PERFORMANCE SET UP

Depending on your funder's grant settings, you may not be able to edit your grant's performance plan.

A grant's performance is measured by achievements against programmatic goals. If achievements are not meeting their given goal allocations, the grant's performance risk may be impacted. Once your performance plan is set up, you can begin to track achievements against performance goals.

The Performance Plan list shows the Name, Goal Type, Responsible Individual, and Strategy columns by default. In addition, the following columns may be shown: Status, Created By, Created Date, Modified By, and Modified Date. Each of these columns may be shown or hidden, sorted, or filtered.

GOAL TYPES

Goals are measurable activities planned to ensure grant deliverables are met on the grant's timeline. Each goal must have a Responsible Individual who will be responsible for tracking achievements against that goal. Amplifund has six types of goals.

MILESTONE GOALS

Milestone goals are the most basic goal type. They allow for tracking progress as a "Yes" or "No" response by the Responsible Individual. An example of a milestone goal is "Create and send Q1 Staff Survey."

NARRATIVE GOALS

Narrative goals are question and answer goals. Responsible Individuals may answer the question posed by the goal. An example of a narrative goal is "How successful was the grant-related activity this period?"

NUMERIC GOALS

Numeric goals are a discrete number to achieve. As units of the goal are completed, Responsible Individuals may record units completed. An example of a numeric goal is "number of program participants" with a goal target of 50.

PERCENT ACHIEVED GOALS

Percent achieved goals are goals to reach a desired percent. When tracking progress against a percent achieved goal, Responsible Individuals may capture Total Possible and Total Achieved percentages. An example of a percent achieved goal is "Volunteer Retention Rate" with a goal target of 70%.

PERCENT CHANGE GOALS

Percent change goals are goals to track a percent increase or decrease. Percent change goals are defined with a starting percent and a desired percent. When tracking progress against a percent change goal, Responsible Individuals may capture Total Possible and Total Achieved percentages. An example of a percent change goal is "Decrease in Student Absences" with a starting absentee rate of 10%, and a goal absentee rate of 3%.

REIMBURSEMENT GOAL

Reimbursement goals are goals with a discrete unit to achieve, and a dollar rate associated per unit. When tracking progress against a reimbursement goal, Responsible Individuals may enter Units Achieved. If the goal is added as a budget item, the reimbursement goal will appear as part of the grant's expense budget. If a reimbursement goal is shown on the grant budget, any updates made to the goal through the performance plan will automatically update the budget. An example of a Reimbursement goal is "Number of Patient Screenings" with target/ maximum units of 100, and a reimbursement rate per unit of \$22. Reimbursement goals are used to support pay for performance grants.
