentation and replacement, adjustment and regulation of municipal water systems, including further exchange with municipal or industrial water systems, and other such water uses. **3.G. Points of diversion** (*see* Exhibit A): 3**.G.(1)** Cooley Morrison Quarry Pipeline is located in the SE Quarter of the NE Quarter, Section 10, Township 5 South, Range 70 West, 6th P.M. Source of water is Strain Gulch, tributary to Bear Creek, tributary to the South Platte River. A 1.0 cfs industrial right from Strain Gulch was decreed in Case No. 86CW064 for this structure by a decree on December 12, 1989. **3.G.(2)** Morrison Municipal Intake is located on the south bank of Bear Creek in the SW1/4SE1/4, Section 34, T4S, R70W of the 6th P.M. in Jefferson County, Colorado at a point whence the SE corner of said Section 34 bears South 79 degrees 28 minutes East 2,452.5 feet. Source of water is Bear Creek, tributary to the South Platte River. The existing point of diversion is governed by a 3.5 cfs municipal priority from Bear Creek decreed in Case No. 91471, Denver District Court, on September 24, 1935, with an appropriation date of September 21, 1867. **3.G.(3)** Morrison Municipal Intake No. 2 was originally decreed to be located on the south bank of Bear Creek in the NW1/4 NW1/4, Section 2, T5S, R70W of the 6th P.M. in Jefferson County, Colorado, at a point whence the NW corner of said section bears N 32 degrees West 140 feet. Source of water is Bear Creek, tributary to the South Platte river. An application for a simple change in point of diversion pursuant to C.R.S. § 37-92-305(3.5) is pending in this Court in Case No. 25CW3120. The proposed changed point of diversion is at or within 200 feet of a point in the SE 1/4 of the SW 1/4 of Section 35, Township 4 South, Range 70 West, of the 6th Principal Meridian, 22 feet north of the south section line and 2058 feet east of the west section line of said section 35 (as measured from the electronic USGS Morrison (2016) topographic map (Google Earth .kmz file) overlayed in Google Earth). **3.G.(4)** The decree in Case No. 95CW126 provides for a maximum rate of diversion from Bear Creek not to exceed 5 cfs plus tributary inflows from Strain Gulch. **4.** Provide **a detailed outline of what has been done toward completion of the appropriations and application of water to a beneficial use as conditionally decreed, including expenditures.** Each Co-Applicant demonstrated diligence toward the completion of the appropriations as follows: 4.A. *Morrison*: The Morrison Quarry Reservoirs and their water rights are integral parts of Morrison's integrated municipal water supply system, which provides water within the Town of Morrison and extraterritorially by agreement. Pursuant to C.R.S. § 37-92-301(4)(b), when an integrated system is composed of several features, as is the case here, work on one feature of the system is considered in finding that reasonable diligence has been shown in the development of water rights for all features of the entire system. As described below in paragraph 5, during the subject diligence period, Morrison diverted and stored additional amounts of water that should now be made absolute pursuant to the Morrison Quarry Reservoir No. 2 storage right. In addition, during this diligence period, Morrison's staff spent significant time maintaining, repairing and operating the Morrison Quarry Reservoir No. 2, including but not limited to: periodic reservoir conditions observations, operation and maintenance of pumps at the reservoir, operation of valves in the pipelines from the reservoir, and daily reservoir staff gage readings. As described further in paragraph 4(b) below, material is being mined from the quarry areas within the Morrison Quarry Reservoir No. 1 legal description such that the reservoir can used for water storage in the future. Morrison incurred legal fees for its water rights counsel, and related court costs, in the amount of approximately of $94,000.00 during this diligence period. These fees and expenses were incurred in cases in which Morrison obtained findings of diligence and/or made additional amounts of conditional water rights absolute for the Morrison Quarry Pipeline No. 2 (as a point of diversion to the subject Morrison Quarry Reservoir Nos. 1 and 2 in Case No. 22CW3219 as a Co-Applicant with a predecessor of Amrize) and for the Strain Gulch Reservoir storage right, pursuant to which water can be stored in the subject Morrison Quarry Reservoirs (in Case No. 23CW3037); filed an application and prosecuted (not yet to completion) an application for a simple change in point of diversion for Morrison Municipal Intake No. 2, one of the decreed points of diversion for the water rights that are the subject of this application (Case No. 26CW3120 as a Co-Applicant with Amrize);

and participated in water court proceedings as an opposer to protect and defend Morrison's water rights, including but not limited to the subject water rights for the Morrison Quarry Reservoir Nos. 1 and 2. Morrison's above-described legal fees also included work related to general review of, and providing counsel on, matters pertaining to land use developments and related activities that implicated Morrison's water rights and water supply. Morrison also incurred charges of $115,563.79 on engineering services provided by its water resource consulting engineers related to its water system, including required accounting for storage pursuant to the Morrison Quarry Reservoir water rights and for use of Morrison's other water rights and supplies, as required by its water court decrees; analysis of Morrison's water rights yield; protection and development of Morrison's water rights; engineering analysis and design of infrastructure improvements; and other water engineering services related to utilization of Morrison's water supply and storage capabilities. Morrison also incurred over $690,000.00 of system-wide water-related infrastructure expenses (including expenses related to its raw water meter project and Red Rocks Amphitheater water tank project). **4.B.** *Amrize*: The Morrison Quarry Reservoirs and their water rights are an integral part of Amrize's integrated industrial water supply system for the operation of the Morrison Quarry. When an integrated system comprises several features, work on one feature of the system "shall be considered in finding that reasonable diligence has been shown in the development of water rights for all features of the entire" system. C.R.S. § 37-92-301(4)(b). Since the October 14, 2020, entry of the decree in Case No. 19CW3256 making absolute an additional portion of the water storage right decreed to Morrison Quarry Reservoir No. 2 and finding reasonable diligence in the development of the remaining conditional water storage rights that are the subject of this application, Amrize has actively mined areas of its property that are included within the legal description for Morrison Quarry Reservoir No. 1 pursuant to its Division of Reclamation, Mining and Safety Permit No. M-1973-021, including the pursuit of amendments and technical revisions thereto, and pursuant to the First Amendment to the Planned Unit Development – Industrial (PUD), CAMAS Colorado, Inc: Morrison Quarry, which was approved by the Town of Morrison Board of Trustees on December 1, 1998. The cost of such quarry permitting activities during the diligence period exceeded $1,417,000, and pursuant to such approvals Amrize removed more than 5 million cubic yards (approximately 3,099 acre-feet) of material from the quarry areas within the Morrison Quarry Reservoir No. 1 legal description. During the diligence period, Amrize continued to divert water for storage in and delivery from Morrison Quarry No. 2 for onsite (primarily dust suppression) uses in connection with its ongoing quarry operations, and submitted accounting for all such uses consistent with applicable water court decrees. Such water diversions and use were attributable to its water rights represented by shares of stock in the Bowles Reservoir Company pursuant to the decree entered in Case No. 11CW294, and pursuant to the water rights decreed to Morrison Quarry Reservoir No. 1 and Morrison Quarry Reservoir No. 2. Amrize continued paying its annual assessments for its Bowles Reservoir Company shares during the diligence period. To further support its operation of the Morrison Quarry during the diligence period, Amrize filed an application for approval of an augmentation plan to replace out-of-priority depletions associated with additional mining at the Morrison Quarry Reservoir No. 1 site (Case No. 24CW3181), and filed and obtained approval of a related Substitute Water Supply Plan pursuant to C.R.S. § 37-92-308(4). Water stored pursuant to the conditional water rights that are the subject of this application were included as replacement water sources in such plan. Amrize also participated (with Morrison) as co-applicants in an application for a simple change in point of diversion for Morrison Municipal Intake No. 2, one of the decreed points of diversion for the water rights that are the subject of this application (Case No. 26CW3120), and filed a further change of water right application to allow one of its other water rights (its 0.242 cfs interest in the Robert Lewis Ditch water right) to be stored in Morrison Quarry Reservoir No. 1 and Morrison Quarry Reservoir No. 2 and used for augmentation at the quarry (Case No. 26CW3126). In addition, Amrize, as a co-applicant with Morrison, obtained findings of reasonable diligence in Case No. 22CW3219 for conditional water rights for Morrison Quarry Pipeline No. 2 which, as described in paragraph 4.A above, permits diversions to storage in Morrison Quarry Reservoirs Nos. 1 and 2. Amrize also participated as an opposer in several water court applications filed by others in order to protect and defend Amrize's existing water rights, including but not limited to the water rights that are the subject of this application. Amrize also preliminarily evaluated the potential use of water released from storage in

Morrison Quarry Reservoir No. 1 and Morrison Quarry Reservoir No. 2 to replace out-of-priority depletions occurring at sand and gravel mining sites owned or operated by Amrize elsewhere in the South Platte River basin. Amrize expended over $308,000 in legal fees and approximately $335,000 in water engineering fees during the diligence period in connection with the Morrison Quarry-related water activities described in this paragraph. **5. Claim to make absolute in part:** A. **Date and amount of water storage claimed as absolute, and evidence supporting in-priority diversion of water to storage:** See Table 1, below, which is based on Morrison's annual accounting submittals to the State and Division Engineer. Morrison does not yet have a final amount of diversions into Morrison Quarry Reservoir No. 2 for the 2026 water year, and reserves the right to claim absolute amounts derived from the 2026 water year records in addition to the amounts claimed below.**Table 1**

Water Year	MQR#1 Days in Priority – Admin. # 52960.47756	MQR#2 Days in Priority – Admin. # 52960.43955	MQR#1 Storage during In-Priority Days	MQR#2 Storage during In-Priority Days

5.B. Description of use of water applied to beneficial use: All decreed uses. Pursuant to C.R.S. §37-92-301(4)(e), a decreed conditional water storage right shall be made absolute for all decreed purposes to the extent of the volume of the appropriation that has been captured, possessed and controlled at the decreed storage structure. **5.C. Description of place of use where water was applied to beneficial use:** Water stored in Morrison Quarry Reservoir No. 2 is used by Morrison within its water service area, and is used by Amrize in its commercial and industrial operations at the Morrison Quarry. **6. Name(s) and address(es) of the owner(s) of the land upon which any new diversion or storage structure or modification to any existing diversion or storage structure or existing storage pool is or will be constructed or upon which water is or will be stored:** Applicant Amrize owns the land on which Morrison Quarry Reservoir No. 1 is located. Applicant Town of Morrison owns the land on which Morrison Quarry Reservoir No. 2 is located. **WHEREFORE**, Co-Applicants, having demonstrated that they have steadily applied effort to complete the appropriations of these water rights in a reasonably expedient and efficient manner under all the facts and circumstances, and having captured, possessed and controlled a portion of the water rights at the decreed storage structure, respectfully request this Court to find that they have exercised reasonable diligence toward the completion of the appropriations associated with the water storage rights conditionally decreed in Case No. 95CW126, that an additional 164.46 acre-feet of the Morrison Quarry Reservoir No. 2 right should be made absolute, and to continue the remaining portions of the conditional water rights in full force and effect for another six years, or such period as may otherwise be permitted by law. 10 pages including verification page, plus one page of Exhibit.

CASE NUMBER 2026CW3181 RIVERVIEW FAMILY, LLC, c/o Claire Priest, 85 Loomis Place, New Haven, CT 06511, (203) 606-5454, and **MOUNTAIN MUTUAL RESERVOIR COMPANY,** 6949 Highway 73, Suite 15, Evergreen, CO 80439, Email: Norm@mmrcwater.com, Telephone: (303) 989-6932. Please address all correspondence to: Andrea L. Benson and Gilbert Y. Marchand, Jr., Alperstein & Covell, P.C., 2299 Pearl Street, Suite 400-C, Boulder, CO 80304; alb@alpersteincovell.com; gym@alpersteincovell.com (for Applicant Riverview Family, LLC); and to Aaron S. Ladd, Esq., Dickinson Wright PLLC, 1125 17th Street, Suite 550, Denver, CO 80202, Email: aladd@dickinson-wright.com, Telephone: (303) 723-8400 (for Applicant MMRC). **APPLICATION FOR AMENDED PLAN FOR AUGMENTATION INCLUDING EXCHANGE AND TO CORRECT LOCATION OF**

UNDERGROUND WATER RIGHT IN JEFFERSON COUNTY AND PARK COUNTY. 2. Summary of Application and Proposed Amendment: Applicant Riverview Family, LLC ("Riverview") is the owner of approximately 230 acres of land located in the SW1/4 SW1/4 of Section 30 and N1/2 NW1/4, the W1/2NE1/4 and the E1/2 NW1/4 SE1/4 of Section 31, Township 7 South, Ranch 70 West of the 6th P.M., shown on the attached Figure 1. The property is served by a well (known as the Riverview Well A) and a Plan for Augmentation originally decreed in Case No. 90CW63, District Court, Water Division 1, on April 3, 1991 ("Original Plan for Augmentation"), as amended by Case No. 19CW3154. The Original Plan for Augmentation approved use of the Riverview Well A as domestic water supply for eight summer cabins and fire prevention purposes. This Application seeks to amend the Original Plan for Augmentation to include winter-time replacement of out-of-priority depletions associated with wintertime pumping, including a project exchange right. Applicant also seeks to reduce the number of cabins served by the Riverview Well A, which more than offsets the additional wintertime depletions. In addition, Applicant seeks herein to correct the decreed location for the Riverview Well A. 3. Information from Original Plan for Augmentation: a. Previous Decree for Original Plan for Augmentation: Findings and Rulings of the Referee and Decree of the Water Court, Case No. 90CW63, District Court, Water Division 1, on April 3, 1991. b. Structure to be Augmented: Riverview Well A; Permit No. 50343-F. c. Decreed Legal Description of Well: Riverview Well A is located 2,300 feet from the North section line and 2,100 feet from the East section line, SW1/4 NE1/4, Section 31, Township 7 South, Range 70 West of the 6th P.M., Jefferson County, Colorado. d. Source of Water: The alluvium of the North Fork of the South Platte River. e. Depth of Well: Riverview Well A estimated depth is 20 feet. f. Appropriation Date: December 31, 1939. g. Amount: 50 gallons per minute (0.11 c.f.s.). h. Decreed Use: In-building domestic use for seven summer cabins and one bathhouse facility in a commercial resort and for one privately owned summer cabin; fire prevention purposes. 4. Water right(s) to be used for augmentation: a. Augmentation Sources from Original Plan for Augmentation: i. Applicant Riverview owns 8.6 shares of capital stock of MMRC. The holder of the shares is entitled to receive 0.27 acre foot of augmentation water per year from the water rights and storage facilities MMRC holds for the benefit of its shareholders. North Fork Associates and Mountain Mutual Reservoir Company own the following water rights which will be used to meet Applicant's augmentation requirements. Some of the following sources were added to the Original Plan for Augmentation pursuant to decree dated on May 5, 2022, in Case No. 19CW3154, District Court, Water Division 1. 1. Guiraud 3T Right. Mountain Mutual owns 3.481 cubic feet per second ("cfs") of the water rights decreed to the Guiraud 3T Ditch water right a/k/a/ Guiraud 3T Rights (the "Guiraud 3T Right"). The Guiraud 3T Right was decreed a priority date of July 1, 1867, for 20 cfs in the original adjudication for former Water District No. 23. The historic point of diversion for the Guiraud 3T Right was from the Middle Fork of the South Platte River in the NEl/4 of Section 8, Township 11 South, Range 76 West, 6th P.M., Park County. A decree authorizing a change of the point of diversion and place of use to the Guiraud Ditch was entered on May 15, 1954, in Civil Action No. 3376, by the Park County District Court. Past decrees have confirmed that 276.28 acres of hay meadows were historically irrigated, which have now been removed from irrigation, and that the consumptive use yield of the Guiraud 3T Right is 21.82 acre-feet per cfs. The Guiraud 3T Right owned by Mountain Mutual is either left in the stream system to offset stream depletions associated with water usage by Mountain Mutual shareholders or exchanged into storage. The Decree in Case No. 96CW287 adjudicated an exchange to storage, in the Lower Sacramento Creek Reservoir No. 1, of a portion of the Guiraud 3T Right. The exchange is identified as the Mountain Mutual Exchange No. 1 and has a priority date of October 15, 1996. 2. LSC Reservoir Right. Mountain Mutual owns a 21.8 percent interest (7.72 acre-feet) in the Lower Sacramento Creek Reservoir No. 1 (the "LSC Reservoir Right"). The LSC Reservoir Right is decreed for domestic, municipal, commercial, industrial, irrigation, fish and wildlife propagation, recreational and all other beneficial purposes, including exchange to compensate for depletions in the South Platte River or its tributaries. It was decreed for 40 acre-feet of storage in Case No. W-7741-74, with an appropriation date of July 25, 1974. Lower Sacramento Creek Reservoir is located in the NEI/4 NWI/4 of Section 32 and the SEI/4 SWI/4 of Section 29, Township 9 South, Range 77 West, 6th P.M., Park County, Colorado. Releases from the reservoir are made pursuant to the Decrees issued in Case Nos. 85CW250 and 85CW465. 3. Spinney Mountain Reservoir. Spinney

Mountain Reservoir is located on the South Platte River, with the left abutment of the dam at a point whence the Southwest comer of Section 36, Township 12 South, Range 74 West, 6th P.M., Park County, Colorado, bears South 23° 26' West a distance of 8,314.3 feet. North Fork Associates/Mountain Mutual Reservoir Company have a deeded right from the City of Aurora for a firm annual delivery of 80 acre-feet from the water decreed to the Spinney Mountain Reservoir including but not limited to the following: water from Case No. W-7395, with appropriation date of March 26, 1973, in the amount of 86,000 acre-feet. Such waters are decreed for domestic, irrigation, municipal and all other beneficial uses. As stated in a special warranty deed dated March 23, 1987, recorded in Park County on May 29, 1987, at Book 411 , Page 876, from the City of Aurora, grantor, to Mountain Mutual Reservoir Company and North Fork Associates, LLC, grantees, the supply of water which is lawfully available to the grantees and subject to this agreement includes an undivided interest in the right of first use of a firm yield of 80 acre-feet of water per annum from "any of the water rights owned by Aurora and decreed for storage in Spinney Mountain Reservoir." 4. Nickerson Ditch Rights. Mountain Mutual owns certain water rights, the point of diversion for which is the headgate of the Nickerson Ditch (hereinafter the "Nickerson Ditch Rights"), which rights Mountain Mutual proposes to use as a replacement supply as described herein. 5. Nickerson Ditch No. 2. In accordance with the Decree entered in Civil Action No. 1678 of the Park County District Court, on May 22, 1913, the Nickerson Ditch No. 2 was awarded a direct flow priority of May 1, 1872, for 0.65 of a cubic foot per second for irrigation purposes. The source of water is Deer Creek, a tributary of the North Fork of the South Platte River. The head gate of the Nickerson Ditch No. 2 is located on the North bank of Deer Creek at a point whence the East quarter comer of Section 9, Township 7 South, Range 72 West, of the 6th P.M., bears North 59° 15' East, a distance of 2,320 feet, more or less. 6. Parmalee Ditch No. 1. In accordance with the Decree entered in Civil Action No. 1678 of the Park County District Court, on May 22, 1913, the Parmalee Ditch No. 1 was awarded a direct flow priority of May 1, 1867, for 0.52 of a cubic foot per second for irrigation purposes. The source of water is Deer Creek, a tributary of the North Fork of the South Platte River. Pursuant to a Decree entered by the District Court for Water Division 1 in Case No. W-7434, on May 5, 1980, the point of diversion for the Parmalee Ditch No. 1 was transferred to the headgate of the Nickerson Ditch No. 2. Mountain Mutual owns the entire 0.52 cfs decreed to the Parmalee Ditch No. 1. 7. Carruthers Ditch No. 2. In accordance with the Decree entered in Civil Action No. 1678 of the Park County District Court, on May 22, 1913, the Carruthers Ditch No. 2 was awarded a direct flow priority of May 1, 1867, for 0.52 of a cubic foot per second for irrigation purposes. The source of water is Deer Creek, a tributary of the North Fork of the South Platte River. Mountain Mutual owns 0.28 of a cubic foot per second of the direct flow priority. Pursuant to a Decree entered by the District Court for Water Division 1 in Case No. W-7434, on May 5, 1980, the point of diversion for the 0.28 of a cubic foot per second decreed to the Carruthers Ditch No. 2 was transferred to the headgate of the Nickerson Ditch No. 2. Pursuant to the 00CW174 Decree, the historic consumptive use associated with the Nickerson Ditch Rights was quantified, and the terms and conditions under which the Nickerson Ditch Rights may be used for augmentation, replacement, exchange and storage purposes were defined and approved. Nothing in this Decree changes, supersedes or replaces any of the terms and conditions in the 00CW174 Decree. 8. Slaght Ditch Rights. Mountain Mutual owns water rights decreed to the Slaght Ditch and the Mack Ditch No. 2 ("Slaght Ditch Rights"), portions of which will be used as a replacement supply as described herein. The Slaght Ditch Rights have a priority date of May 1, 1863 and were decreed in the original adjudication for former Water District No. 23 by the Park County District Court, on May 22, 1913, in Civil Action No. 1678. Historically, the Slaght Ditch Rights were diverted from the North Fork of the South Platte River in the SEl/4 of Section 21 and the SWl/4 of Section 22, Township 7 South, Range 73 West, 6th P.M., Park County. Nothing in this Decree changes, supersedes or replaces any of the terms and conditions under which the Slaght Ditch water rights are used for augmentation, replacement and storage purposes as decreed in the Decrees entered by the District Court for Water Division 1 in Case No. 03CW238, dated October 26, 2006, and Case No. 16CW3197, dated September 19, 2018. 8.4.3. Maddox Reservoir Right. The Maddox Reservoir is located in the NEl/4 SWl/4 of Section 22, Township 7 South, Range 73 West of the 6th P.M. in Park County. It was adjudicated in Civil Action No. 3701, on April 27, 1972, with an appropriation date of May 31, 1905. It is decreed for multiple purposes including irrigation, domestic, fish culture and recreation with a capacity

of 54.0 acre-feet. It is filled by the Maddox Reservoir Feeder Ditch, which diverts from the North Fork of the South Platte River in the NEl/4 SWl/4 of Section 22, Township 7 South, Range 73 West of the 6th P.M. and is decreed as an alternate point of diversion for the Slaght Ditch. 9. Maddox Reservoir. The Maddox Reservoir is located in the NE1/4 SW1/4, Section 22, Township 7 South, Range 73 West of the 6th P.M. in Park County. It was adjudicated on November 11, 1971, with an appropriation date of May 31, 1905. It is decreed for multiple purposes including irrigation, domestic, fish culture and recreation with a capacity of 54.0 acre-feet. It is filled by the Maddox Reservoir Feeder Ditch, which diverts from the North Fork of the South Platte River in the NE1/4 SE1/4 SW1/4, Section 22, Township 7 South, Range 73 West of the 6th P.M. and decreed as an alternate point of diversion for the Slaght Ditch. Maddox Reservoir was not listed as an augmentation supply in the Original Plan for Augmentation and is being added by this amendment. ii. Co-Applicant's 8.6 shares of capital stock of MMRC entitle it to 0.27 acre foot of augmentation water per year from Guiraud 3T Ditch and storage of up to 0.1 acre-feet per year in Maddox Reservoir, as reflected in Exhibit B (90CW63) and Exhibit C. 5. Statement of Plan for Augmentation: a. Information from Original Plan for Augmentation: i. Location of Use: Approximately 230 acres in the SW1/4 SW1/4 of Section 30 and N1/2NW1/4, the W/12NE1/4 and the E1/2 NW1/4 SE1/4 of Section 31, Township 7 South, Range 70 West of the 6th P.M., shown on the attached Figure 1. ii. Use: In-house domestic purposes and emergency fire protection. Wastewater from all in-house uses will be treated by non-evaporative septic systems using soil adsorption leach fields. Return flows will be to the North Fork of the South Platte River drainage basin, the same basin from which the water supply for the Property will be obtained. iii. Total Demand: Total in-house domestic water requirement is 2.75 acre-feet per year. Domestic wastewater from the Riverview cabins is treated by individual septic tank leach filed systems. There is no appreciable lag time for return flows as the property is located directly adjacent to the North Fork. Consumptive use of the water diverted for domestic use was estimated to be 0.27 acre-foot per year for 8 cabins under the Original Plan for Augmentation. iv. Total Augmentation Water Needed: Up to 0.304 acre-foot annually. Augmentation during the period May through September will be made by leaving the above referenced Guirand 3T Ditch water rights in the stream. Transportation charges from the point water is released to the stream system to the confluence of the North Fork and the main stem of the South Platte River will be computed on the basis of 0.13 percent per mile. v. Exchange: Since the point of depletion associated with the out-of-priority diversions from the Riverview Well A is upstream of the point of delivery of augmentation water from the Guiraud 3T Ditch, Applicants will operate the appropriative right of substitute supply and exchange decreed in the Original Plan for Augmentation. The reach of the exchange shall extend from the confluence of the North Fork and the main stem of the South Platte River up the North Fork of the South Platte River to a point near Riverview Well A in the SW1/4 NE1/4 of Section 31, Township 7 South, Range 70 West of the 6th P.M. ("Riverview Well Point of Depletion"). The exchange will be administered with a priority date of August 31, 1990 at a maximum flow rate of 0.11 cfs. b. Amendment to Original Plan for Augmentation to Allow Wintertime Pumping and Augmentation: i. Total Demand: The total demand pursuant to this amendment will be equal to or less than 2.75 acre-feet permitted by the Original Plan for Augmentation, since Riverview will be reducing the total number of cabins from 8 to 5. ii. Total Augmentation Water Needed: Since the total demand pursuant to this amendment will be equal to or less than 2.75 acre-feet permitted by the Original Plan for Augmentation, the total amount of augmentation water needed will be equal to or less than the 0.304 acre-foot annually as provided in the Original Plan for Augmentation. iii. Augmentation of Wintertime Depletions: During the period October – April, augmentation of well depletions will be made by releasing water from Maddox Reservoir. Transportation charges from the point water is released to the stream system to the point of depletion of Riverview Well A will be assessed by the Division Engineer. Due to the small volume of wintertime stream depletions projected to occur under this plan, instantaneous stream depletions may be aggregated and replaced by one or more releases of short duration. c. Water Exchange Project: Since the point of depletion of the Riverview Well A and diversion point of Maddox Reservoir are upstream of some of the augmentation supplies, Applicants assert exchange project rights pursuant to Sections 37-92-103(9), 37-92-302(1)(a), 37-92-302(5), 37-92-305(3), 37-92-305(5), and 37-92-305(8)(a), C.R.S., and/or, as applicable, appropriative rights of exchange pursuant to Sections 37-80-120 and 37-83-104, C.R.S. i. MMRC seeks the right to exchange its water rights using the

following exchange reaches: 1. from the confluence of the North Fork of the South Platte River and the South Platte River in SW1/4 SE1/4, Section 25, Township 7 South, Range 70 West, thence up the North Fork of the South Platte River to the point of diversion of the Maddox Reservoir Feeder Ditch located on the North bank of the North Fork of the South Platte River in the NW1/4 SW1/4, Section 22, Township 7 South, Range 73 West, 6th P.M., approximately 1,240 feet East and 1,740 feet North of the SW Corner of Section 22; and 2. from the confluence of the North Fork of the South Platte River and the South Platte River in SW1/4 SE1/4, Section 25, Township 7 South, Range 70 West, thence up to the point of depletion of Riverview Well A. i. Appropriation Date: Date of the Application filed herein. ii. Amount: Maximum flow rate of 0.11 cfs. 6. Administration of Plan: This Amended Plan will continue to be administered pursuant to the terms and conditions as the Original Plan for Augmentation as set forth in Paragraph 6.H. of that decree. 7. Correction in Location of Riverview Well A. a. The original decreed point of diversion is described in paragraph 3.B.ii. above. The original well was washed out in a flood and a replacement well was drilled and issued Well Permit No. 50343-F in 1999. Well Permit No. 50343-F incorrectly stated the well location as: the SW1/4 NE 1/4 Section 31, Township 7 South, Ranch 70 West, 6th P.M., approximately 2,300 feet from the North section line and 2,600 feet from the East section line of said section. b. The actual physical location of the Riverview Well A is different than the locations described in the original decree and current Well Permit No. 50343-F, though still located within the SW1/4 NE 1/4 Section 31, Township 7 South, Ranch 70 West, 6th P.M. Its correct location is: 476917.5 Easting, 4360938.5 Northing, Zone 13, depicted on Figure 1. c. Applicant seeks to correct the decreed legal description of Riverview Well A to reflect the actual physical location of the well. WHEREFORE, Applicants seek a decree that: (1) approves the amendment to the Original Plan for Augmentation to allow for year-round use of Riverview Well A, (2) confirms that the augmentation supplies and exchange are sufficient to prevent injury, (3) confirms the requested appropriations, and (4) confirms the correct the legal description of Riverview Well A as described herein. Applicants also request entry of an Order directing the State Engineer to issue well permit or replacement well permit for the Riverview Well A consistent with the decree entered in this case. (12 pages, 3 exhibits).

THE WATER RIGHTS CLAIMED BY THESE APPLICATIONS MAY AFFECT IN PRIORITY ANY WATER RIGHTS CLAIMED OR HERETOFORE ADJUDICATED WITHIN THIS DIVISION AND OWNERS OF AFFECTED RIGHTS MUST APPEAR TO OBJECT WITHIN THE TIME PROVIDED BY STATUTE OR BE FOREVER BARRED.

YOU ARE HEREBY NOTIFIED that any party who wishes to oppose an application, or an amended application, may file with the Water Clerk, P. O. Box 2038, Greeley, CO 80632, a verified Statement of Opposition, setting forth facts as to why the application should not be granted, or why it should be granted only in part or on certain conditions. Such Statement of Opposition must be filed by the last day of **DECEMBER 2026** (forms available on www.coloradojudicial.gov or in the Clerk's office), and must be filed as an Original and include **$192.00** filing fee. A copy of each Statement of Opposition must also be served upon the Applicant or Applicant's Attorney and an affidavit or certificate of such service of mailing shall be filed with the Water Clerk.
